FOR PASSING BAD DOLLARS

Charles Johnson, Wake County Criminal, In Jail On Charge of Counterfeiting Silver Dollars

CAPTAIN THOMAS ON JOB

Well Known Special Agent of Government Traces Coins and Bags Man With Goods in Possession—Mr. J. N. McRary First Gives Information Leading to Arrest—Preliminary Before Commissioner Nichols Today.

For making and passing counterfeit silver dollar pieces and for having molds in his possession, Charles Johnson, a noted white criminal, was today bound over to court by Col. John Nichols, United States commissioner, and in default of $1,000 was committed to the Wake county jail to await trial at the November term of federal court.

Johnson finished serving a sentence in the state penitentiary early in September and had not long been in Raleigh from the state farm in Halifax when he began his operations as a counterfeiter. The first knowledge the authorities had of his operations was given by Mr. J. N. McRary, keeper of the market, who reported the matter to Col. Nichols.

Capt. Henry E. Thomas of Charlotte, one of the best agents in the employ of the treasury department, got on the job yesterday morning and before 11 o'clock last night had Johnson arrested and absolute proof of his guilt. Several counterfeit pieces of silver dollars bearing the date of 1904, together with a mold for making the spurious coin, was found in his possession. About eight one-dollar pieces have been recovered, but it is not known how many were placed in circulation before Johnson was caught. It is not believed he had any accomplices.

SCARCITY OF LABOR IN CITY AND COUNTY

Never in the history of Raleigh and Wake county were day laborers so hard to secure. Cotton pickers who used to get 40 cents a hundred pounds are now receiving 75 cents; street hands who formerly could be secured for 75 cents a day can now secure work at $1.50 a day. One large local corporation has distributed handbills offering $1.50 a day to laborers. In every line of work men are hard to secure. There was so much building in Raleigh this year that the supply of carpenters and other skilled hands was not equal to the demand. Night work has been done in one instance—that of the new Vass building on Fayetteville street.

The average cotton pickers will gather 150 pounds a day, but first-class pickers will gather between 250 and 275 pounds, which at 75 cents a hundred is about $1.85 a

Most men are ambitious to do those they have been done by.
