

The eyes of the idle man are apt to look in to his neighbor's pocket—for he who will not live by honest industry, will be ready to supply himself by other men's means.

A man in Bangor having fasted for six months, became at last so starvation hungry, that he ate himself and didn't discover his mistake till he saw one of his neighbor's dogs picking his bones.

'You ought to be ashamed of yourself.'—How very common, and at the same time how very absurd it is for a 'pretty girl' after she has been kissed by a chap, to turn round, pouting her lips, and say, 'You ought to be ashamed of yourself!' when every one must know she means nothing by it. It is sheer nonsense girls, to make remarks of the kind, and 'you ought to be ashamed of yourselves' for uttering them. Come right out, like the 'down east' gal, who had been kissed, and say, 'You das'nt dew that again!'

#### IMPORTANT WORK,

NOW IN THE COURSE OF PUBLICATION.

#### A DICTIONARY

Of Arts, Manufactures, and Mines, containing a clear exposition of their principles and practices.

By Andrew Ure, M. D. F. R. S. M. G. S. M. A. S. Lond. Mem. Acad. N. S. Philadel. S. Ph. Soc. N. Germ. Hanov. Mulii. &c. &c.

Illustrated with one thousand two hundred and forty-one engravings.

**THIS** is unquestionably the most popular work of the kind ever published, and a book most admirably adapted to the wants of all classes of the community. The following are the important objects which the learned author endeavors to accomplish:

1st. To instruct the Manufacturer, Metallurgist and Tradesman in the principle of their respective processes, so as to render them, in reality, the masters of their business; and, to emancipate them from a state of bondage to such as are too common governed by blind prejudice and a vicious routine.

2ndly. To afford Merchants, Brokers, Dry-salters, Druggists, and officers of the Revenue characteristic description of the commodities which pass through their hands.

3rdly. By exhibiting some of the finest developments of Chemistry and Physics, to lay open an excellent practical school to Students of these kindred societies.

4thly. To teach capitalists, who may be desirous of placing their funds in some productive branch of industry, to select, judiciously, among plausible claimants.

5thly. To enable gentlemen of Law to become well acquainted with the nature of those patent schemes, which are so apt to give rise to litigation.

6thly. To present to legislators such a clear exposition of the staple manufactures, as may dissuade them from enacting laws which obstruct industry, or cherish one branch of it to the injury of many others.

And lastly, to give the general reader, intent chiefly on Intellectual Cultivation, views of many of the noblest achievements of Science, in effecting those grand transformation of matter to which Great Britain and the United States owe their permanent wealth, rank and power among the nations of the earth.

The latest statistics of every important object of Manufacture are given from the best and usually from official authority at the end of each article.

The work will be printed from the 2d London Edition, which sells for \$12 a copy. It will be put on good paper, in new brevier type, and will make about 1400 8vo. pages. It will be issued in twenty-one semi-monthly numbers, in covers, at 25 cents, each, payable on delivery.

To any person sending us five dollars at one time in advance, we will forward the numbers by mail, post paid, as soon as they come from the press.

To suitable agents this affords a rare opportunity, as we can put the work to them on terms extremely favorable. In every manufacturing town, and every village throughout the United States and Canada subscribers may be obtained with the greatest facility. Address, post paid, La Roy Sunderland, 126, Fulton street, New York.

To every editor who gives this advertisement entire 12 insertions, we will forward, to order, one copy of the whole work, provided the paper containing this notice be sent to the New York Watchman, New York.
