

WAKE FOREST SPORTS

Outlook For Baseball This Spring Bright

Promising Material Among New Men With All of Last Year's Team Back—Strong Team Expected—Frank Thompson Coach—Other News.

(Special to The Times.)

Wake Forest, N. C., Jan. 23.—

Though basketball occupies the center of attraction, everyone is planning ahead at baseball prospects for the spring, which are indeed brilliant even to the most pessimistic.

With the exception of Brown, third baseman of last year's team, no returning, and there is no doubt that some of the freshmen will win places over their older opponents.

Turner, Ribbeck and Watkins, all of whom have done varsity work during the fall, will resume an old and for catcher. Utley, captain of last year's team, will probably occupy first base, though it is possible that he will be able to pitch.

Two years ago he was easily one of the best in the state, having held the University of North Carolina to one hit in 12 innings. Last spring he hurt his shoulder while vaulting in a track meet, which prevented him from receiving the box. Bettis was played second base last year and made a record for 400's.

Stringfield, who played short last year will probably be unable to play, having had typhoid fever, which has affected his heart. All of last year's pitchers will be candidates for their old positions.

They are Captain Fancette, Campbell and Castello. Fancette played short last year, held a thousand and hit .470. At this early date it is impossible to predict any particular freshman. Each year some men heralded for a certain position on the varsity are selected, and to make this season's team will be made up of freshmen and sophomores to make a position will be made up of freshmen and sophomores.

The material never has been more promising. Billings has a fine record in football, as any freshman can see in years. He is expected to be a star in the line, and to lead the team in rushing.

Parker, who played half of the above named position, is also a strong man. To his right and underwood in the box will be a fine and every. Joyner is said to be an outfielder of worthy ability.

The schedule will be an excellent one. The first game Monday night will be played with A. and M. in Greensboro. Monday, Feb. 12, will be played with Wake Forest in the state that will play with other college. Carolina, Tobacco, Davidson and Guilford will be in the schedule. The trip will probably be taken into Georgia where A. and M. teams will be played.

The track prospects are believed to be very bright. The team will be made up of freshmen and sophomores. The team will be made up of freshmen and sophomores.

On Tuesday morning at Chapel Hill, Prof. N. Y. Gilley, dean of the law department, referred to the 37th anniversary of his arrival as a student at Wake Forest College. He congratulated the general situation here and now as to faculty, equipment and student body.

At the approaching commencement of the University of Pennsylvania, Messrs. T. D. Collins and E. E. White, two B.A. graduates of Wake Forest will receive the M.A. degree, after having done one year's work at that university. J. P. Tucker, a B.A. graduate of last year, will receive his M.A. degree from Yale University, having received full recognition of his work done at Wake Forest.

President Potat has returned from Greenville, S. C., where he made the dedicatory address at the formal opening of the new \$50,000 hall of science. His subject was,

The Touching of Science Under Christian Auspices.

The feature of the forthcoming issue of the college Bulletin will be the department of education of the college with an introductory article on "The Teacher," by Prof. J. H. High-stahl, the head of the department.

Manager Edginger of the Wake Forest Student will be in Raleigh this week carrying with him the copy for the Carle Memorial number of the publication which will be the largest in the history of the magazine.

The contract for the publication of The Howler, the college annual, has been let to the J. P. Stone Co., of Roanoke, Va. The editors are at work on the material for the issue.

Rehearsals are now being held for the presentation of "The Private Secretary," which will be presented sometime this spring for the benefit of the Wake Forest College Hospital.

The supreme court class is having class work from 8 a. m. to 4 p. m., preparatory to for the supreme court examination to be held February 25th.

JOHN AIKEN ARRESTED

Man Who Shot Officer Jernigan of Harnett Under Arrest.

(Special to The Times.)

John Aiken, the man who shot Deputy Sheriff Jernigan several months ago when he was trying to arrest Aiken, was arrested in Petersburg, Va., last night.

Aiken was a fugitive from justice at the time and a capias had been issued for him, and when Jernigan with a posse of citizens surrounded his home Aiken ran out of the back door and fired several shots into the crowd. Jernigan was also through the body but has since recovered. Aiken is wanted

for the murder of Jernigan. Aiken is wanted for the murder of Jernigan. Aiken is wanted for the murder of Jernigan.

Greeting to Cardinal Farley

The upper photograph shows His Eminence Cardinal John Farley, B.S.D., his host to the cheering throng who turned out to greet him on his return to New York on January 17th. The magnificent Cardinal's ring can be seen on the cardinal's finger. Below is a photograph showing the Cardinal embarking from the steamer Beulah, which he boarded at the Battery, New York.

Barren Walls Tell the Story

(Continued From Page One.)

and some of the boys who leaped were also dangerously hurt. The next fire occurred in the summer, when lightning struck the spire of the church. The fire department did a remarkable piece of work and saved the church without damage except the loss of the spire, which was that year replaced. A new dormitory was built near the site of the one burned, and was occupied for some time by the priests and seminarians, but about a year ago the boys were moved into it from the old wooden dormitory, the first building erected, which stood on the north side of the road. The latter building was the one destroyed today.

Admitted it was the post office and a general office of the orphanage, a chapel used by the Sisters who are in charge of the institution, a laundry, etc. There used to be also a printing office, at which the "Magnificent Truth" was printed, but about two months ago the plant was moved to New York City, where the paper is now published. Some of the old dormitory buildings had been shifted about within the last eighteen months so as to give space for a fire-proof building, the foundation of which has been laid, the material being concrete and stone.

In the fire was burned three weeks' laundry and much aid had already been offered. Superintendent Cole, of the Methodist Orphanage, went out to Nazareth today and informed them to come over to the city and secure anything they need and charge it up to the Methodist Orphanage. Many people have offered aid to those who had their belongings swept away by the fire.

Superintendent Stephenson placed the Associated Charities at their disposal, that they would stand behind any bills incurred.

\$81,000,000 TRACTION UNION

Merger of London and Surface Lines Confirmed.

London, Jan. 23.—The official announcement today of the combination of the London Underground Company with the General Omnibus Company fully confirms the outline already cabled.

Edgar Speyer is the subject of a congratulatory editorial in the Daily Mail, which says:

"The magnitude of this master stroke of finance is equalled by the material interest it must evoke in the mind of the Londoner and the visitor to London, whose welfare depends to so marked a degree on the traveling facilities the metropolis affords. It is the combination of the great systems who centric extend all over London and its suburbs. The Underground Electric, controlling companies which carry about 2,000,000 passengers a year, from whom they receive about 22,000,000 in fares, is also to control the London General Omnibus Company, which likewise receives about 22,000,000 a year from 200,000,000 passenger. The total capital of the huge undertaking, when combination is brought about, will be about £16,250,000" (\$81,250,000).

The Difference

Rockefeller can write a few words on paper and make it worth \$5,000—that's capital. The United States can take an ounce and a quarter of gold and stamp upon it an "eagle bird" and make it worth \$20—that's money. A mechanic can take material worth \$5 and make it into watch springs worth \$1,000—that's skill. A merchant can take an article worth 75 cents and sell it for \$1.00—that's business. A woman can purchase a 75c hat, but prefers one that costs \$75—that's foolishness. The man who wrote this ad. can sign his name to a check for \$90,000, but it wouldn't be worth a dime—that's "hard luck." There are men in Raleigh who will tell you that they can frame a picture as well as we can—that's "gull." Everybody whose posted wants the best in the fine art line and trades at Weather's Art Store—that's common sense.
