THOMAS COBBS, Ex'or of C. JETER, dec'd.

UNITED STATES OF AMERICA,

North-Carolina District. Circuit Court of the U. States, 5th Circuit. In Equity—May Term, 1822. Archibald Fleming, (of London,) Adversus John Hogg and John Eccles, surviving Executors of Robert Adam, deceased; John W. Wright and John Huske, Executors of John Winslow, deceased; James McLeran, John McLeran & Angus Taylor, Executors of Duncan McLeran, deceased; Thomas Henderson, Adm'r of Samuel Goodwin, deceased; John A. Cameron, John A. Cameron, Guardian of Mary Cameron (infant) William Moffat and Margaret his wife, and John R. Adam.

IT appearing to the satisfaction of the Court that John R. Adam resides without the limits of this State, and he being a party defendant to the bill of complaint filed in this case: It is ordered, that publication be made in the Raleigh Register for twelve weeks for the said John R. Adam to appear at the next term of this Honorable Court, to be holden in the City of Raleigh on the 12th day of November next, and there to plead, answer or demur to the said bill, or the same will be taken pro confesso against him, and heard ex-parte.

Raleigh Register.

FRIDAY, MAY 24, 1822.

The Hopper-Boy.—Gen. R. G. Harper, who is Counsel for the Representatives of the late Oliver Evans, informs the public that a new hearing is to be had on the patent-right question; and until this takes place, the question must be considered as undecided.

The Western Carolinian of the 30th ult. acknowledges a mistake in relation to Wood, convicted of manslaughter, having taken the oath of insolvency. Application was made to Court for this purpose, but the Judge rejected it. It was another prisoner who took that oath.

There is still an active business doing in our Tobacco Market. (says the last Milton Gazette) the price of which is well sustained, and considerable competition amongst the purchasers. The quantity taken will be greater than that of any former period since the first season of opening the market. There is great preparations among the planters for the next crop; an abundance of plants and every prospect of its being a very large crop.

A hoghead of tobacco was sold in Richmond a few days past, for \$15 a hundred weight. This is the highest price this season, and what seems singular enough, the tobacco was made in the county of Louisa.

The salary of the Mayor of the city of Boston is established at \$2500.

The late State Election in Rhode-Island resulted in the re-election of William C. Gibbs for Governor, and Caleb Earle for Lieut. Governor of the State. The Legislature was organized a few days after the election, and Elisha Mathewson was chosen Speaker of the House of Representatives by a majority of three votes over Gen. Greene.

The Legislature of the State of Connecticut met at New-Haven on the 1st inst. and the House of Representatives was organized by the appointment of Seth Beers as Speaker. The message of Gov. Wolcott, delivered on the following day, is of great length, and contains many valuable suggestions.

Mr. G. Canning is appointed governor general of Bengal, in the place of the Marquis of Hastings.

Cape-Hatteras Light.—The Light-house at this station has not been lighted since the 18th inst. and will cease to be lighted until further notice.

Court Martial.—The court martial lately sitting at Boston, suspended Capt. John Shaw for six months, a sentence which has since been approved by the President of the United States.

Congress.—The following is given as the component parts of the present House of Representatives of the United States: lawyers, 97; farmers and planters, 59; physicians, 15; merchants, 13; manufacturers, 5; clergyman, 1.

A Woolen Manufactory, on a very large scale, is about to be erected at the Falls of the Walkill, near Newburgh, N. Y. The site is said to be equal to that at the Falls of the Passaic, in New-Jersey.

The Liverpool papers mention the death of a man said to weigh 1300 lbs! who was lowered into his grave with a windlass!

In Boston an auctioneer has been indicted and found guilty of selling a composition watch of little worth, falsely pretending that it was of great value, and belonging to a Sea Captain, in jail, who was in great distress, and for whose benefit it was sold—and thereby intentionally cheating and defrauding the purchaser. The Court sentenced the defendant to pay a fine of forty dollars and costs of prosecution.

