Vol. XXXI. No. 7.

SATURDAY, FEBRUARY 12, 1916.

\$1 a Year; 5c. a Copy

Keep This Issue In Your Desk or Bureau Drawer

"SOME books," said Lord Bacon, "are to be tasted, others to be swallowed, and some few to be chewed and digested." This Reference Special belongs with the publications that are to be "chewed and digested"—and it will stand for a tremendous lot of both. Go over it now in a general way therefore, study over the things that interest you most, and keep it handy where you can chew on some favorite morsel at every spare moment during the coming three or four weeks. Then have a permanent place prepared for it—a place where you can find it at any time of day or night during the coming twelve months.

For there's no telling what you'll want it for—about a fertilizer

formula with potash left out; or whether exchanging cotton seed for meal will pay; or find when to plant some vegetable, legume or forage crop; how to spray and when; what some commercial term means; when the moon changes; what "time prices" cost; a farm work program for the month; a suitable subject for school debate; how to feed the baby and growing child; what to do for the sick child; which foods are most nutritious, etc., etc.

It doesn't matter what the subject is, if it touches farming or farm life, you are almost sure to find some light on it somewhere in this issue. *Be sure to save it.*

INDEX TO THIS ISSUE

(Asterisk indicates that information is contained in a note without a heading.)

Page	Page	Page
AGRICULTURE—		
A Farm Work Program for Every Week in the Year.....	3	Computing Fertilizer Values.....
A Soil-building Rotation.....	34	Fertilizers Without Potash.....
Corn Yields in the Southern States.....	31	Percentage of Plant Food Constituents in Fresh Animal Excrements.....
Cost of Tile Draining Per Acre.....	15	What the Fertilizer Guarantee Means.....
Cotton Crop of United States for Twenty Years.....	4	HORTICULTURE AND PLANT DISEASES—
Cotton Planting and Picking Dates.....	4	An Acre in Fruit.....
Cotton Yields Per Acre by States.....	4	A Planting Table for Vegetables.....
Farmers' Bulletins You Ought to Have.....	10	Bichloride of Mercury Solution.....
Grass Mixtures for Pastures.....	30	Bluestone Solution.....
Highest and Lowest Prices for Cotton.....	4	Bordeaux Mixtures.....
