### SPAIN'S OPINION

Says That There is no Reason for War Between the Countries.

By Cable to the Press-Visitor. Madrid, March &-A semi-offical note just issued declares that the govern ment has not received any complaint regarding the attitude of Consul General Lee, on contrary Gen. Blaco affirms that Gen. Lee's behavior has always been correct. Nevertheless the incident serves to explain the origin of ill will between the two countries. This is proved by the statements attributed to Secretary Sherman by which the jingoes have created the belief that the United States and Spain are trying to provoke war while at the same time engendering the feeling in Spain that the United States demands open hostilities. It is esential that this double game should be ended in order to prevent the two countries from going to war without motives and without either desiring it.
