**Grows Hair** and we can PROVE IT

I enlivers and invigorates the hair he offers the following glands and tissues of the scalp, letin mentioned above: resulting in a continuous and increasing growth of the hair.

Letters of sprace are continually coming in from scarly all parts of the county stating that Danderine has renewed the growth of hair in cases that were considered absolutely hopeless.

A ledy from Brooklyn writes:
"After a hort trial my hair stopped falling, and I now have a lovely head of hair, very heavy and over one and a quarter yards long."

Now on sale at every drug and toilet store in the land; 3 sizes 25c, 50c and \$1.00

Free To show how quickly will send a large sample free by return mail to anyone who sends this free coupon to the Knowiton Danderine Co., Chicago, with their name and address and 10c in sliver or stamps to pay postage.

### NOTICE.

Subscribers of the Capital City Telephone will please add the following names to the directory (telephone book) published June 1st, 1908. We will get out a new book October 10th. Those wishing their names to appear in it will please write us as soon as possible

The Mountain Section of Our State. Its Climate and Resources,

A bulletin recently issued by the department of agriculture contains much valuable information about the products and resources of North Carolina. Dr. B. W. Kilgore, state chemist, recently called attention in this paper to the fact that the department is now establishing test-farms The Great DANDERINE Never in the great northwestern section; and because of the fact that few of the people of this section know anything about the climate and products of the mountains of North Carolina, he offers the following from the bul-

"In the high plateaus of the northwestern part of the state; where the forest growth is white-pine, hemlock, and fir, one might imagine himself in Canada. In this section—the counties of Ashe, Alleghany, and othersthe farms lie generally over 3,000 feet above the sea-level, and grass and live-stock are the leading interests. From these lofty elevations the state Danderine stimulates the scalp, makes it healthy and keeps it so it is the greatest scalp invigorator known. It is a wholesome medicine for both the hair and scalp. Even a small bottle of it will put more genuine life in your hair than a gallon of any other hair tonic ever made. It shows results from the your start.

From these lofty elevations the state slopes to the sun and the sea, and there is a series of climates all the way to the lower coast, where we find the first tall palm-tree growth in the forest. From white-pines and hemlocks to palms indicates a wonderful range of climate, and hemce a wonderful range of capacities for the production of different crops, from production of different crops, from the blue-grass of the northwestern corner to the palms and sugar-cane of the southeast section.

"This is the region west of the great escarpment of the Blue Ridge, in which are found the highest mountain peaks east of the Rock Mountains. It is a region of fertile valleys and elevated plateaus, with a climate very similar to that of the northern middle states. The summers are cool and pleasant and the whole region is an attractive one to the summer visitor and is becoming a great summer resort. The winters are cold, but shorter than those of the middle states north. In most mountain regions the mountainsides are rocky and sterile, but in the mountains of North Carolina, as a rule, the mountain slopes are covered with fertile soil and in some parts of the mountain country the treeless "balds" have their slopes to their lofty tops covered with fertile soil and rich grasses, on which great herds of cattle are grazed in summer. The valleys in the southern section of the mountain country are less elevated and the climate is mild and pleasant, while the snowfall is very light. The clear streams of water that flow everywhere and the natural growth of fine grasses mark this region for cattle and the dairy, while on the uplands fruit of all kinds flourishes as it seldom does elsewhere. It is desfined to be the most noted applegrowing section in the whole country. Apples from the mountain country have twice carried off the first prize at the Madison Square Garden in New York City in competition with the whole United States. Peaches attain a color and quality there which they do not reach in the lower country. They grow as handsome as the California peaches, and as to quality the California product is hardly to be named in comparison with them."

A pleasing, good, high grade, truly flavored, amber colored cup of coffee can be had-and without the real coffee danger or damage to health-by simply using Dr. Shoop's new substitute, called "Health Coffee." Pure, wholesome, toaster cereals, malt, nuts, etc., make Dr. Shoop's Health Coffee both healthful and satisfying. No 20 to 30 minutes tedious boiling. "Made in a minute," says Dr. Shoop. If served as coffee,it's taste will even trick an expert. Test it and see. W. B. Mann.

### SUPREME COURT DECISIONS.

The supreme court yesterday filed the first of the opinions in cases argued during the present fall term, 13 decisions in all, of which two HART-WARD HARDWARE were per curiam, as follows:

Hughes vs. Crooker, from Beaufort: no error.

Lumber Co. vs. Harrison, from Beaufort: revised.

Lumber Co. vs. Satchwell, from Beaufort: affirmed. Straus vs. Sparrow, from Beaufort:

ffirmed. Hudnell vs. Daniels, from Beau-

fort; affirmed. Davenport vs. Railroad, from Tyrell; no error. Guilford vs. Guilford, from Beau-

fort; dismissed under Rule 17. Fowle vs. Mitchell, from Beaufort; lismissed under Rule 17. Smith vs. Cashle & Chowan Lum-

ber Co., from Bertle; modified and affirmed. Robertson vs. A. C. L. R. R. from Bertie: affirmed. Coleman vs. Coleman, from War-

ren: affirmed. Emry vs. Chappel, from Halifax; error.

Rue vs. Connell, from Warren; affirmed. Bargain House Co. vs. Watson,

from Bertle; no error. Bruce vs. Mining Co., from Burke; motion of appellee to retax costs de-
