

TODAY'S MARKETS BY WIRE.

Stocks, Cotton, Grain and Provisions.

New York Stock.
(By Leased Wire to The Times)
New York, Sept. 2.—There was a generally strong tone to the stock market trading in the first 15 minutes, following irregular price changes at the opening. The most important feature of the dealings was the prices of railroad issues and the decrease in the trading in the high-priced stocks that have so long been established as being market leaders. Texas Pacific ranged around 39 and Kansas and Texas continued its upward movement. The greatest gain was made in Union Pacific preferred, which rose a point. Steel common moved up 3/4, with other industrials generally making fractional gains.

New York Cotton.
(By Leased Wire to The Times)
New York, Sept. 2.—The cotton market opened firmer, 6 to 9 points higher in response to better cables and room-covering. On the upturn Wall street was a large seller and some of the local bears put out cotton on the chance that a bullish government crop report has been discounted, but the market absorbed it without losing more than a couple of points.

THE TIMES' DAILY FINANCIAL STORY

(By T. C. Shotwell)
New York, Sept. 2.—Trading in Wall street today assumed a sudden aspect of brightness, after a dull opening, upon the publication of the government cotton report for the month ending August 31. The report was the lowest in percentage issued for the same months since Sept., 1902. The report filed today showed a loss of almost one percent over the previous low record. The crop estimate for the month of August was greatly reduced from the figures made public by experts.

As a result of the filing of the report the market became sudden active with the Harriman shares assuming the leading role. Union Pacific preferred advanced one point. The common jumped 1-8.

So great was the interest displayed by foreign markets in the crop conditions of this country that the Liverpool exchange remained open two hours after its usual closing.

Steel was a prominent factor in today's trading, and although its advance was less than a point over that of yesterday it displayed great activity. It closed at the noon hour just about one point over yesterday's closing.

The general inactivity of the market in all leading issues was due, according to those familiar with the street, to the approaching holidays. The market will be closed on Saturday and will open again on Tuesday.

Showing rather more than its usual proportion of activity, Pennsylvania advanced with comparative ease and it was said that with the steel business that road is now attaining record figures, surpassing the high figures made by that stock two years ago when it was reached. American Hide & Leather also brightened over the opening today as a response to a highly favorable annual report which showed more than 10 percent earnings by the preferred.

New York Cotton Letter.
(By W. B. Hibbs & Co.)
New York, Sept. 2.—The government crop report announced at noon today shows condition of the crop to be average date of August 25th to have been the worst on record for that period. It makes the condition 67.7 per cent against 71.9 last month, 76.1 last year and 73.6 the average condition on August 25th for the past ten years. The previous lowest condition on record in the last thirty years was 64 in the crop failure year of 1902, and prior to that 61.2 in 1896. The condition at present in the states of Louisiana, Oklahoma, Arkansas, Texas and Alabama, is the lowest on record in the history of the agricultural bureau report for Texas and Arkansas, which are only a few points better than the lowest percentages ever recorded for those states. The crop in the Carolinas and Georgia averages about 75. This is the best part of the belt but even the

condition there is under the ten year average. The condition in Texas is 59, Arkansas 60, Oklahoma 56, and Louisiana 48. This confirms fully the crop calamity threatening for the last several months and to which we have been calling your attention to in these letters daily since then.

The market advanced but 10 to 12 points from the quotations which prevailed just before the report was announced. This was because of continued aggressive opposition from bear element and big spot dealers and recent sold-out bulls. But for this the price would have gone to over 13 cents. After the active options had advanced to 12.61 and 12.66 for December to May the bear leaders stepped in and sold and hammered the market down to 12 1/2. Later the market was firmer on heavy foreign selling and outside buying.

There is no doubt cotton will ultimately sell very much higher. We would continue to advise adhering to the bull side on this prospect and favor purchases on all soft spots in continuing scalping operations.

NO CHEAPER SHOES.
Boston, Sept. 2.—The price of shoes instead of being reduced as a result of the removal of the duty on hides will be increased. The reason is that the price of hides which determines that of the shoe is not materially affected by the tariff and is at an excessively high point because the demand for hides greatly exceeds the supply. This is the substance of a statement issued by President Charles H. Jones of the Commonwealth Shoe and Leather Company.
