TICKET SCALPING.

Associations of Merchants and Travelers Want to Abolish it.

The Chicago Tribune says: The National Association of Merchants & Travelers shall urge upon Congress prompt legislation in conformity with the repeated recommondations of the Inter-state Commerce Commission, and to pass without delay what is known as the Anti-Scalping Bill.

The Association is committed to the following proposition:

The Inter-state Commerce law is at present of little or no value to mercantile interests; the commission being unable to prevent discrimination either between persons or localities.

Recent decisions have deprived the Act to regulate commerce, of almost everything it was supposed to to mean when passed.

Discriminations against locality have grown to such an extent that in many cases they are a restraint to trade and should therefore be abolished. Nearly all the conservative roads are anxious to do this. but owing to the inherent weakness of railroad associations and the impotency of the commission, there is at present no machinery to accomplish the desired end.

Ticket scalping is an irregular and frequently dishonest business, This is What the Weather Bureau Predicts tolerated in no other country. If abolished, the regular passenger fares might be reduced. Many of the vexatious ticket restrictions might be removed and excursion rates for associations or other purposes might be more easily granted and accompanied by less red tape if the scalping offices were closed It is not in accordance with the protection of public morals to tolerate a business which encourages breaking of contracts, misrepresentation and forgery.
