The days of glass bottles are numbered. They are to be superseded by unbreakable paper bottles. Paper bottles can be manufactured for about half the cost of glass bottles, and can be made water-tight as well as air-tight. As brewers well know, it is no easy matter to make a glass bottle that is airtight when beer is the liquid it contains. All kinds of experiments have been made to accomplish this result, but none have succeeded. With paper bottles the matter will be comparatively easy, as the paper will give when the cork is driven into the neck of the bottle, and will be sealed perfectly. Glass bottles, too, will freeze and their contents spoil. In the paper bottles the liquid can defy the efforts of the frost king. This will mean a saving in more ways than one. There is no occasion for the laborious packing in straw that has to be done in the case of glass bottles. The paper bottles, being practically unbreakable, there is no need for straw as a safeguard against rough treatment while in transit, and as the paper mache will keep the contents warm, there need be no packing to keep the cold out.

The Newbern Journal says that the state geological survey has been renewed at Morehead. The great map of North Carolina was begun several years ago and the work in the western counties has been nearly completed, but it was found necessary, in order to carry the work eastward, to run a line of exact levels across the whole length of the state, starting at the ocean at Morehead City, and this is the object of the present survey.

Speaking of the election of Judge Russell as Governor the Charlotte Observer wisely says: "It would appear to be the proper thing for the people of the State to do, to simply fortify themselves for the worst and hope for the best. As Governor of a great State, with the interests of her people in his keeping, Russell may prove an agreeable surprise. Russell, the Governor, may be quite different from Russell, the politician. That is the charitable thing to hope for."

Mr. Sewall has been heard from at last. He says wheat did it. The low prices which the farmers had been receiving for their wheat under the gold standard, he says, were removed by the accident of a short crop abroad. Failure to realize that this accident left the real evil untouched caused a falling-off in the silver vote of districts where it should have been strong. Mr. Sewall says the people will win in 1900.

A French glass expert named Appert has made experiments showing that glass, modified by the introduction of 7 or 8 per cent of aluminum is more solid, less changeable and more elastic than ordinary glass. It is more elastic, the scientist may be in a fair way towards the rediscovery of the flexible glass of the ancients, which has hitherto baffled the experts.

The third and annual meeting of the American congress of liberal religious societies will be held in Indianapolis on the 17th, 18th and 19th insts. Judging from the list of celebrated speakers already secured and the importance of the questions to be discussed, the meetings will undoubtedly attract world-wide attention.

Merit Talks

"Merit talks" the intrinsic value of Hood's Sarsaparilla. Merit in medicine means the power to cure. Hood's Sarsaparilla possesses actual and unequalled curative power and therefore it has true merit. When you buy Hood's Sarsaparilla, and take it according to directions, to purify your blood, or cure any of the many blood diseases, you are morally certain to receive benefit. The power to cure is there. You are not trying an experiment. It will make your blood pure, rich and nourishing, and thus drive out the germs of disease, strengthen the nerves and build up the whole system.
