

THREE 20th CENTURY IDEAS

THE NEW
Remington

Solid-breech, Hammerless
Bottom ejection

PUMP
GUN

THE NEW
.22 RIFLE

UMC

Steel
Lined
Shot Shells

REMINGTON GUNS lead the world in modern ideas. The Remington Pump Gun is the only gun of its type which combines the three — — indispensable improvements: 1. Solid Breech; 2. Hammerless; 3. Loading and ejection of shells at the bottom. Absolutely safe and easy to handle because of perfect balance. Although graceful and beautiful, it stands the roughest usage.

THE NEW REMINGTON .22 REPEATER

embodies the Remington Solid Breech Hammerless Idea. Suitable for all small game because it shoots .22 short, long and long rifle cartridges. Will wear a lifetime because you can take it apart, clean it from the breach and thus prevent the barrel from "rusting out." Get the new Remington and get the many improvements found in no other. Accurate, pretty and moderate in price.

If your dealer can't show you the new Remingtons, write us for literature.

THE REMINGTON ARMS COMPANY, Ilion, N. Y.

Agency,

315 Broadway,

New York City

AFTER nearly 40 years' experience in making "the best shells on earth," we find that a tough band of steel around the smokeless powder makes our Arrow and Nitro Club shells *better, stronger and safer.* The Steel Lining protects the gun, keeps out the moisture and makes the shell shoot better in every way.

There are many kinds of unlined shells but it should be easy to remember the *UMC Steel Lined kind* from the round red trade mark on the shell box. There is no additional charge for the *steel protection.*

MADE FOR REMINGTON AND ALL OTHER SHOTGUNS.

Game Laws Free.

second. Mr. Drewry showed a boar and gilt of special merit.

Good Duroc-Jerseys and Yorkshires.

Duroc-Jerseys were shown by W. S. Eaton, of Morehead City, and T. Jeff Stephenson, local breeder. The entries made by Mr. Eaton were deserving of special commendation. The boar and two gilts exhibited would have made first-class competition in any Duroc Jersey show. Smoothness, uniformity, breed type and quality were points especially noticeable. The other herd owned by T. Jeff Stephenson was very creditable indeed, second premiums being awarded to this party on boar and sow over six months and under twelve months.

A single exhibit of Yorkshires was made by the Wheeler Homestead, of Kankona, N. Y. This display was very meritorious and educational. An entire herd was in evidence and consequently firsts and seconds awarded accordingly: Two females and one male of this breed were sold in the State. Results from breeding this type of hog in the South should be watched with great interest, as there is no doubt but what the bacon breed should and will predominate under our conditions.

J. W. Beavers, of Apex, N. C., showed a small herd of Poland Chinas.

The Tamworth was exhibited by E. A. Allen, of Neuse River, N. C.

Poor Showing of Sheep.

The sheep classes were not filled as they should have been, but some excuse is offered for this condition considering the fact that the classi-

fication does not provide for the individual breeds, but rather for the three types—long wools, short wools and medium wools. This condition should be all means be remedied and no doubt will be in the near future.

The only exhibitors in the sheep class were J. F. Homewood, of Burlington, N. C., and Occoneechee Farm, of Hillsboro, N. C. The Occoneechee Farm was awarded first on ram two years old or over. For the flock premium J. F. Homewood was awarded first prize, the Occoneechee Farm not having a full class.

Three flocks of Angora goats were shown. The largest and decidedly the best flock was shown by the Diamond "V" Angora goat ranch, of Rock Castle, Va. Firsts were awarded to this farm in every case; seconds, to Occoneechee Farm. The flock from Virginia was deserving of special merit owing to the splendid type and quality and uniformity of the fleece.

Next year it is hoped that more adequate accommodations can be provided, both in the way of buildings to house the stock and premium money for the exhibitors. The cattle tick once disposed of, the way should be fairly well opened for a splendid live stock show at Raleigh, so much needed for educational purposes.

A Drawback.

"If you love him and you're so absolutely certain that he loves you, why don't you marry him?"

"There's just one thing in the way."

"What's that, for goodness' sake? He has plenty of money."

"Yes, but he won't propose."—Cleveland Leader.

\$500 More a Year Farming.

(Continued from Page 3.)

without a long course of study and preparation. The things we know most of and can do best are those in which we are most interested. An early knowledge of the facts and principles underlying household and farm practices and operations will do more to develop intelligence, industry, and a worthy ambition in our farm boys and girls than all other things combined. How is this desire for useful knowledge to be inspired and the reading habit formed? They will rarely be accomplished unless one or both parents possess them and then only generally when a complete spirit of interest, sympathy and comradeship is maintained between the boys and girls and their parents or teachers. Just as we believe the mother wields the greatest influence over the character of the boy or girl, so we believe that the mothers of the South are most largely responsible for the lack of knowledge and interest in household economics among our girls and for the lack of desire for farm life among our boys. To make the most out of the boys and girls we fear the fathers and mothers will have to be regenerated or inspired with a desire for knowledge for the power it gives to do life's work.

A College Education Possible

EVERY BOY and girl will not and could not get a college education, and it may be asked why a college education is necessary when knowledge has and may be obtained through reading, study and observation, without the aid of the college. As the first thousand dollars is the hardest to make and save, so the first and fundamental

SAWS ANY WOOD IN ANY POSITION ON ANY GROUND 6 in to 8 ft. Through

1 Man with a Folding Machine Beats 2 MEN with a Cross-cut Saw

Runs Easy No Backache Weighs only 41 lbs. Saws Down Trees

Our 1910 Model Machine saws faster, runs easier and will last longer than ever. Adjusted in a minute to suit a 15-year-old boy or strongest man. Ask for catalog No. M27 and low price. First order gets agency

PRATT'S
"SCALECIDE"

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water. Send for Booklet, "Orchard Insurance."

E. S. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

knowledge is most difficult to get. In fact, without help it will generally never be obtained. The college is the best, surest and quickest means of getting a start in education and in most instances gives that of value which is not obtained elsewhere. If we are to do justice to our boys and girls we must do everything possible to inspire a desire to acquire a college education. We do not even need to furnish them money to obtain this college education if we can inspire sufficient desire for it. To do this we must ourselves appreciate and respect such education. Any boy or girl with a sound body and mind who desires it sufficiently can without financial help acquire a college education. Our duty, then, is by example and precept to inspire our boys and girls with such a desire, and we may do this with complete confidence that it will pay. It may not supply the boy or girl with "common" sense but it will enable a better use of that already possessed and tend to a broader, fuller and better life. Knowledge is power—the greatest power.
