The dining table will be under the spreading live oaks in the grounds of the Masonic hall. The Citizens' Band of Beaufort will meet the party on their arrival and this compliment paid by the splendid people of Beaufort is greatly appreciated by the Raleigh Sunshiners and their thousands of friends. ### THE TIMES' DAILY FINANCIAL STORY

(By T. C. Shotwell.) New York, July 17.—New high records for steel, common and Union Pacific were features of an active and strong market during the early Wall Street trading today. Steel common made its high record shortly after the opening of trading when it sold at 73. At the end of the first hour Union Pacific was taken in hand and advanced 3 1/4 points to the new high record of 97 3/4.

Strength of these two issues had a sympathetic influence on the balance of the list, and gains averaging a point were scored by other standard railroad and industrial shares.

Amalgamated copper shared in the general strength of the market and rose a point. American Ice was also conspicuous for its strength, rising 2 points. Toward the end of the first hour of the session the volume of business increased and the market broadened.

American shares were steady in London, with the exception of the steel issues, which were a fraction lower. Copper and silver shares were also steady.

New York Cotton Letter (By W. B. Hibbs & Co.) New York, July 17.—The market showed a return to more rational conditions from the violent break of yesterday where there were so many false reports of rain in Texas and there was so much bear raiding in evidence. Today's reports from Texas weather bureau showed only one-third of an inch of rain at Dublin and Paris, and a quarter at Greenville, while maximum temperatures again exceeded 100 degrees at seven different places in that state.

This bullish news, together with Liverpool's failure to respond to our break of yesterday, made it clearly apparent that today's violent collapse was due more to "a shake out" of recent heavy scattering weak speculative long interest than to any actual change in the general situation. At one time today prices showed a recovery of 17 points, but further bear pressure and manipulation reduced this to less than ten points at the close.

It is reported that some large southern operators are overloaded, through having bought too heavily during the rise last week, and overstayed their market. It is said an effort has been made to shame them out and will be continued until they have been eliminated, or their lines heavily reduced before the present pressure against the market will be relaxed. This may keep the market in a feverish and erratic condition next week. But if the growth in Texas continues undisturbed during the next few days that feature will be more of a bullish factor, and it will be asserted in the renewal of bullish activity and higher prices.

Texas makes 28 per cent of the total crop, and if the plants there are to continue suffering such heavy deterioration as they have done the past ten days of drought and excessive heat the next government crop report to be issued on August 2nd, will be more bullish than last month's report.

### New York Stocks. (By Leased Wire to The Times)

New York, July 17.—The stock market was fairly active at the opening, with a generally steady tone and without important changes in prices. The majority of the leading issues traded in at the start showed small fractional gains, the most important of which were Rock Island, which made a further point on the upward movement. Standard Oil, closed a shade above yesterday's closing while the preferred stock, slightly under, was raising prices, and the movements of these two indicate fluctuations in the first fifteen minutes in the rest of the market.
