

Feeds the Crop Constantly

To supply the needs of your crop you must supply Nitrogen, Phosphoric Acid and Potash. The Nitrogen (Ammonia) must be supplied in several different forms if the crop is to receive constant nourishment. The Nitrogen is supplied in several different forms in

"AA" Brand Fertilizers

These different forms become available at different times so that the crop does not lack for food—so that little is leached away. Bigger crops are the result. Chemically mixed fertilizers—mixed as we mix them—are as superior to dry-mixed, or shovel-mixed fertilizers as bread is superior to wheat. Don't be content with ordinary brands of fertilizer with but a single source of Ammonia. Get the "AA" Brands.
