

S.S.S. HEALS OLD SORES

Every old sore exists because of a polluted condition of the blood. This vital fluid is infected with some germ or old taint, or perhaps has been left in an unhealthy condition from a long spell of sickness, or the trouble may be inherited. The poisonous germs and matter with which the blood is saturated force an outlet on the face, arms, legs or other part of the body and form a sore or ulcer. This being continually fed by a polluted blood supply, grows red and angry, festers and eats into the surrounding flesh until it becomes what is very aptly termed an "old sore." The relief produced by external treatment is only temporary. The only treatment that can do any real good is a blood purifier that goes to the very root of the trouble and removes the cause, and for this purpose nothing equals S. S. S. It drives out from the circulation all morbid matter and germs, even reaching down to hereditary taints, and by cleansing the blood from the blood but builds it up by supplying it with the rich, health-sustaining properties it needs to keep the system in health. S. S. S. makes pure blood and a sore must heal if the blood is pure and healthy. Book on Sores and Ulcers and medical advice free THE SWIFT SPECIFIC CO., ATLANTA, GA.

OUR ATHLETIC PARK JONES EXONERATED Good Progress Being Made on the Enterprise

Citizens Subscribe Liberally and Excellent Facilities Will Be Provided For Base-Ball, Foot-Ball and Other Sports—Arranging Events For Next Fair Week.

To the man on the street there are many indications of a revival of interest in base-ball. There is a movement on foot for a State League with six or more North Carolina towns represented. Our city League with its three teams are playing interesting, snappy ball and the crowd going out to see those games is constantly growing larger. Ladies are admitted free. The State League in Virginia and the ones south of us are making money and that means enthusiastic sport and pretty contests.

Out at the A. and M. work is going right along on an Athletic Park and it is going to be a good one. Eight thousand cubic yards of earth have been moved in grading it. When it is fenced in, there will be over 250,000 square feet of surface enclosed. There is going to be a big collection of foot-ball played on these grounds during fair week. The biggest and best games of foot-ball and pool-ball ever seen in Raleigh will be played during the coming foot-ball and base-ball seasons. The A. and M. has made wonderful progress in athletics during the past four years. Her foot-ball team this fall is going to be stronger than ever and it will need a good park in which to show its prowess.

This new athletic park is big enough for base-ball, foot-ball, track athletics and tennis. Its diamond will be the finest and built up with a resilient bed of cinders, covered with a few inches of soil. This gives a fast, springy, snappy infield. The outfield and the foot-ball field will be in grass. There will be erected on these grounds a suitable grand-stand with bleachers, a club house with reception room, dressing and bath rooms, there will be hot and cold shower bath. No point will be overlooked to make the equipment complete in every detail.

With this park complete, Raleigh will have a major league base-ball team here next spring for fixtures.

The park is being built by subscription to a bond issue, the bonds being issued by the Raleigh Athletic Park Company in denomination of \$25, bearing 6 per cent interest, and 10 mature in ten years, and \$250 worth of these bonds have been subscribed for. The total issue will be \$5,000. Subscriptions for the additional \$2,500 are now being taken.

Raleigh people and the base-ball cranks are giving their hearty support for Raleigh is the best base-ball town in the state.

DANGEROUS DERELICT MENACES NAVIGATION

(By the Associated Press.)
New York, July 25.—Lying in the water with her hull just awash, the wandering derelict, John S. Deering of Bath, Me., was sighted on July 23 about 100 miles west of Queenstown by the White star Line steamer Covic from Liverpool which arrived today. Captain Clarke of the Covic said the derelict was low in the water with only the stumps of her fore and main masts showing. He considers the derelict a serious menace to navigation because it is directly in the path of all westbound steamships on the North Atlantic passenger route. Captain Clarke gives the exact position of the Deering as latitude 47.13 north and longitude 21.18 west. He sighted the wreck about 6 o'clock last Wednesday evening. It was slowly drifting eastward.

The John S. Deering was formerly a three masted schooner. Late in February last she left Wilmington, N. C., with a cargo of lumber for New York. Heavy storms were encountered and the Deering became dismasted and water logged. In this condition she was abandoned on March 1 by her master and crew who were rescued by another schooner and landed at Philadelphia. It was off Cape Hatteras, N. C., that the derelict started on her wanderings and she has had a remarkably long life as a danger to navigation. Since she was left by her crew she has floated with the gulf stream in a northeasterly direction. It is estimated that over three thousand miles has been covered in the 140 days since she was abandoned. During this time she has been sighted by a number of ships.
