## LUNATIC ASYLUM.

tion in this county for signatures, Is not the subject of sufficient importance to elicit similar movements in other counties? Hillsboro' Recorder.

TO THE HONORABLE THE GENERAL

ASSEVELT OF NORTH CAROLINA : county, moved by the unanimous recom- formly been the consequence. mendation of the Justices, at the August Court for the county aforesaid, and by the honorable body will institute proper measettled convictions of our own minds as to sures for establishing an Asylum within the permanence to the party in power; at the the propriety of the measure, would ap- State, on a scale commensurate with its proach your honorable body as petitioners wants. Such an institution is not of secin favor of the erection of a Lunatic Asylum | tional, but of general interest, and it conin the State of North Carolina.

family, which, beyond all others, is afflicted in a manner most to be deplored, and whose situation at the same time is least susceptible of alleviation from individual exertion. Your petitioners will abstain, therefore, from such a course, and confine themselves to a very few observations on the

There is no calamity to which human nature is exposed, so deplorable in its character and consequences, as that which reduces man to the pitiable condition of the lunatic. Deprived of reason, he is shut out from all the sources of moral enjoyment, and is dead to every purpose of usefulness; with passions unrestrained by the influences of intellect, he is at once an object of the deepest distress to relatives and friends, and of alarm to all within his reach; a prey to the extravagant fancies of a disordered brain, he finds no comfort from within, and from without universal avoidance. A condition so hopeless, so terrible, and so utterly wretched, must excite the sympathy, and should enlist in its behalf the beneficent exertion of every feeling heart. In other countries and in other States that sympathy and that exertion have had their influence, and much has been done by public authority for its alleviation; but in North Carolina nothing, literally nothing! Here the lunauc. without the aid of medical treatment and approved scientific methods of relief, without security even against doing or receiving harm, is left to wear out a wretched existence in hopeless misery. If he has property to support him, he is, nevertheless, a source of constant and painful anxiety to his friends; a perpetual watch must be kept over him, and the household of which he is a member, is harrassed with alternate hopes and fears and ceaseless vigils, till exhausted by the incessant demands upon its patient indulgence it is forced to adopt a rigorous and often times unadvisable course of treatment towards the unconscious offender. As under happy eircumstances the moral feeling is the source of our greatest enjoyment, so under those of the opposite character it is the source of our deepest distress. The misery inflicted by the constant presence of a deranged son or daughter, or brother or sister, the pain of witnessing daily a spectacle so revolting, must keep the feelings perpetually on the rack, and banish the last vestige of happiness from the domicile of the unfortunate family whose lot it is to have within its bosom a maniacal relative. The hapless condition of such families, no less than that of the lunatics themselves, it seems to your petitioners, claims the compassionate consideration of your honorable body, and calls for the measure of relie! which an Asylum would afford.

With regard to that portion of insane persons in whose condition a destitution of property is superadded to a destitution of reason, their lot is, if possible, still more melancholy and more deserving the favorable consideration of your honorable body. For him there is no care, no protection, no comfort, but such as the inadequate means of the poor house supply; no lesser restraints than chains and a dungeon. Debarred of exercise, of the very air and light of heaven so necessary to that state of health which alone can afford the slightest prospect of cure, without crime and without fault, (for neither can be imputed to the maniac.) day after day and year after year, he drags out a wretched existence in the loathsome atmosphere of a dungeor. Your petitioners would represent that this is no fancy sketch of human misery; occurrences within the limits of their own county show its reality, and facts identical and of daily observation have forced this subject upon their consideration. There are at this moment three persons of this description confined at the poorhouse of Orange County, two of whom, after a long and close confinement in the dungeons of the common jail, have lately been removed to rooms prepared for their reception by the wardens of the poor. Besides these, there are others in the county, whose cases are less violent, but who are nevertheless fit subjects for a mad house. Your petitioners are not prepared to state the wants of humanity it is to be hoped that they are population, they are as great, the aggregate large expenditure for its relief.

An Important Discovery-The Teeth.

Waldie, of Philadelphia, notices a discovery of no little importance to such as are troubled with bad teeth. He says:

"Some time since, Doctor Caldwell, now a practising dentist at No. 68 South Sixth street, had a favorite horse which had become incapable of eating his oats, and on investigation a carious tooth indicated the banks as fiscal agents, except by the emdifficulty to result probably from tooth-ache. Extraction was the remedy of course; -the poor horse was tripped up by tving his feet together as custom prescribes, his gum was lanced as we poor humanities have too often witnessed, and a pair of pinchers were applied, as we have also experienced; even a mallet and chisel failed of their effect.-The tooth was intractable; no effort would withdraw it from its socket. The gum tumefied—and on examining it carefully, the doctor perceived a ligament at the neck of only once to the subject, but in another part the tooth, and without much thinking of the of the same report, by way of showing his effect he cut it; the tooth immediately fell out, or was extricated with a slight effort of the thumb and finger.

"This led the operator to reflection, and the hint was obtained which confers upon suffering humanity a benefit, which may be esteemed by the sufferer, second only to the discoveries of Jenner, or the circulation of the blood! Subsequent experiments have fully proven that the human teeth are also retained so powerfully in their sockets by a ligament, and it is the breaking of this which requires so much manual force; and this, when cut, which gives not so much pain as lancing the gums, loosens the tooth, and it may immediately be extracted without pain with the fingers! A physician of our acquaintance, whose name we are at liberty to mention if requested, has had the operation of extracting a large molar, treble fanged tooth in this way without pain, and so gratified was he by the fact, that he investigated the anatomy of the parts and extracted all the teeth of a dead subject in the same way, and with no more difficulty than above related. He is a witness not to be impeached, who, with many others, have already been benefited by this great anato-

# DO NOT BE AVARICIOUS.

It is astonishing to contemplate the evi and dangerous results arising from a spirit of avarice, and we see these dangers amplified in the case of Benjamin Rathbun, sent to the State Prison for the crime of forgery. The West had no citizen more enterprising, but it was a rash, injudicious, inexpedient enterprise, which in starving to grasp too much lost every thing. Mr. Rathbun was ready for any speculation-buy lots-build houses-establish steam boats-run a line currency, in December. of stages, erect hotels, and thus shackle himself with every kind of operation in | phia, 60 days after 1st of January. stocks, rail roads, canals, manufactories, buildings, &c. &c.

