**TO CONTINUE COOL.**

Fair Tonight and Tomorrow, So the Weather Bureau Says.

The following is the weather prediction for Raleigh and vicinity (not extending beyond a radius of 20 miles) issued at 8 a. m. today, April 15.

Fair tonight and Saturday, with continued cool weather.

**Conditions of the Weather.**

Barometer (ins.) 29.98.  
Dry bulb (deg.) 52.  
Change in 24 hours 2.  
Wet bulb 48.  
Minimum temperature 50.  
Wind velocity 1.1.  
Rainfall 0.08.  
Direction of wind N.  
State of weather Clear.

The high barometer in the west has spread southward and eastward and dominates the weather in the central section of the country where it is generally fair and cool.

A slight barometric depression in the lake region is causing some rain in that vicinity, with snow at Chicago.

The weather is cool everywhere except over Florida and the west Gulf coast, with temperatures below freezing from Marquette westward to Bismarck.

If the system is fortified by Hood's Sarsaparilla, which makes rich, red blood, there is little danger of sickness.
