## TWO BIG NEW BATTLESHIPS

Oklahoma and Nevada Will Be Greatest In the World

Washington, March 29.—The new battleships Oklahoma and Nevada are to be the greatest in the world. Powerful in armor and the only vessels of the kind in the world to carry three fourteen-inch guns in one turret, the ships will represent the best thought of both branches of the service and will mark the culmination of the dreams of shipbuilders.

When the New York and Texas were authorized it was thought the zenith of modern battleship-building had been almost reached, but since the acceptance of the plans for the Oklahoma and Nevada naval authorities now see even greater ships are possible and the novel method of construction and armament will start development along new lines.

Not only will the Oklahoma and Nevada be as speedy as, but they are also designed to give a better account of themselves in all directions in any engagement in which they may participate, than others in the navy.

These latest vessels will be 500 tons heavier than their immediate predecessors, the New York and Texas, their length being over all 583; beam 95 feet 2-8 inches, mean draft of 28 feet 6 inches, on which will be displacement of 27,500 tons. The engines of the two new vessels will differ, the Curtis type being used on the Nevada and the reciprocal engine being used on the Oklahoma. The estimated speed will be 20 1-2 knots.

Naval officials show great interest in the armament of the two vessels, it being declared that their defensive power will have never been equalled. These two vessels will carry greater weight of armor than has been carried, so far as the navy department officials know, and it will be disposed to a much greater advantage. Stability and mobility on a warship are two great essentials, but all vessels must have a completely protected complement of guns. These ideas will be carried out in the Oklahoma and Nevada.

The belt armor is considered by naval officials to be one of the most important sections of a battleship, for it is this that must be relied upon to prevent projectiles from striking a vital blow to a vessel—in the magazines, boiler, or engine rooms. This belt line on the Oklahoma and Nevada will be 17 1-2 feet in width, and at the mean draft will extend 9 feet above to 8 feet 6 inches below the water. This will have the unprecedented thickness of the ship. At its after end the belt armor will be carried at its full depth of 17 1-2 feet to point about thirty feet aft of No. 4 barbette. Here there will be a jag the depth of the belt, decreasing from 17 1-2 feet to 8 1-2 feet, at which depth it will be continued another sixty feet. Transverse bulkheads of the same thickness as the belt will be carried across the ship.

Instead of the side armor being placed horizontally in two strips with continuous horizontal joints just above the water line, as has been the custom in battleship building heretofore, the armor plates on the new battleships will be laid vertically and without a joint at the water line. It is declared this system will remove danger at the ship's most vulnerable point.

Two protective decks will afford

## ONE FLY IN ONE SUMMER PRODUCES FIVE MILLIONS! SWAT, BROTHER, SWAT

A fly crawled out from behind a picture rail in a room in a Raleigh home yesterday and lazily started down the wall.

The man of the house had just finished his newspaper and was blowing rings of smoke from his pipe. He caught sight of the slowly descending fly and in a moment assumed an attitude of alertness. Instinctively he rolled his newspaper into a club. Down came the fly! Up rose the man. Two steps across the room an upraised arm and SWAT!—the man of the house had smashed the insect and incidentally had become a PUBLIC BENEFACTOR. With a single blow he had cut short next summer's fly crop over 5,000,000,000.

How? Well, let's see what Dr. L. O. Howard, the recognized fly expert, says about it in his book, "The House Fly—Disease Carrier."

Let us estimate—on the basis of the survival of all eggs and all individual flies—upon plenty of places for the insect to develop and for the larvae to feed, upon an average of ten days to a generation in midsummer (this period increasing in the autumn and being greater also in the springtime)—let us start then on April 15 with a single overwintering fly which on that day lays 120 eggs and we will have the following table.

April 15—The overwintering female fly lays 120 eggs.  
May 1—120 adults issue, of which 60 are females.  
May 10—60 females lay 120 eggs each. 3,600 are females.  
June 8—3,600 females lay 120 eggs each.

excellent protection against plunging fire and against fragments of shells which may be exploded in passing through the ship's thin plating in the wake of the gun deck.

The armament of the Oklahoma and Nevada will consist of ten fourteen-inch guns carried in four turrets. On the fore-castle deck will be first a three-gun turret, then a two-gun turret and astern of that a three-gun turret. This arrangement, it is declared at the navy department, will give a concentration of fire much superior to that of New York and Texas, which will be mounted with five two-gun-turrets when completed.

The fourteen-inch, 45-calibre gun is far more powerful weapon than the 45-calibre twelve-inch gun mounted on the Delaware and the North Dakota. The muzzle energy of the twelve-inch piece is about 49,000 foot tons, whereas the fourteen-inch piece is about 66,000-foot tons. Its shell weighs 1,400 pounds, as compared with the 870-pound shell of the twelve-inch, carries a much larger bursting charge of high explosives and therefore will be more destructive.

The Fall River and United States shipbuilding companies, which have the contracts for the construction of the vessels, are expected to begin work on them within a few weeks.