Having originally but little capital of his own--possessing, it is true, a strong mind and active habits, he plunged into a vortex of difficulties; the panic found him short of money, and he resorted to forgery, not from a natural viciousness of character or a love ucation, habit and inclination have qualified him for. Try first to get a living, then to improve it, finally to make and lay by mo ney. Let no man suppose that fortunes can be made in a day .- N. York Star.

GALVANISM.—The European cerresponof other counties in this respect; for the sake | dent of the Worcester Spy writes : "Apropos to galvanism. ## POLITICS OF THE DAY.

FROM THE ALBANY DAILY ADVERTISER.

THE SUB-TREASURY .- We have repeat edly endeavored to impress upon our readers the all-important fact, that when the establishment in other States; but it is an signal opposition by Mr. Van Buren and says:his friends. They now support it, witha complete and total abandonment of prin-Your petitioners earnestly pray, that your ciple, except that the proposed project is well adapted to give increased strength and expense, it may be added, of our republican theory of government, and to the great peril of popular liberty.

Among the propositions once sedulous ly maintained, but now discarded by Mr. Van Buren and his friends, was the superior safety and efficacy of the State Banking Institutions, over individuals, as the fiscal agents of the General Government. Upon this point, we cite two extracts from the report of Levi Woodbury, Secretary of the Treasury, made to Congress in December,

"It is gratifying to reflect," said Mr. Secretary Woodbury, "that the credit given or bank agents, has been accompanied by system of State banks in this country at their worst periods, and under their severest calamities, than any other kind of credit the Government has ever given in relation to its pecuniary transactions. Hence, unless the States and the United States should both deem it proper gradually, and in the end entirely, to dispense with the paper system, and which event is not anticipated, the Government cannot escape occasional losses from that quarter; and can never hope to escape all losses from ployment in their place of other and individual agents, who will probably be found less responsible, safe, convenient, and economical."

It will be seen, from the above extract, that Mr. Woodbury is, or was-until it became his interest to profess a change of his opinions-the decided sustainer of the superiority of State bank agencies.

Unfortunately for his present reputation for consistency, he was not content to refer zeal in the cause, enforced his opinions by referring to facts and documentary proof. We present this extract also to the read-

er, as a still further condemnation of the gross insincerity of the Administration, in its pretence to a patriotic motive, when it began to lay its plans for compassing the custody of the public money.

Mr. Woodbury says that it is a "singular fact in praise of this description of pubof them which have ever stopped payment, from the establishment of the Constitution to the present moment, a sum much beyond what is due to the United States from one mercantile firm that stopped payment in 1825 or 1826, and of whom ample securiunder the responsibility of an oath. If we include the whole present dues to the Government, from discredited banks, at all times and of all kinds, whether as depositories or not, and embrace even counterfeit bills, and every other species of unavailable funds in due from two such firms."

We learn from the Natchez Courier that the United States Bank has purchased of the Commissioners of the State of Mississippi, the Union Bank Bonds of that State. to the amount of five millions of dollars, which are to be paid for in the following

get them clean, you're in London!"

SHAMELESS AVOWAL. -

For the first time, that we have seen, the spostacy of Mr. Calhoun and the Calhoun party in South Carolina, is avowed and the happy results which have followed their scheme was first advanced, it was met with justified. The Washington Chronicle

"The attitude presented by South Carolina, in this great contest, is truly a noble one. Perhaps no State was so generally opposed to the present Administration or felt itself more aggrieved by those of the same party, who were lately at the head of affairs. The distrust was general, the dislike almost universal. No sooner, however, did the Administration determine upon a policy, eminently Republican and favorable to the rights of the States, than South Carolina, forgetting her griefs, and solicitous for principles alone, generously came forward, and gave the Administration a support, more cordial, zealous and unanimous than any other State of the Union."

South Carolina, then, is to give the 'Usurper" !! and the "Royalists," a "cordial and zealous support"! Well, be it so. We are content.

But we are not done yet. To show the smaller losses in the experience under the lengths to which they are going in South Carolina, we may quote the following from the Columbia, (S. C.) Carolinian:-

"Does Mr. A. not know that the people re-elected Jackson to the Presidency in return for the noble act? (carrying off the of their approval of the measure, notwithstanding that a corrupt Senate tried and condemned him for it; which deed the people expunged from their records, in farther proof of their approval of his course."

Thus do they justify the Expunging. It is in reference to these and such like

matters that the Columbia S. C. Telescope, thus indignantly and eloquently speaks:-"The history of politics presents us with

nothing equal to this-this gross and palpable tergiversation-this sorrowful and shameful sycophancy. All that South Carolina heretofore contended for, is abandoned: all that she reprobated is adopted: all that Length of tusks won for her honor and consideration and Supposed weight 1,400 pounds. moral power, is renounced. The new converts to Van Burenism would tear from her history the last ten years. And not content with attempting to sully her now, and blast her for the future, they seek to humiliate her by a retrospective degradation .-They claim to support and approve all measures of the Administration, past, present, and to come."
