

# THE MARKETS

## RALEIGH COTTON.

Good middling	8%
Strict middling	9 1/16
Middling	8%
Low grades	8%

## SAVANNAH COTTON.

(Report furnished by W. T. Williams, editor The Cotton Record.)

Week ending Nov. 27, 1911

Spot Cotton - Good ordinary	77-16
Low middling	8%
Middling	815-16
Good middling	97-18
Cottonseed (car lots) - per ton	\$17.50
Cottonseed meal - per ton	\$26
Total sales bales	23 982

The market has ruled fairly active, but latterly the tone has become a little heavier, especially for the lower grades, which are more plentiful.

## RICHMOND LIVE STOCK.

(Report furnished by W. G. Lambert, Manager, Union Stock Yards, Richmond, Va.)

November, 27, 1911.

Steers, best, per cwt.	\$6.00 to 6.25
medium to good, per cwt.	5.00 to 5.50
common to fair, per cwt.	4.25 to 4.75
Heifers, best, per cwt.	5.00 to 5.25
medium to good, per cwt.	4.25 to 4.75

Wheat, dull; per bushel, 98c.

Oats, 54c.

Mess pork, \$16.75 @ 17.35 per bbl.

Mess beef, per bbl., \$12.

## RICHMOND TOBACCO.

(Reported by E. K. Victor & Co., Leaf Tobacco Strips, Stems and Scraps.)

We have had another week of heavy receipts and slowly advancing prices for almost all grades of tobacco. Particularly, sun-cured tobaccos seem to be in strong demand and prices towards the close of the week were about 50c. per hundred higher than they opened. Some little fired tobacco was being offered and was sold at satisfactory prices to the farmers. So far the quality of the crop is somewhat disappointing as everybody had expected a more uniform tobacco with better body. Although we had a heavy rain this week the weather has turned cold and dry and we do not look for quite as full receipts next week as we had this.

## VIRGINIA TOBACCO MARKETS.

The cold weather of the past week had some effect on the delivery of tobacco on the various Virginia markets.

At Richmond, about 500,000 pounds was sold. The average for all goods disposed of was \$8.70 per 100 pounds, the top-notch figures being \$31.50.

At Lynchburg, the prices were very satisfactory. In fact all common and medium grades were selling high.

The sales on the Farmville market were not so large the past week, but the prices were high on all grades.

Although the finer grades of wrappers have not as yet made their appearance on the Bedford City market, those of inferior quality have been bringing \$15 per 100. The prices on lugs still continues very high, with a steady demand. The number of buyers for foreign shipment at this market, besides the local manufacturers, is the secret of success in disposing of the leaf on such advantageous terms to the grower.

There was an increase of offerings of loose leaf on the Petersburg market the past week, the sales for the current week amounting to 187,730 pounds. The general quality of the new crop is better than for several years past.

The receipts were very good on the Danville market, but were cut somewhat short by the harsh, cold weather. Prices were firm under strong competition from the buyers.

Larger quantities, and better grades have been the rule this season on the South Boston market, and the past week was no exception to the rule. J. M. BELL.

The Memphis Commercial-Appeal has published its annual forecast of the cotton production for 1911, estimating the field growth at 15,045,000 bales. This is exclusive of linters secured at cotton oil mills and what are termed as "re-packs."

I have had your paper on trial for ten weeks and we can not afford to do without it; it is worth many times the price.—A. W. Johnson, Taylorsville, N. C.

# How Much Does it Cost By the Year?

The first price of a cream separator is no basis for figuring its cost. Suppose you paid \$2 for a pair of shoes which, with \$1.00 worth of repairs, lasted 12 months, making an average monthly cost of 25 cents. At another time, you paid \$3 at the start, only 50 cents for repairs, and the shoes lasted 24 months—an average cost of less than 15 cents per month. Which was the better buy?

The same principle holds good in cream separator buying. You may pay a low price at the start—but such a separator will need frequent repairing—and won't last. The cost per year will be double that of a good separator.

## IHC Cream Harvesters Dairymaid and Bluebell

are famous for their durability. They skim close and run easy for years. They are built for long, hard, steady service. Here are some of their advantages:

Milk and dust-proof gears which are easily accessible—a feature found on no other separators; a patented dirt-arrester which removes the finest particles of dirt before the milk is separated; frame entirely protected from wear by phosphor bronze bushings; large shafts, bushings and bearings.

IHC Cream Harvesters are made in two styles—Dairymaid, chain drive, and Bluebell, gear drive—each in four sizes. Let the IHC local dealer tell you all the facts, or, if you prefer, write direct for catalogues and any special information you desire.

International Harvester Company of America  
(Incorporated)  
Chicago U S A

**IHC Service Bureau**  
The Bureau is a clearing house of agricultural data. It aims to learn the best ways of doing things on the farm, and then distribute the information. Your individual experience may help others. Send your problems to the IHC Service Bureau.

Style K-3  
This Cabinet Contains 21 Keen Kutter Tools  
Price, \$15.00

# KEEN KUTTER Tool Cabinets

It is poor economy to buy unknown tools—when you have need for a tool of any kind it must be in good condition for good work.

The ideal way to equip your workshop is to buy one of the Keen Kutter Tool Cabinets. Unlike the tool chest where the tools come in contact with each other and injure the edges, in the Keen Kutter Cabinets the tools are hung each in a place of its own. All bear the Keen Kutter trademark, which stands

for highest quality, material and temper. Keen Kutter Tool Cabinets range in price from \$8.50 to \$125. The cabinet illustrated above is about what we would recommend for a well equipped farm workshop—its price is \$15. Write for our tool cabinet book, showing the styles and prices.

SIMMONS HARDWARE COMPANY (Inc.), St. Louis and New York, U. S. A.

# McKay Steel Roller Bearing Sulky Stalk Cutters

The World's Best. Not in theory but in actual test trial in the field. Will positively cut large and thickly planted stalks better, cleaner and closer than any other of its kind ever produced. Lathe turned bearings and superior dirt protection. Although of greater weight than most others the draught is thirty per cent lighter. Remarkably easy to operate. It is made for hard and long service. Has won highest prize at all Fairs where shown. Before buying Stalk Cutters every farmer should look carefully into this matter. Write today for full descriptive circular free.
