RALDIGH REGISTER MONDAY, JUNE 7, 1830.

Cape Fear. - The Board for Internal Improvements having postponed their vi sit to Currituck Inlet, until they can obtain the services of a skilful Civil/Engineer to make an inspection of it, such Members as were present concluded to visit the Cape, Fear River, in order to take personal cognizance of the Improvements which they understood had recently been made on it between Haywood and Averasborough-a part of the River which had heretofore presented almost insuperable difficulties to navigation. For this purpose, his Excellency Governor Owen, Mr. Swain, one of the Members of the Board, and the Secretary, left the City on Monday last for Haywood, where they expected to meet Col. Cadw. Jones, another Member of the Board. In this they were disappointed; but they met Mr. Mebane, the Superintendant of the Works on the River and the President of the Cape Fear Navigation Company. Mr. Boylan and Mr. Mendenhall, Directors of the Company, Professor Mitchell, of our University, and Mr. Keene, the Principal Operator on the River. On Tuesday morning, these Gentlemen proceeded down the River in one of the Company's boats, accompanied by several of the neighboring planters ; and there being no obstruction in the River for ten miles, they had a pleasant passage to the dam across it near Buckhorn Falls. The found to need some inconsiderable re-Keene-had some fears that it would not sufficient. be found sufficient to carry the boat through the Locks ; but the event proved his fears groundless, as the boat passed them without difficulty. And when it a-

own boat and his own hands, time and a section is not to be extended beyond the limits | conducted by a General Urdenata. It is little experience will show. We should think, that persons making a business of boating, would be become better acquainted with every part of the River than others. and would not, of course, be so liable to accidents, as hands who had but little pably contrary to the genius of the Conknowledge of such business.

It is expected that Mr. Keene will the present Summer. If so, we hope something will be done by our next Legislature to engage his services on some other of our Rivers. We have no longer any doubt that the Falls in Neuse River could readily be overcome by Slutcing, and at a comparatively small expence. And we believe that the falls in all our Rivers could be made navigable in the same way.

We have pleasure in stating to our readers, that Congress has appropriated at its late session, \$25,000 more for the dam underwent examination, and was completion of the works on Cape Fear below Wilmington, and procuring a Steam pairs. The boat then entered an outlet Engine of greater power than that a from the River which leads to the Buck- present employed in the Dredging Mahorn Canal. The River being low, Mr. chine, which Capt. cially with the zeal and intelligence with and suppose that, from its phraseology, if which the Work on the River had been the President shall at any time hereafter, conducted, it appeared to be the general during his Presidency.sign these bills, they sentiment of all present, and especially will become laws. Such was certainly of those who resided on the River, and were not the intention of the Constitution ; of course the best judges, that nothing short of a correct experimental acquaintance with business of this kind, connected with great personal industry, could have effected so wonderful a change in the River; and we believe, that too much praise cannot be bestowed on Mr. Mebane as the Superintendent of the Works, and on Mr. Keene as the Principal Operator. The Members of the Board for Internal Improvements, and the Members of the Cause Fear Navigation Company, though it was understood there was little or no difficulty in the navigation below Averasborough, continued their route on Thursday morning in the boat to Fayetteville, and arrived there in safety that evening. As soon as it shall be generally known that there is a good navigation opened between Haywood and Fayetteville, there is no doubt that the planters within a reasonable distance from the River, will avail themselves of this easy mode of sending their crops to market. Whether the boating will be best conducted by persons who will make a business of it, or every planter will send down the River his
