The Soutnern Will Build Hospitals.

The Atlanta Constitution states that the Southern railway is going Lawyers will find decisions by the to erect a chain of hospitals at many points on its system for the care of those injured in its service.

A strong point that has been urged in favor of the railroad hospital is to the effect that it will lessen the number of damage suits. When a person is hurt he or she will be carried immediately to the nearest hospital and given the best of attention at the expense of the road. In this way many of the damage suits will be warded off, and those who do manage to get a verdict will receive a much less sum. Railroad hospitals for the purpose outlined are no new thing. The Plant system-and, in fact, most all the great systems throughout the countryhave erected such institutions, and from all information the systems have saved many dollars and at the same time given more efficient service to the injured.

Greensboro Record. Governor Russell and his "me toos" are struggling to make the people believe that Judge Simonton has committed a great outrage on the State of North Carolina by issuing a temporary restraining order to prevent the Governor from carrying out his insane ideas about the lease of the North Carolina Railroad.

Why Governor Russell should try to use the people of the State of North Carolina and his high office to advance the interests of the Seaboard Railroad is a conundrum that is asked every day by thinking men Men and newspapers who are now endeavoring to embitter the minds of the people against the United States Court, are doing North Carolina very great damage.

Judge Simonton has done just what he had a right to do. The State of North Carolina is a stockholder in the North Carolina Railroad; through her proper officers she made a contract of lease, which is binding and sacred. Here comes along a new Governor who thinks he sees a seat in the United States Senate at the end of an attempt to repudiate the State's action. He cares nothing about an honest contract; the reputation of his State; or the expense, as long as it costs him nothing. He is a born tyrant who has spent 24 years swinging the lash over the backs of shivering negroes and servile whites in the city of Wilmington. He is undertaking the same role with the people of the State. He has the Raleigh News and Observer ashis organ, and thus tries to intimidate our people. Amidst the storm raised over the lease, Governor Russell is punishing the poor and unfortunate inmates of our charitable institutions by placing them in charge of vulgar, ignorant partizans, who are to be rewarded for dirty work in and out of the

legislature. The people should not allow themselves to be misled by false statements coming from the governor and

his henchmen. Lawyers have rushed into print to talk about the legal wrong committed by Judge Simouton. They only make conspicious their ignorance of the questions involved in the case. The soverign state they say cannot be sued. Nobody says it can be. The XI Amendment to the constitution of the United States prohibits

This state wants to keep step in the forward march of progress. The command to move onward has been acquiesced by all our people, notwithstanding the officers are not of our choosing.
