From Budger's Weekly Messenger. The following sweet and touching lines were written by the Hon Grones Tucken, of Virginia, on his being solicited to know why he had ceased to court the Poetic Muse! They are full of feeling, simplicity, and truth; and cannot but find their way to the heart. In them we discover an elevation of spirit that can look back on the changes of time with a dignified complacency, unmingled with regret, and a lively christian hope, which points to the future, and anticipates the joys of heaven. It was not from the rich treasures of his highly cultivated mind, that this venerable man derived this desirable temper, but from oleut injunctions of the " Pather of Peace." Such a state of mind, alone, is happiness , to all, it is desirable, and, happily, to all attains-

RELIGION.

The following is worthy to be written in letters of gold :-

The hand that holds her chalice should be

The priest of her high temple, spotless as The vestments of her ministry. Proud rank Only degrades, wealth but impoverishes, Ornaments disfigure her. I would have Her pure, unpensioned, unstipendiary. She should rob the earth of nought but sorrow An arch of promise, her extremities Should rest on the horizon, and her span Embrace the Universe.

> From the Episcopal Watchman, SONNET.

I saw a sweet babe parting with its breath-Its cheek was pillowed on the mother's breas It struggled faintly -and the victor Death, His icy fingers on the flower had prest.

It was too fair a thing to linger here, Too fiail a blossom for our atmosphere,

And e'er grief frowned upon the gentle child Or its pure heart an anxious fear had known, An angel throng had marked it for their own, And bore to heaven its spirit undefiled.

Its course was lovely-and so passing fair, That ceauty would not rob its cheek of bloom, But roses lingered with the files there, Nor fled as passed the cherub to the tomb.

to Georgetown, South Carolina. This Plantation contains at least 200 acres of tide Swamp, 160 of which are banked and ditched, and now under cultivation.

In fertility, I don't know that it is superior to any other Rice plantation in this State.

In the first place, it is situated precisely in that pitch of the tide, which exempts it from the effects of the salt water and treshes; and it is losses by storms have been very inconsiderable, which renders a crop certain let what will hap.

creeks, in such a manner, that it can be harvested in one-third less time, than it would otherwise

There are about 900 acres of pine land, which is poor and will remain so forever, except some 50 or 60 acres perbaps, which has a clay foundation-the rest would require manure every year, and with such lands I rever meddle. It is well watered, having many good springs,

found in the lower part of the country. Improvements .- On the premises are a com-

A Barn 110 feet long and 40 feet wide, two stories high, in which is a Thrashing and other Machines. Also, an Overseer's House & Kitchen-all which buildings are of brick, put up in the most substantial manner. There is another Barn, built of wood, directly at the river, from whence the rice can be conveniently thrown into a flat or vessel; and any vessel that can come over the bar can come to the barn. I have endeavored to render as permanent as

possible, all the repairs and improvements I have made. The buildings are all in perfect order. The plantation highly improved and capable of much greater improvement.

I think it is upon the whole, the handsomest

The improvements were made with the expectation, that it would be my chief residence all my life; but the state of my health requires that I should reside more permanently in a high and dry part of the country.

The mill has been down for some time, but the foundation is perfect, and the mill dam is entire; so that it can be erected again at a very trifling expense. In ad-Cypress above and below the mill.

A Pounding Mill and Thrashing Machine can be erected with great advantage. A great deal of the high land may be very profitably cultivated; and a part of it may be converted into a valuable brick yard.

It is so situated as to admit of its being divided nto two fine settlements of equal value and similar advantages. The advantage of the pond to the rice-fields, is, that when the tides are short or the water brackish, they can be supplied with water.

The soil of the tide swamp is of the first quality, elegantly situated for cultivation, and I am informed not a creek in it, except the one on
