SUFFICIENT UNTO THE DAY.

It is always well in this life to look upon the bright side of it if a bright spot can be found any where, and certainly not to anticipate trouble till it is realized. We have troubles enough of the present without borrowing the imaginary ones of the future.

We regret to see that some people and some newspapers are busily engaged in hatching a regular Dante's Inferno for the next four year fusion administration in the State and all sorts of dire and lugubrious pictures are being portrayed. A regime of regerrymandering, of obnoxious office holders, of indignity upon the traditions of the good people of the State is already prophesied for the forthcoming administration before it has a chance to demonstrate its ability and possibly its predilection to be decent. As a matter of fact we do not believe that the incoming officials, from Governor elect Russell, on down the list to the most insignificant township constable, will have any preconceived purpose to practice any indignity upon the respectable people of this State unless they are provoked to it by the foolhardy utterances of those calamity howlers, who have heretofore proven themselves to be as barren of common sense as they are of regard for the public weal. We had a taste of this two years ago when the fusion legislature was nearly incensed to a partisan gerrymandering of the city of Raleigh by the foolish and puerile venom of those who busied themselves to malign and to abuse in advance, before the imaginary evil had ever materialized. Fortunately the fair-minded spirit of wiser heads came to the front and the wisdom of conciliation was demonstrated in contrast to the pitiable nonsense of reviling the hand that can either deal gently or harshly. There is no use to provoke our Republican and Populist friends to subjecting us to unpleasantness. There will be time enough for that when they have proven that they propose to give us a vicious administration. Let us believe that they will play the part of decency and use the advantage they have gained to their own credit and self-respect until the contrary is shown.

It has been said that a million dollars awaits the man who would invent a bottle which could not be refilled. Mr. F. L. Siegel, of the Capital City club of Atlanta has invented and patented such a bottle, and at least thinks that some money awaits him. Already one of the large distilling companies of this country has agreed to use the bottle, and its manufacture has been begun. Siegel has been working on the invention for many months. He had many obstacles to encounter. It is a sort of Chinese puzzle to figure out the making of a bottle out of which liquid will pour and into which none can be poured. But the inventor claims, after constant experiments, that he has succeeded in making a bottle which will only add slightly to the cost, and which is perfect in preventing refilling. Its object is to provide a simple and efficient device which will instantly

insure the closing of the opening in the event of any attempt to refill or recharge the bottle. A further object is to insure the proper seating of the valve or emptying the contents of the bottle, and also to provide for its being readily resealed in the event of any attempt to refill the bottle after once emptied. It has been adopted by one of the largest distillers, and will undoubtedly soon be all over the United States, as the manufacturing of the same is now in progress.
