FOR THE REGISTER. MODERN IMPROVEMENTS.

When the Almighty fiat spake this earth nto being, it stamped progression in every feature, both of the mental and material world. However skeptics may doubt, and credulity wonder, ONWARD is, and will be our motto, until we reach the perfectibility of our primitive creation. From the fall onward, there has been a gradual approximation to this desired state ; and the recent developements of Phrenology, Animal Magnatisin, & Electro-Magnetic power, evince that we have nearly arrived at the acme of our wishes, Our progenitor, ADAM, was but a pigmy in intellect; a mere name; of birds and cattle, and now eclipsed by the puny prattler of an infant school. Tubal-Cain, and the thunder-bolt forger of Jupiter, may have been tolerable blacksmiths : yet they knew nothing of machinery, or steam engines, and could now be taught by the initiated apprentice of a modern machinist. How inferior Noah's ark, to a Baltimore clipper, or a Hudson steamer, capable of navigating from Arrarat to the Rocky Mountains, in a week? Had that primitive navigator enjoyed the light of of glory, fortified by a sub-treasury sysmodern reform, he never would have known that " wine is a mocker, and strong drink fection of experiments, which our vast reraging"; te-totalism would have saved him the disgrace of his Bacchanalian revel,

and he have left on record an unfailing argument in favor of total abstinence. Nimrod, as the founder of Babylon, and a mighty empire, deserves our credit. But what readers will be gratified to know where the competition with that of Davy Crockett ; dence were born, and when they died, so Just Received and for Sale, than the former could kill in an Aute-dilu- liberty of transmitting the enclosed, which Tierces best Rotten PLASTER PARIS, vian age; and whose dog would scarcely you can publish if you deem it of sufficient for manure. All who want rich land will have barked at the puny animals of that an- importance. Their occupations and profesauthenticated, within the time prescribed by law, or do well to call on the subscriber for this excellent cient hunter's game ground. Sampson by mere sions have also been noticed. manure, and apply it on their Land, as rich land physical force, conquered and flayed a lion, but Van Amburgh, by the moral power of mind, low for Cash. Call three doors South of Market rally bears off (not the gates of Gaza) but the wild tiger of the desert. The music of Orpheus' lyre, which moved the rivers, mountains and forests to listen to his song, and brought back from Pluto his better half, is now far outrivalled by Paganini, with a single cat-gut, and whose tones as far ex. FROM BLACKWOOD. RAIL ROADS AND STEAM BOATS.

NO.19.

It might be a curious speculation to injuire into the probable effects of the rail-Benjamin Franklin, born in Boston, Jan. road system on mankind. Certainly not system ever became so popular, and so suildenly and so widely popular. France has George Morton, born in Ridley, Dela- began to fling out those gigantic. arms of Belgium exults in the commencement of

the Continent. The transit from Ostend

James Smith, born between the years to the Rhine will, in the course of a year or two, be an affair of a couple of hours.---Germany is shaking off her sleep ; her

Hartz to the Tyrol, huge men, with anterail roads from her capital to France, to question of her politicians being, whether she thus invites invasion, or promotes defence. But politicians are blockheads on all matters of common 'sense ; and of all blockheads, the German politician is the most profound, headstrong and helpless. The merchant, the traveller, and the tinker know better things. The Steam Engine, in its effective state, is but little more than half a century old, for its invention, in the time of Charles II., left it for upwards of half a century little more than a toy. In half a century more, its present perfection may be looked upon as little else than that of an ingenious plaything. It is scarcely ten years since the Steamboat ventured to William Paca, born in Harford County, sea. Thirty years ago, the late Lord Stanhope was laughed at by all London for his attempt to swim the Steamboat from Thomas Stone, born in Charles County, London Bridge to Greenwich. It now dashes from the Tower to Constantinople ; or shoots down to the Red Sea, fights the monsoon on its own ground ; sweeps to Bombay, Ceylon, and Bengal, and astonishes the Mogul and the Emperor of China, the same morning, with the month's newspaper from London. The railway, in its present power, is not ten years old, yet is already spreading, not merely over Europe, but over the vast savanahs of the New World. What will all this come to in the next fifty years? What must be the effects of this gigantic stride over the ways of this world! What the mighty influence of that mutual communication which, even in its feeblest state, has been in every age the grand instrument of civilization ! Throw down the smallest barrier between two nations. and from that hour both become more civilized. Open the close shut coast of China or Japan to mankind, and from that hour the condition of the people will be in progress of improvement. The barbarian and the despot hate the stranger. Yet, for the fullest civilization, freedom, and enjoyment of which earth is capable, the one nation with nation, and man with man .-The European passion for the rail road is certainly one of the most singular as it is one of the most cheering characteristics of the age. Like all instruments of national power, it may be made an instrument of William Hooper, a native of Boston, born national evil. It may give additional strength to the tyrannical, accumulate force against the weak, pour resistless in-Joseph Hewes, born near Kingston, New vasion against the unprepared, and smito ruin. But its faculties are made for peace, John Penn, a native of Caroline County, its tendency to make nations feel the Virginia; born May 17th 1741; died in value of peace; and unless some other magnificent invention shall come to supersede its use, and obliterate the memory of its services, we cannot suffer ourselves to doubt that the whole system which is now in the course of adoption with such ardor throughout Europe, will yet be acknowledged as having given the mightiest propulsion to the general improvement of mankind.
