PROGRESSIVE FARMER—VOL. XXI. NO. 26.
THE COTTON PLANT—VOL. XXIII. NO. 25.

RALEIGH, N. C., AUGUST 9, 1906.

Weekly—\$1 a Year.

I Will Help You Select Your Buggy.

IN considering the many offers of cheap buggies advertised at ridiculously low prices, it is well to look at these facts; GOOD vehicles can only be made from GOOD materials by GOOD workmen. And YOU know that good materials and GOOD WORKMANSHIP now command a higher price than ever before. Therefore, if you want a strongly constructed, nicely finished buggy, the BEST you can do is to buy it direct from the factory, best equipped for turning out such work in the most economical way. I feel sure that if you knew how our "Columbia" vehicles are made, and if you could see the care that is taken in each department, you could readily understand why they are superior to other makes, which are sold at even higher prices. In fact, I know that some factories have no foremen in the different departments, which means that the work is built practically without any supervision.

I figure that the care we take in building our buggies really costs us little or nothing. You know we guarantee our work against defects for two years and if we pay on an average 50 cents per vehicle extra for inspection, wouldn't you consider this more desirable than furnishing perhaps a new set of wheels, or a new body for a vehicle, free of charge? I do. And besides, our customers are better pleased. They buy again when they want something else in our line, and they recommend our work to their friends. That's the secret of the success and popularity of "Columbia" work.

Now if you need a buggy, surry, phaeton or any other kind of a rig, write me about it. I will gladly help you make your selection and will build you a job that will suit you and save you money. Our "Columbia King" Fifty Dollar Buggy is the wonder and envy of other manufacturers who try to imitate it by building up a cheap buggy with some special points that they think might make you forget about the quality of the cloth, leather and timber used, which are really more important.

Write me about what you want, and I will mail you one of our large catalogues free of charge, and give you any advice you may want concerning your particular rig. Remember, I take the risk of suiting you. IF YOU'RE not satisfied with the buggy I get up for you, you need not keep it, and YOU CAN TRY IT THIRTY DAYS before making up your mind about it.
