

PRESIDENT MOORE TO THE FARMERS

Secretary J. C. Kendall has sent out the program for the third annual session of the North Carolina Farmers State Convention. I desire through your columns to call the attention of the farmers of Wake and adjoining counties especially to this convention and the subjects to be discussed. A careful perusal of the program will show there is not a dull subject and not one that the live, progressive farmers of North Carolina are not vitally interested in.

A review of the progress made in agriculture for the last ten years will be instructive and interesting. Our progress in that period has been wonderful and will stimulate us to still greater achievements along agricultural lines.

"Problems in Soil Management" is a great subject. The soil is the foundation of all agriculture and upon our knowledge of "Soil Management" depends our success. Every farmer should hear the discussion of this topic.

"Problems in Crop Culture" (what farmer has not had them?) embraces a great deal and should be heard by every farmer in the state. The discussion on "Breeding and selecting of seeds" alone will repay any live farmer for the entire trip derived from the discussions of the other subjects as a clear profit, for without good seeds and good cultivation there can be no good crops.

"Live Stock" "Feeding", and best of all how to grow the feed right on our own farms, will appeal to many of our most enterprising farmers who want to get out of the rut of planting all cotton of all tobacco.

These and kindred topics that are to be discussed by persons especially selected on account of their knowledge of the subject assigned to them will furnish a valuable spread of information that should forcibly appeal to every farmer and make this the greatest farmers convention that has ever been held in the state.

Many of the speakers are successful North Carolina farmers living quite a distance from Raleigh who not only do not receive any pay for coming to the convention but defray their own expenses. In view of this fact, surely the farmers of Wake and adjoining counties who live within easy reach of Raleigh will turn out to hear their brother farmers from a distance discuss these questions that are of such vital importance to all of us.

I desire to call especial attention to the "Women's Department," the "Dairy Department" and the "Butter Contest." These departments within themselves would make a good convention. But with the other departments and all the subjects that are to be discussed we propose to have a convention that no farmer can afford to miss. Therefore let the farmers encourage the movement by their presence.

I want to see and shake hands with a thousand farmers, their wives, sons and daughters during the convention. If you fail to meet me there the loss shall fall on you.

Dear Mrs. Farmer, will you not be there with your husband? Do bring him out and let him get some new ideas injected into that brain of his. It will do him good and will help the children.

The convention is to be at the A. & M. College in Raleigh next week, July 10, 11, 12. Do come. Yours for the success of the Farmers of North Carolina.

C. C. MOORE,
President N. C. S. F. C.

WEATHER FORECAST.

(By the Associated Press.)
Washington, July 7.—Forecast for North Carolina for tonight and Sunday: Partly cloudy tonight and Sunday; light to fresh northeast winds.

The high barometer area occupies nearly the same position as it did yesterday. It has spread out more to the south and has diminished in energy in the north. The distribution of pressure west of the Rockies has changed but slightly. There has been no important change in temperature; in the Middle Atlantic States it is somewhat cooler. Maximum temperatures registered yesterday along the Gulf coast to 90 degrees and over; also at Phoenix, Havre and Nashville. Rain occurred yesterday in the South Atlantic States, Texas and Ohio. The following heavy precipitation, in inches, has been reported: Cleveland, 1.02; Augusta, 1.78; Wilmington, 1.28 and Tampa, 1.12. The center of the high pressure area persisting north of this section will cause a continuation of easterly winds which will produce partly cloudy weather in this vicinity tonight and Sunday.

A. H. THIESSEN,
Section Director.

Henderson Graded School Plastered With "Tite Hold."

Henderson, N. C., March 21, 1906. Guilford Plaster & Cement Co., Greensboro, N. C.

Gentlemen: Replying to your favor in which you ask for our opinion of your Tite-Hold Wood Fibre Wall Plaster, will say that we have used this plaster on the Henderson graded school building, and same has been satisfactory to both the proprietors and ourselves. We consider that you have a material equal to any of the patent plasters.

Yours truly,
E. L. WEAVER.

BODY OF NEGRO SCOTT BROUGHT HERE.

The body of the negro mutineer Scott, who was yesterday hanged at Wilmington by the United States marshal, was brought to Raleigh last night at 11:45 and taken to the Brown establishment where it was embalmed. Scott was a man of powerful physique. He was 5 feet 10 in height, and weighed about two hundred pounds. His muscular development was almost marvelous. Several doctors viewed the body. Scott was a Baltimore mulatto and possessed some education. His sloping forehead, the tattoos on his arms and several slashes on his body, evidently old wounds, showed the criminal and desperate character of the murderer of five men on the ill-fated schooner. The body will be sent to the medical school at the State University for dissecting purposes.

"SPRING CLEANING" NEEDED.

The Body Requires It Just as Much as the House Does.

"You look sick this morning."

"Yes. I woke up with a dull headache, a coated tongue and that dark brown taste in the mouth."

"Didn't you have pains in the joints and muscles?"

"Yes. As my old negro mammy used to say, 'I have misery in my joints.'"

"Better get a bottle of RHEUMACIDE and take it, old man."

"What does RHEUMACIDE do?"

"Why RHEUMACIDE is the most powerful and effective blood purifier in the world. It sweeps all the germs and poisons out of the blood and 'makes you well all over.'"

"Ever try it yourself?"

"Sure. I take a couple of bottles of it before spring begins. Give my blood a spring cleaning. And RHEUMACIDE puts me in such fine shape that I never have that tired feeling."

"Well, I'm going to try this RHEUMACIDE you say is the best ever."

"That's right. All the druggists sell it. Better get a bottle today. You start to get well with the first dose. The proprietors say that RHEUMACIDE 'gets at the joints from the inside' and 'makes you well all over.' And that's the truth, old man."

And that's the truth, old man."

Killed by Locomotive.

(Special to the Evening Times.)
Hamlet, N. C., July 5.—When train No. 66 was coming in a colored man jumped from it and killed himself. It is supposed that he was hobnobbing his way and wanted to get off the train before it stopped at the station, but the train was going faster than he thought and threw him against a cross-tie, breaking his skull and arm and causing him several other injuries. He was taken to the doctor's office where he died within fifteen minutes. He has not yet been identified.

Death of a Little Boy.

Douglas Lee, aged 13 months and ten days, son of Mr. and Mrs. M. W. Lee, died last evening at their home on Saunders street. The remains of the bright little boy were taken to Clayton today for interment.