The distance from the mouth of the Arkansas River to Little Rock, the seat of government of Arkansas, is computed at 800 miles; and the distance thence to the Cherokee Mission-

ary establishment on the Arkansas at 150 miles. Recently, a steam-boat ascended the river the whole distance from the Mississippi River to within 12 miles of the Missionary Establishment. What a country is this, where there are rivers navigable for 400 miles, which we are just beginning to hear of.

Extract of a letter from an American, dated Madrid, March 25, 1822.

"You are not ignorant of the disadvantages our commerce to this country has labored under for so many years past, nor of the ineffectual attempts made by our minister to remedy them. Whether this government has become more disposed to favor us, or whether the exertions of our present minister have been more successful than those of his predecessors, I am not able to say; but, the fact is, that the late changes decreed by the Cortes in the revenue system are more favorable to the commerce of the United States, than that of any other nation. For example, the tonnage duty of one dollar per ton, before paid exclusively by vessels of the U. States, and which, by the way, owing to the difference between Spanish and American measurement, is nearly one-third less than what Spanish vessels pay in our ports, while those of other nations paid a very trifling one, has been made general to vessels of all nations. The duties on codfish and on staves, the principal articles of export from our country to this, have been reduced on the former from three dollars twenty cents per quintal, to one dollar eighty-seven and a half cents, and on the latter from ten dollars per one thousand, which was paid also on barrel staves, to four dollars per one thousand on pipe, and to two dollars only on half pipe and barrel staves."—Even. Post.

By the direction of government, Capt. Perry, of the U. S. schr Spark, took possession of Key West, an Island on the coast of East Florida, and planted the American standard there, on the 25th of March, under a salute from the Spark. The Island is seven miles long and two wide. It contains some excellent land, and an extensive salt pond, capable of producing 3 or 400,000 bushels of salt per annum, is eligibly situated for supplying vessels with that coast with provisions, and is remarkably healthy. The harbor is equal to any in the Gulph of Mexico, both for safety and depth of water, and may become a rendezvous for our navy employed in those seas. Port Rodgers is the new American name of the port, and the Island now called Thompson's Island. A settlement on it has been lately formed by a company of enterprising gentlemen from Mobile.

New York, May 13.

Melancholy accident.—Yesterday morning, while the Rev. Mr. Chase was engaged in baptising some persons in the North River, at the first dock south of the State Prison, a melancholy accident occurred. There was a temporary building, occupied by a stone cutter, on the margin of the wharf, which afforded a favorable place to overlook the services going on; and great numbers of persons had ascended that building, while hundreds took their stations on the edge of the wharf immediately below it. The weight upon the roof crushed the building towards the river, and so sudden was its fall that great numbers were forced into the water, and many were struck by the falling timbers. One man had his leg badly broken, and was otherwise much bruised; another man had his breast shockingly injured, and four ladies were severely wounded. In addition to the above, a great number of persons of both sexes received slight wounds.

Dr. Farr, a respectable physician in London, has lately published a small volume on the Nature and Cure of Cancers, particularly in the stage denominated Occult; in which he states, that he has used, with great success, in that dreadful disease, the Fucus Helminthocorton, or Corsican Sea Moss, and so confident is he of the efficacy of his plan of treatment, that he expresses himself in the following language:

"I am well persuaded there is no more malignancy in cancerous than other tumours, if they are treated in a proper manner."

His work is illustrated with a colored plate of the plant.

Scientific.—A medical correspondent, of great respectability, says he has perused, with much pleasure, the last number of the American Medical Recorder, conducted by Doctors John Eberle, of Philadelphia, and Henry W. Ducachet, of New-York.

This highly interesting periodical journal has rapidly grown, from a comparatively insignificant beginning, into a degree of importance, which fully entitles it to the attention of the medical profession throughout our country.

