

The Engine Selected by over 150,000 Farmers

RECORDS made by over 150,000 practical farmers buying over \$10,000,000 worth of Fairbanks-Morse "Z" Farm Engines have never been equaled in Engine history.

Demand, as they did:

1. Fairbanks-Morse Quality.
2. Economy in first and fuel cost, and low upkeep.
3. Simplicity and Staunch Durability.
4. Light-weight, Substantial, Fool-proof.
5. Gun-barrel Cylinder Bore.
6. Leak-proof Compression.
7. Complete with Built-in Magneto.
8. More than Rated Power.

You Also Get Service from your Local Dealer
Your local dealer has just the type "Z" for your needs in stock—waiting for you. Buy from him. He is prepared to give prompt delivery and personal service right where you live.

The 3 and 6 H. P. sizes are built to use kerosene, distillate, stove oil, tops or gasoline. The 1 1/2 H.P. size uses gasoline only.

FAIRBANKS, MORSE & CO.
Chicago - Manufacturers

Make real meal

of Velvet Beans, Snapped Corn, peavine hay, alfalfa, or any fodder. Specially built to pulverize such crops right and to wear for years without replacements.

Williams Patent GRINDER

has no knives or buhrs—square-edged, tool steel hammers break up all stalks and fibrous matter into small bits and grind them through a screen into real meal. No chunks or shreds. Fine or coarse screens changed in 3 minutes without a wrench. Hammers reversible when worn—outwear six sets of buhrs and cost no more to replace. A. E. Jennings, Webb, Miss., says, "Crushed 7000 bushels snapped corn last season without 6c expense."

100% more capacity than any other type of grinder using equal power. Lightest running because of hammer principle and S. K. F. annular ball bearings. Sizes for 5 h. p. gasoline engine and up; 600 to 12,000 lbs. per hour capacity.

With or without wind sacking equipment and self-feeder. Write for **Free Folder** Williams Patent Crusher & Pulverizer Co., 2705 N. Broadway, St. Louis, Mo.

POWER - SIMPLICITY ECONOMY

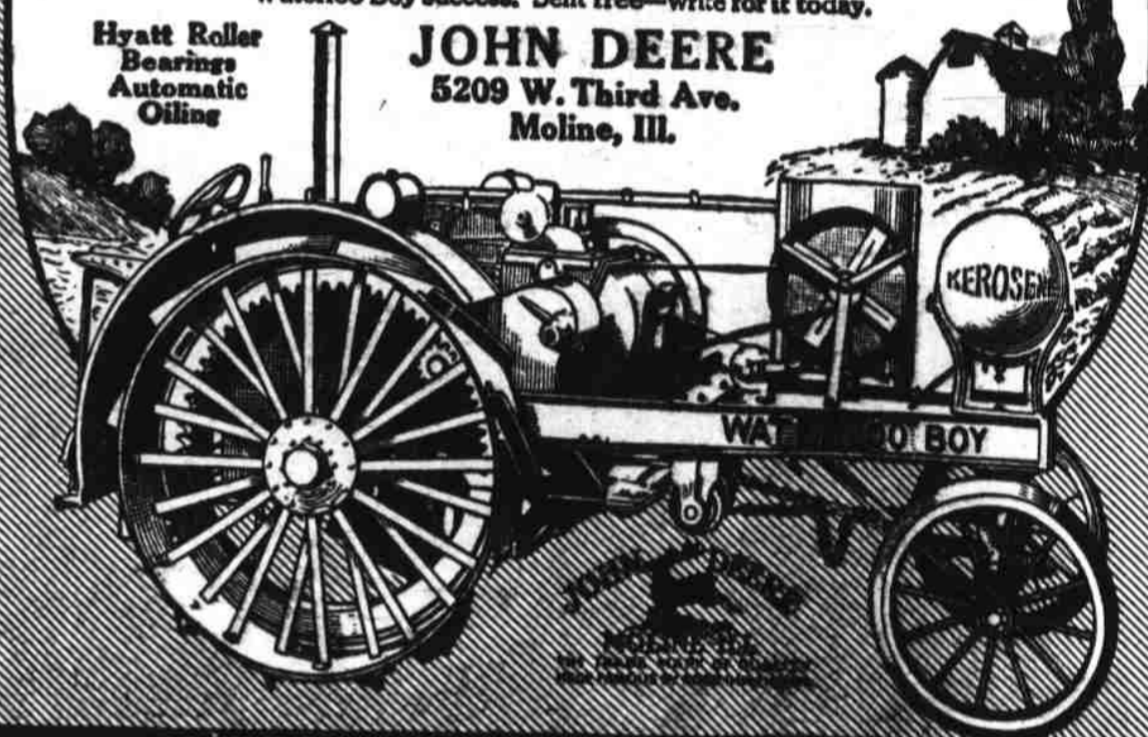

WATERLOO BOY ORIGINAL KEROSENE TRACTOR

Dependable Power that does not fail when your farm work has been delayed and you must take advantage of favorable weather and ground conditions.
Simple Power which the experienced hired man can utilize to full day capacity, at any draw-bar or belt job on the farm.
Reserve Power that's available in emergencies—for variable soil conditions or upgrade work.
Economical Power that insures low operating cost—works all day under full load on 16 gallons or less of cheap kerosene.

Built to Standard Quality

Waterloo Boy fully sustains the quality-fame attained by Waterloo Boy power machines in 25 years' manufacturing success. Backed by a plain guarantee from a responsible manufacturer. Two-speed motor supplies ample reserve power for tillage operations, and belt power for all farm needs, including threshing. All working parts of the Waterloo Boy are easily accessible.

Our illustrated catalog contains convincing proof of Waterloo Boy success. Sent free—write for it today.

JEFFREY VELVET BEAN GRINDER

A One Man Machine

One Operation of the Jeffrey Swing Hammer Bean Grinder reduces Velvet Beans to a fine meal that is easily digested by stock.

No feeding mechanism is necessary other than a chute from an elevator or conveyor, or a man with a shovel.

Ball bearings insure quiet running and minimum of power and trouble. All parts are readily accessible.

Machine is built in different sizes. Write for Bulletin No. 247 giving full particulars.
