## A MIDLAND TWILIGHT.

The cloud-plumed afternoon has flown along the household street,  
 L of shadows flicker. Freshly strown,  
 the sprays whir. Far and fleet  
 Hushed, furtive footsteps dodge and  
 creep, and hunting voices call.  
 "I spy," and "One, two, three for you,"  
 around the street's still hall  
 The little winds of twilight blow. Upon  
 the hop-scotch chalk.  
 Home-turning footsteps come and go  
 along the closed walk.  
 The little winds of twilight blow closed  
 flower and full-fresh tree;  
 And far and near a singing voice cries,  
 "All sorts out in free!"  
 The cloud-plumed afternoon has flown,  
 slow-winged, green and bright;  
 And all the dreams her hours have  
 known turn with her toward the  
 night.  
 The spacious night, that quivers far in  
 silver keeps the gray,  
 Beyond the first cool snowdrop star  
 above the roof-rimmed way.  
 Home and at night—profound for me,  
 and happy their wide grace  
 Thrills through the wind, the white-  
 stirred tree, fleet game and white-  
 starred space.  
 Deep by their ways may my soul live,  
 as by her hall-dome.  
 Through all her cloud-plumed day-  
 time hours; and when to my great  
 home,  
 Home and the night, at last I come, so  
 may it be for me:  
 Peace! In my heart, a fresh voice  
 singing, "All sorts out in free."

# STATEMENT

## From Buffalo Lithia Springs Water Company.

The State Board of Health of North Carolina having reported certain samples of our water, examined by its chemist, as polluted, we have written to all dealers in this state to return to us every bottle of our water in their possession.

Had we have known there was any water out that was even suspected we would have taken it up at once and not have waited for the authorities to take action.

This was a matter of surprise to us, as we have a Sanitary Chemical Analysis of our water made every 30 days and our Chemist reports the water pure at its source. Not content with the findings of one Chemist we have from time to time other Chemists make Sanitary Analyses. We have also had Bacteriological Analyses made of the water by recognized authorities, who report the water pure at its source. Every effort will be made to ascertain how the water examined by the Board became polluted.

Our entire bottling plant is being torn down and rebuilt, under the supervision of Prof. A. A. Breneman, of New York, who we believe to be the best Sanitary Water Expert in America.

The National authorities will be asked to advise with us in building an absolutely up-to-date Bottling Plant, and no expense will be spared to make the plant and its output all that it should be.
