COTTON GRAIN

New York Cotton Letter. ing cotton freely, and this has createvening up for over the government an effort to support prices. next Monday. Meanwhile the south continues a very free seller, receipts are still enormous and the latest private crop reports indicate far less than the average September deterioration. There have been a number of New England spinners here today, and people who have talked with most of them, report an almost unanimous disposition to look for much lower prices and to buy slowly pending such a basis. The continued southern hedge selling here does not look like any effective holding as yet and if the government report on Monday should be at all in line with the national ginners, the figures may prove high enough, compared with the ten year average to strengthen the present popular tendency to look for a crop of over rather than under fourteen million bales.

New York, Sept. 27-The market ruled quiet and steadier. today but the short covering which was a feachanged to 1 point higher. Opened ture just before the close yesterday appeared to have run its course and twih this buying withdrawn another steady stream of southern selling brought a further show decline nearly to yesterday's low point, apparentdemoralize the southern markets and while naturally the trade demand tions. is somewhat better at this level. it has not increased as anticipated so that the pressure of cotton is still tend that greak the market has so remains very bearish, this feeling being increased by further unsettlement in the stock market. We fear the market has not yet reached an investment basis.

THEFT OF \$25,000.

Lost at St. Louis, Postmaster Akins Says He is Not Worrying About It.

St. Louis, Sept. 27.-The fact that a registered package containing becelpts for today are estimated at tween \$25,000 and \$30,000 in currency, mailed in St. Louis a year ago, was stolen from the mails was admitted this afternoon, for the first time by F. E. Davis, chief clerk in the office of the postoffice inspector

Davis said the money, a shipment Texas, did not reach its destination. Chicago, Sept. 27-Wheat shows Whether it was certain the loss occurred in St. Louis, he would not

say. The loser, should the money neevr be recovered, would be a bonding concern in Des Moines, Ia. He refused to give further details and would not name the Texas point which the money should have reach-

During the year since it occurred he theft has been kept an absolute secret, known only to Postmaster l'homas J. Atkins and a few employees and inspectors. The former declares he is not worrying about it.

Atkins then had a bill introduced in congress to relieve him of the fegal obligations under his \$200,000 bond, of reimbursing the government Provisions. Further depressed by and that resulted in a congressional investigation, and the bill was killed.

In Memory of Pioneer Methodist.

Plainfield, Ill., Sept. 27 .- The delegates to the Rock River Methodist conference in session at Joliet came to Plainfield this afternoon and assisted at the dedication of a monument of Jesse Walker, a noted pioneer of Methodism in Illinois, and the middle west. Bishon Hamilton, of Boston, presided over the exercises. and Bishop Hendrix, of the M. E. Church, South, delivered the oration of the day.

Bishop Winchester's Consecration. Little Rock, Ark., Sept. 27 .- Several Episcopal bishops and clergymen have already arrived here to attend the consecration of Dr. James Ridout Winchester as bishop coadjutor of the diocese of Arkansas. 8.22 Bishop Tuttle, of St. Louis, will preside at the ceremony, which is to take place Friday morning in Trinity cathedral.

> Ohio Farmer's Mistake. The Ohio farmer who hatched his

(Continued From Page One.)

on education, and only a prosperous nation can afford the general education of its people. Poverty is at once helpless, and soon ignorant and indolent. An improvished people cannot have adequate schools or schooling.

No greater problem ever confronted any nation. But the solution is plain. In a word, we must increase especially the reproduction of the unfit. To solve half of the problem is not sufficient; and in passing, I must emphasize the fact that with the most practical scientific systems of farming applied to all the farm lands of the United States, there is still somewhere a limit to and that instead of docking them the highest possible production of food and clothing material in this ped?" asked Dr. Geo. T. Winston, of country; but there is no limit to the reproduction and increase of population except the starvation limit.

"Just and adequate legislation should be enacted by the nation for the better control of immigration, and by the states for preventing the reproduction of every form of degeneracy, whether revealed by insanity, criminality, idiocy, reformity, or beggary. Half of all the state revenue is already required in many cases for the support of the nonproductive degenerate classes, upon whose reproduction there is still no check in most states..

y'elds of the United States is not a prediction but a fact. To accomplish this object requires first of all that agricultural ignorance shall be replaced with agricultural intelligence in the minds of the people of influence in this nation.

"It is truly gratifying to acknowledge that the state of Illinois is now devoting \$100,000 per annum to soil and crop investigations and the dissemination of the information secured, even though this is lers than one percent of the revenue of the state, all of which come directly or indirectly from the soil.