Our correspondent wishes particularly to notice the ability which is displayed in the several essays on small-pox, the varioloid, and vaccine diseases, by Drs. Jameson and Macaulay, of Baltimore, Dr. Mitchell, of Philadelphia, and Dr. Davis, of Columbia, S. C. The result of these inquiries and investigations, is perfectly satisfactory, and most "conclusive in favor of the efficacy of vaccination." It is true, the reputation of this invaluable discovery has heretofore suffered; but this is ascribed entirely to the loose and indiscriminate manner with which the vaccination has been conducted, by every class of people throughout this country. The marks of the pure and genuine vaccine pock are very peculiar, and deserve the most vigilant and discriminating attention; besides which, the simultaneous existence of cutaneous diseases with the vaccine pock, has a tendency to vitiate the virus of the latter, and render it unfit for communicating the true kine pock. Unless, therefore, the practice of vaccination is taken out of the hands of ignorant pretenders, and placed entirely under the direction of physicians acquainted with the nature of the disease, the reputation of this important discovery cannot be sustained, and the full advantages which ought to be derived from it, cannot be enjoyed.

Mr. Bordy, in his treatise on Husbandry, warmly recommends Rye as an excellent Hay, and as generally a heavy crop. Rye has certainly one great advantage, that it may be raised on high, dry, or light soils, and if cut when in the milk, must be excellent Hay—another advantage is, that when the hay is taken off, by one deep ploughing you cover in the stubble, which becomes mature, and you may sow peas or cotton seed to be ploughed in at the fall, for wheat; or you may take off a crop of Irish potatoes, of the keeping kinds. Rye is also an excellent winter pasture; and it is said, will continue to the winter following if cut down so as to prevent its shooting.

As the extension of cotton crops, will shorten those of grain, would it not be advisable for farmers to turn their attention to those crops which require least labour? Rye and Irish potatoes are of this number—should those be neglected, and the rage for cultivating Cotton continue, or increase, the consequence must be a short supply of articles of food.

Potatoes are best when planted in June; by which their bulbing state avoids the too dry season of Midsummer.

MARRIED.

At Thomas P. Devereux's, Esq. in this place, by the Rev. Wm. Hooper, of Fayetteville, Gavin Hogg, Esq. of Windsor, Berrie county, to Miss Ann B. Johnson, late of Stratford, Connecticut.

At Milton, on the 2d inst. Mr. Martin P. Huntington, to Miss S. Holder, daughter of Maj. James Holder, all of that town.

At Sparta, Geo. on the 1st inst. the Hon. Judge Tait, of Alabama, formerly Senator from the State of Georgia, to Mrs. Sarah Griffin.

At Boston, lately, Professor Edward Everett, of Harvard University, to Miss Charlotte Gray Brooks, daughter of Peter C. Brooks, Esq. of that city.

DIED.

Of a pulmonary affection, in Greensborough, N. C. on the 13th inst. at the tavern of Mr. Jacob Hubbard, Mr. Benjamin Riggan, of Warren county. It may be some consolation to his friends to learn that throughout his illness he manifested much christian fortitude, and seemed entirely resigned to the will of his maker, and that he died perfectly collected.

At his residence in Cumberland county, on the 4th inst. Mr. Arch'd. Maclean, a native of Scotland, but from an early period of his life, a citizen of this State.—He was in his 82d year.

In Cabarrus county, on the 28th inst. Mr. Robert Cochran, in the 83d year of his age. He was a respectable member of society, and a ruling elder in the Seceder Church.

In Richmond, Va. on Wednesday morning the 15th inst. John Wood, Esq. a native of Scotland, but for more than twenty years a resident of the United States. He was most celebrated as a profound mathematician—but he was also known for his travels in Switzerland, and certain political tracts which he had written in America. For the last two or three years, he had devoted himself to a map of the State of Virginia, which he had nearly completed.

The immortal Stark is no more! He surrendered his mighty soul to God who gave it, Wednesday, May 8, aged 93 years, 8 months and 24 days. His last illness was short, but extremely distressing.—Fourteen days previous to his death, he sustained, as was supposed, a paralytic shock, which discovered itself in choking and inability to swallow while eating; after this he ate no more; and during his remaining time, he was speechless, tho' it was apparent to his watchful friends and relations who stood around him, that he retained his senses to the last. Until the last attack, he had ever been able to walk about the house, and in pleasant weather out of doors. Gen. Stark's military character is too well known to be detailed upon here. He commenced his career as a soldier in the seven years war, and was the last surviving General Officer of the Revolution.
