AWoman's Experience in Hog Raising

F YOU are raising scrub hogs do the best you can with them until you can do better, but you should get better stock. If you can't afford to buy improved hogs, buy a pig of one of the good bacon breeds and in a few months it will grow into a fine hog that will be a source of pride and profit to you, provided you give it the proper attention, keep it healthy, free of vermin, and don't let it get stunted.

Plant a variety of feed for your hogs. They don't do well on one kind of feed alone. If you have bad luck don't get discouraged but remember that the more valuable anything is the harder it is to propagate. The worthless things are the ones that spring up of themselves.

A few years ago, though we had some very good hogs, I determined to raise Berkshires. I purchased a female pig which I saw advertised and she arrived safely and was a beauty. I was very proud of her, but on the third day after her arrival she managed to escape from her pen and disappear and no amount of searching and inquiring disclosed her whereabouts. I was sorely disappointed but not discouraged. I then ordered a pair of pigs, which were not so pretty as the pig I lost, yet I felt very proud of them. I kept them until they were grown when cholera swept through our herd and before we purchased serum it was too late and nearly all were lost, including my Berkshire sow. This was a sore disappointment, but as we still had the male, I determined to try again. After a thorough disinfection of the premises with lime and Kreso dip, in a short time I again ordered a female pig which has prospered. I now have several gilts and a new litter of pigs, besides a nice drove of half-breed porkers.

We had peanuts and peas on which to fatten our hogs last fall, and they gathered them themselves. We also fed them with corn.

MRS. J. H. MIXON,

Estill, S. C.

Dairy Cows That Pay Over \$6 a Month Profit

PHAT there are a considerable I number of dairy cows in Catawba County which are yielding their owners a profit as high as \$79.24, and more, each year, is the statement of County Agent H. K. Foster, who submits a table of averages for 719 cows in a number of Southern states, giving also a list of the best 10 cows in the lot.

The average of the 719 cows was 4,299.4 pounds of milk and 216.8 pounds of butter fat. The value of the product was \$68.90, less \$36.27 for feed, leaving a net profit of \$32.63 the cow the year. The butter fat cost 16.7 cents the pound, and for every dollar of feed there was a return of \$1.90.

The average of the best 10 cows in the lot, whose record is being duplicated and bettered by a number of Catawba County cows, shows an average milk production of 2,681.9 pounds of milk and 459 pounds of butter fat. The value of the product was \$144.97, less \$65.73 for feed, leaving a net profit of \$79.24. The cost of butter fat was 14.3 cents the pound. For every dollar in feed there was a return of \$2.20.

Records of experiment stations show that a cow produces seven tons of manure annually, which has a plant food value of \$2.96 the ton, making the seven tons worth \$20.72. Added to the cash profit of the average cow in the 719, this gives a total of \$53.35 in cash and fertilizer value, produced by one cow in one year. - Newton Correspondence Charlottte Observer.

I have joined the Corn Club and am going to do my best to see what I can make raising corn. My father says The Progressive Farmer is the best paper he ever saw. It furnishes reading matter for the whole fam-ily—reading that is clean and wholesome for the old and the young.—Lee Ritchey, Lincolnton, N. C.
