

Announcing the \$750 RUMELY "8-16" CASH F.O.B. LA PORTE

This new Rumely model has met with instant success because it fills all requirements for a small farm tractor—and it is built by a company that knows how.

It is strictly a one-man outfit—tractor and plows are combined in one machine, and the control of the entire outfit is from the operator's seat. With the Rumely you plow just the same as with a horse gang—the plows are where you can see them and you know how the outfit is working every minute. You can back with your plows, make short turns and cut square corners.

Besides plowing, this tractor will pull your discs, harrows, mowers, drills and binders—it will operate your silage cutter, hay baler, corn sheller, small separator and feed grinder. In fact, handle all your power jobs, draw-bar or belt. When used for other than plowing, plows are quickly detached.

Note These Features

- Control**—Full control of entire outfit from operator's seat.
 - Enclosed Gearing**—Every gear a steel gear and all cut gears excepting bull gear—all gears encased and running in oil, including bull gear.
 - Roller Bearings**—Roller bearings exclusively used throughout.
 - Heavy-Duty Engine**—Four-cylinder, heavy-duty engine—Rumely made.
 - Durability**—Rigid I-beam frame construction.
 - No Extras**—Prices are for tractor complete with plows.
- We make the same design in a three-plow tractor—"12-24." Price \$975.00 cash, f.o.b. La Porte. Send for a catalog completely describing this new Rumely model.

THE SANDUSKY TRACTOR

THE "LITTLE FELLOW WITH THE BIG PULL"
15 Draw Bar H. P., 35 Belt H. P.

A medium size tractor that is really making good on hundreds of farms. Does the heavy work cheaper than horses or steam and can also be used economically on light loads.

You get reliable power at low cost with the correctly designed and constructed Sandusky. Straight gear drive prevents wear and consequent loss of power as also upkeep expense incident to driving through bevel gears.

Sold subject to three day trial, demonstrating on your own work its ability to fulfill

OUR GUARANTEE

We guarantee The Sandusky Tractor to handle four 14-inch mold board plows 8 inches deep where a big team can pull a 12-inch plow 6 inches deep; to run belt machinery up to 32-inch separator; to have one-third reserve over drawbar rating, and for one year against defective workmanship and material.

Equipped with our own four cylinder, four cycle, 5 x 6 1/2 heavy duty, slow speed, vertical motor; 2 1/2 inch crankshaft; 31 inches of motor bearing surface; all four bolt bearings; positive self-contained combination force feed and splash oiling systems. Motor set crosswise to frame eliminating objectionable bevel gear drive; removable underpan permitting taking up or replacing bearings, connecting rod, rings or entire piston without disturbing any other part of tractor. Three speed selective transmission, 2 to 5 1/2 miles per hour with direct drive on low; three point spring suspension; all steel construction; light weight; small overall dimensions and short turning brakes; easily handled; surplus cooling capacity.

The Sandusky Tractor, its motor, and transmission were each awarded the Gold Medal at the Panama-California Exposition. Also Highest Award Silver Medal at Society for Improvement of Agriculture-Exposition, Lancashire, England.

Book "Power on the Farm" Free

Write for a copy of the new 40-page edition covering the latest refined 1916 Model E, its uses, and containing other valuable information. Tell us fully about your power problems and we'll gladly help you solve them without obligating you in any way.

1916 Model E

That Means True Economy!

That triangle trade-mark never appears on steel or common iron culverts; you will never find it on "good enough" flume or culvert sections. It is the recognized stamp of quality. It means honesty of manufacture and the assurance of long-run economy and service that will continue long after you have forgotten the price of

"ARMCO" AMERICAN INGOT IRON CULVERTS

Why? Because ARMCO IRON RESISTS RUST. It is pure iron of even and uniform texture through and through. It is practically free from the gases and impurities that cause steel and ordinary iron to rust out in spite of galvanizing.

Look for that trade-mark on every section of Culvert. If it is not there the culvert is not the genuine ARMCO (AMERICAN INGOT) IRON, and will not give the greatest service for the money expended.

For full information on "Armco" Iron Culverts, Flumes, Sheets, Roofing and Formed Products, write the manufacturer in your vicinity, or

Armco Iron Culvert Mfrs. Association
Cincinnati, Ohio

KITSELMAN LAWN FENCE CHEAPER THAN WOOD

WOULDN'T TAKE A MULE FOR THIS CULTIVATOR

The Fowler is not just "Another Cultivator". It's entirely different from the old tools. It scalps the surface like a hoe instead of running deep enough to destroy crop roots. Uncle Sam says: "If roots are broken, the plant will produce other roots but at the expense of the vitality and food supply. For retaining soil moisture a loose soil mulch two or three inches thick should be maintained." The Fowler works above crop roots and maintains such a perfect mulch that those who use it "don't care whether it rains or not. By using the Fowler you can greatly increase your crop yield with half the labor. This is worth knowing about. The whole story is in our catalog. It's free. Write a postal today.

Works 8 acres or more a day.
Tom McCullom, Corinth, Miss., says: "We like the Fowler Cultivator fine. Would not take a tolerable good mule for it."
