**Monitor D-1 Fertilizer Drill**

A complete practical fertilizer drill—not an attachment.

Designed in the fields of the South and built to do satisfactory work under the conditions peculiar to that section.

The fertilizer feed is positive—no clogging—no banking—no delays.

Six changes of speed—without stopping—on both seed and fertilizer.

Can sow from 50 to 1500 lbs. fertilizer per acre—24 distinct changes of quantity—very accurate.

The Monitor Double Disc is the only drill that deposits the seed at the bottom of the furrow—in two rows—at an even depth—with a uniform covering of moist earth.

**The Monitor Way is the Right Way**

It insures more healthy plants to the acre with less seed. All the seed grows—all comes up at the same time—withstands drought—ripens uniformly—increases the yield.
