HIGHER EDUCATION.

An Establishment Which is Eminently Worthy of Patronage.

The Horner Military School, Oxford, N. C.

During the past month this institution has been the subject of closest investigation at our hands, and trained representatives of the Journal have pursued rigid enquiry among highest unbiased authorities concerning its scope, method and achievements. In fact all available information concerning its features have been sought. Those directly concerned in its management or financially interested in its success were not consulted, it being deemed advisable to obtain expressions entirely free from bias or self interest.

As a result of such fair and painstaking search we do not hesitate to select this admirable institution and to freely and unreservedly endorse it to every reader who seeks the best and highest in education and who would secure the greatest return upon his investment, for this excellent establishment has undoubtedly solved the important question of maximum returns combined with minimum of expense. It affords the highest practical education at lowest possible cost. Moreover, it is ably managed, thorough in methods and equipment; in fact, all that could be asked or desired hence we do not hesitate to commend it in unqualified terms. We have no greater interest in this institution than in any other of its kind, but having by unbiased investigation assured ourselves of its superiority and worth, consider it a duty to subscribers to make such supreme merit known.

Now is the time to consider selection of an educational establishment and the choice should be made after closest examination. This we have done and in all candor we say to every reader that the claims of this institution cannot be ignored. It amply meets the requirements of the most exacting.—Chicago American Trade Journal.

MARRYING IN HARD TIMES.

N. Y. Sun.

QUESTION—Would the Sun advise an engaged couple to get married in these hard times.

ANSWER—If there be no other bar to the marriage than the hardness of the times, it ought not to be forbidden. Of course the bachelor who desires to become a husband should be able to earn a living or should otherwise have the means of life at his command, so that he shall be able to provide for the woman who is willing to become his wife, and that thus the twain may enjoy wedded bliss without undue anxiety about the morrow. We notice by the municipal record of marriage that just about as many people get married here in hard times as in better times; when work is slack and money tight as when both are plentiful. We could not give advice in an individual case like that which is presented to us, because we know nothing about the parties, but we know that the love which laughs at locksmiths can often act very boldly without ever having cause to regret the action. We are not prepared to say that the engaged couple should shrink from a serious duty or postpone the day of wedlock merely because the times are no so good as they have been or as they will be after awhile.

President Cleveland to Gladstone: Congratulations, old man. You've got the Home Rule bill half passed, and I've got the purchasing clause of the Sherman law half repealed. Which of us win will out first?

Senator Dolph gave the tale of the Chinese dragon a few vigorous twists just to let the new Chinese minister know that he wasn't afraid of relations.

There is no question about Paul Bourget, the much advertised French novelist, now visiting the United States, having a jewel of an advance agent.

The meanest man is he who gives his wife a check, to do her fall shopping with, on a suspended bank.

Comptroller Eckels has said that 145 national banks have suspended since January 1. Of these 1 has gone into voluntary liquidation, 57 have been placed in the hands of receivers, 63 are in the hands of national bank examiners with excellent prospects of early resumption, and 34 have already resumed business.

"Pooh," said another; "yesterday I suspended my thermometer on the easel that holds my 'View of the Polar Regions.' It fell at once to twenty below zero."

"That's nothing," said the last; "my portrait of the Marquis is so lifelike that it has to be shaved twice a week."
