

OUR PROGRESSIVE FARMER SEWING MACHINE

A Club of 42 Earns It

A Club of 42 Earns It

Guaranteed for Twenty Years

This is a splendid machine and our twenty-year guarantee assures you long service. Note that the head is high.

Note that the head is large enough and wide enough to handle bulky goods. Is fitted with reliable tension automatic attachments, also attachments for spooling your bobbins, for regulating your stitch and for feeding the goods through true and straight.

The machine stand which is made of solid oak, four drawers on the sides, with a small drawer over the lap. The head drops down in the case when the lid is closed. When you lift the lid it brings the machine back in place. When the lid is down the machine can be used for a stand or table.

AUTOMATIC RIBBON BINDER.—This automatic winder winds the thread evenly, full width of the bobbin. The belt which drives the sewing machine head operates the bobbin.

TENSION.—By this tension which you adjust by a thumb screw you can get as tight or as loose a tension as is desired.

THE FEED.—This is an automatic feed without springs and it feeds the goods through straight and true.

THE SHUTTLE.—Is self threaded and is of course the latest thing.

A sewing machine such as we offer can't be bought for less than \$25, and we give one to our subscriber friends for a club of forty-two (42) yearly subscriptions; or for ten yearly subscriptions and \$17.50 in cash; or twenty-two (22) yearly subscriptions and \$10 in cash; for thirty-two (32) yearly subscriptions and \$5 in cash.

NOTE Result of 18 years tests. Ohio Agricultural Experiment Station.

FERTILIZED

Make Every Hour of Labor Produce 2 Bushels Instead of 1

It requires twelve hours of human labor to grow an acre of wheat. What do those twelve hours of labor yield? Note the result of conclusive tests at the Ohio Agricultural Experiment Station.

One way—without fertilizer—yielded 11 bu. per acre—or a little less than a bushel as reward for each hour's work. The other way—with fertilizer—yielded 24 bu. per acre—or 2 bushels of wheat as reward for each hour's work.

In other words, these experiments proved that every hour spent in growing wheat on fertilized land brought in twice as much grain as the same amount of time spent in growing it on land without fertilizer.

The fertilizer actually added 13 bushels more

to the acre yield, paying for itself over and over again. These are experiment station facts. In view of these facts can you afford to plant wheat without applying fertilizer?

Give the crop the food it needs to build good strong straw and plump the pods of grain. Nitrogen is needed, in addition to Phosphoric Acid. For to beat the Hessian Fly, wheat should be planted late. The Nitrogen enables it to get a good start, even in cold ground, and resist the ravages of the fly.

Order Fertilizers Early

Our fifty factories and distributing points enables us to get fertilizer to you with a minimum amount of hauling, but due to the freight congestion, you should order NOW. Write us today for the name of V-C Dealers near you.