"Yet I must confess to you that as an average the farm lands of Illinois are yielding only half a crop: that by soil enrichment alone the average crop yields of Illinois could be coubled even with the same seed as we now plant, with the same ly, the movement is too heavy as to amount of methods of cultivation, and with our normal climate condi-

soils of every state should be in-'The rapid investigation of the augurated, and this should be accomfelt, though of course not to the ex- panied by the wide dissemination of information by demonstration forms rapidly a cent a higher. Sentiment showing by actual field trial the most practical methods of soil improvement and preservation. This is local work and is best done by the state institution directly responsible to their home people; while the federal government must direct and control the reclamation work on the federal lands. But, because the revenue of the federal government is ten times the total of combined revenue of all the states, the federal appropriations to the state agricultural institutions should be largely ncreased for the specific purpose of increasing and extending the knowledge of practical methods for restoring and improving the fertility of the soil: and these increased appropriations might well be made in direct proportion to the acreage of farm lands in the respective states. All from a St. Louis bank to a bank in public schools should offer practical scientific instructions in the principals of soil fertility, and every man and woman of mental power should acquite information and expert in-

fluence towards sawing the soil. "But the fact is that not one American in a hundred knows what the soils contain or what the crops require. They know of the rivers of Asia and of all the kings of England, and perhaps of the wars of Caesar and the oration of Cicero but they do not know what is required to produce a grain of wheat or a kernal of corn. And yet there is as much of culture and more of use and value and of satisfaction in a study of clover roots and plantfoot compounds than in Greek roots that the study of soil fertility is so month.

Talks About Senatorial Race and Other Things

Operators of Fayetteville Silk Mill All Negroes-Superintendent is a Negre-Are Whipped When They Are Late-Political Talks.

Washington, Sept. 27,-"Do you know that every operative of the Fayetteville silk mills are negroes that they are all under 21 years of age; that a "Yankee negro from Philadelphia is the superintendent when they are late, they are whip Asheville, former president of A. & M. College who is at the New Ebbitt

"Absolutely true. These young negroes are hired out to the mills until they are 21 years old. The superintendent has absolute power to whip them or do anything else they wish. Rather an interesting subject for our northern friends who think or try to think that the southern people mistreat the colored race." Dr. Winston looks ten years

younger than he did when he was president of A. & M. He says he LET US show our Laurel range. L. OUR OYSTERS are tender, juicy, ta is enjoying the best of health and that he expects to live years after "That we can double the crop Uncle Joe Cannon has passed away If looks count for anything the doctor will certainly live for a long time to come.

When asked about the senatorial race Dr. Winston said he believed the western part of the state would go for Simmons, "Both Simmons and Kitchin have friends out my way,' he said, "but I think Simmons will win. Whenever any one asks me about this particular contest I am reminded of the way a certain Raieigh lawyer sized up the situation when he said, 'they are all good men Avcock would make lots of news, his brilliant oratory would attract country wide attention; Kitchin would be good to his personal friends; Judge Clark would make a lot of noise but Simmons would do more for the state than all the rest of them put together, and few people would hear

of it until actually published." Champ Clark has had his outing and is now telling the folks at Bowling Green, Pike county, Mo., how ing much about the democratic presidential nomination, but if the mem bers of congress had their say, there is little or no doubt that Clark would be the man. Woodrow Wilson of New Jersey has about "peteredout. His Bryan policies has lost him hundreds of friends. The New York World was one of his ablest supporters until he came out too strong with Bryan ideas, when they dropped him. Then, too, Wilson, be lieves in breaking down party lines. and there are people with whom he will have to make friends if he gets the nomination, who do not believe with the New Jersevan in this respect.

"Red Buck" Bryan returned to Washington and is "on the job" again. "Red Buck" is Washington correspondent for the New York

CARDINAL A STORM CENTER.

Protestant Ministers Oppose Plan to Honor Prelate.

Baltimore, Md., Sept. 27-Vigorously protesting against the proposal to make October 16 a municipal holiday in honor of the ecclesiastical celebration of Cardinal Gibbons' dual jubilee, ministers of various protestant denominations created a remarkable scene at the meeting of city councils tonight. In the face of the strenuous objections of the pastors the first branch of the councils passed the measure which now will come before the second branch. The protestant ministers have demanded a public hearing before the council, and will hold a meeting for protest. .

With President Taft, former Pres and Latin compounds; and I wish ident Roosevelt, and many other persons of national prominence in simple and easy and so interesting attendance, a civic demonstration that any man or woman of ordinary was held here about three months education can become master of the ago in honor of the twenty-fifth anessential principles of studying the niversary of the prelate's accession subject an hour a day for a simple to the cardinalate and the fiftieth anniversary of his ordination to the The church celebration priesthood. will be held during the week beginning October 15. It was proposed to make the following day a municipal holiday, and an ordinance to that effect was introduced in councils re cently.

Objections presented by the pastors tonight were the outgrowth of a meeting of ministers of the protestthe Seaboard Air Line industrial ant denominations at the Central Y.

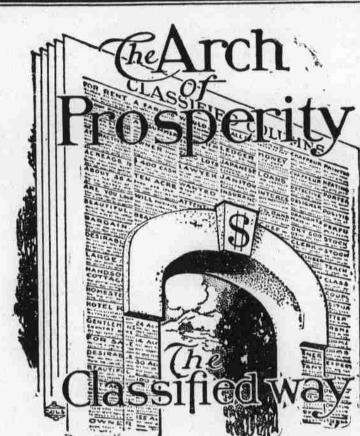

> The resolutions adopted then and presented to councils tonight were, in part, as follows: 'We regard such a proposed action

> as protestant citizens in this munici-
