the President confirms and justifies his Since our last, a number of important veto on the bills of last session, though he expresses himself in favor of a direct apfectly constitutional, but recommends that it be so modified as to correct abuses and obviate injustice. It will be seen also, that he takes pretty much the same ground in relation to the Bank of the United States, that he did in his first Message, which had the effect of depressing the price of stock of the United States' Bank from \$130 to \$123 per share. The proceedings in the House of Representatives will arrest the panic!

Iu the House of Representatives, Mr. Stevenson being absent, hat body adjourned to next day, when he appeared and took his seat.

No business of consequence has yet been done in either house, the members having yet scarcely made themselves thoroughly conversant with the President's message.

On the question to refer that part of the message relating to the U. States Bank, to the same committee that reported against it at the last session, a short debate was elicited, which went to shew conclusively, that the sense of the House of Representatives is decidedly against any present action upon the Executive recommendation. It was eventually referred to the same committee, who will doubtless again make a report similar to the last. What ever may be the ultimate fate of the question of re-chartering the present Bank, appearances are as decisive now, as at last session, against the establishment of a Government Bank, on the principles suggested in the message.