The fly-swarming season is almost here. Dr. L. O. Howard, the fly expert, tells in his book, "The House Fly—Disease Carrier," that one fly, laying 120 eggs on April 15, produces 5,000,000,000 flies by September 15. So swat, brother, swat.

## SWARTHMORE VICTORS OVER CAROLINA

(Special to The Times.)

Chapel Hill, March 29.—Yesterday afternoon Swarthmore won the second game played with the University by the score of three to two. The game was interesting and exciting throughout, both teams were in fine shape and it was an evenly matched game all the way through. Durborow was the star of the visitors, while Irby, Hanes and Page starred for Carolina. Though Woods pitched for Carolina in the game Wednesday he was in good form for six innings in a second game. He was relieved by Lanier in the sixth, who pitched a good game. The line-ups were as follows:

Swarthmore.	A. B. R. H. P. O. A. E.
Durborow, c. f.	3 2 3 3 0 0
Baker, s. s.	4 0 0 3 5 1
G. Tarble, c.	4 0 1 6 0 0
Gieg, 1b.	4 0 0 8 1 0
Lucas, r. f.	4 1 0 1 1 2
Weaver, 2b.	2 0 0 3 2 0
Gilchrist, 3b.	4 0 2 1 1 2
Schaeffer, l. f.	4 0 2 0 0
Griest, p.	3 0 0 0 2 0
Tarble, p.	1 0 0 0 0 0
Totals	33 3 6 27 12 5

University.	A. B. R. H. P. O. A. E.
Hanes, r. f.	4 0 0 1 0 0
Edwards, 3b.	4 0 0 1 2 1
Irby, s. s.	5 0 1 0 4 3
Swink, c.	3 0 0 7 1 0
Page, c. f.	5 0 0 3 0 0
Young, l. f.	2 0 0 5 0 1
Whitaker, 1b.	3 2 0 11 0 0
Balley, 2b.	2 0 0 0 1 0
Wood, p.	2 1 0 0 1 0
Lanier, p.	1 0 0 0 1 0
*Leak	1 0 1 0 0 0
Totals	32 2 2 28 10 5

Score by innings: R. H. E.  
Swarthmore, 100 011 000—3 6 5  
Carolina, 001 001 000—2 2 5

Summary—Two base hits, Durborow 1. Three base hits, G. Tarble 1. Stolen bases, Durborow, 2; Gilchrist, 1; Baker, 1; Swink, 1. Base on balls, Woods, 2; Griest, 4; Tarble, 2. Struck out, Griest, 2; Tarble, 2; Woods, 5; Lanier, 2. Time of game, 1:53. Umpires—Schumaker and O'Halloran.

## YOUR FRECKLES

Need Attention in March or Face Will Stay Covered.

Now is the time to take special care of the complexion if you wish it to look well the rest of the year. The March winds bring out freckles that will stay all summer unless removed now with othine—double strength.

This prescription for the cure of freckles is the discovery of an eminent skin specialist, and is so uniformly successful that it is sold by Henry T. Hicks Co., under guarantee to refund the money if it fails. Get an ounce of othine—double strength, and even the first night's application will show a wonderful improvement, some of the smaller freckles even vanishing entirely.

## Electric Bitters

Made a New Man of Him. "I was suffering from pain in my stomach, head and back," writes H. T. Alston, Raleigh, N. C., "and my liver and kidneys did not work right, but four bottles of Electric Bitters made me feel like a new man." PRICE 50 CTS. AT ALL DRUG STORES.

PRINCESS VICTORIA-LOUISE

Youngest and favorite daughter of the German emperor, attracted more interest than her father during the Kaiser's recent visit to King Franz-Josef in Vienna. The unusual attention accorded the young Princess is due to the fact that there have been frequent rumors of her being the empress of Austria some time, because of the general belief that she will be the bride of Arch Duke Karl, who is in line for the throne.

Every woman is sorry for some other woman because of what her husband told her about the other woman's husband.

## RESTORE GRAY HAIR TO NATURAL COLOR

By Common Garden Sage a Simple Remedy for Dandruff, Falling, Faded, Gray Hair.

The old idea of using Sage for darkening the hair is again coming in vogue. Our grandmothers had dark, glossy hair at seventy-five, while our mothers are gray before they are fifty. Our grandmothers kept their hair soft and glossy with a "Sage Tea" which also restored the natural color.

The beauty of the hair depends more on its rich, even shading than anything else. Don't have dry, harsh faded hair, when a simple, harmless remedy will bring back the color in a few days; and don't be tormented with dandruff, itching scalp and loose, falling hairs. Wyeth's Sage and Sulphur Hair Remedy will quickly correct these troubles, and give color, strength and beauty to your hair.

Special Agent: H. T. Hicks Co., 101 Fayetteville Street.

## Easter Hints FROM Hinton

Easter Sunday  
April 7th

Place your order today for that **EASTER SUIT** If you care to be in the "Swim Easter Sunday."
