

WAREHOUSE, &c.

Hundley Bros. & Co's DOWN TOWN OFFICE!

For the convenience of the public we have opened an office in the Bonded Warehouse on College street.
We will have telephone communication with our works, and can supply anything in our line at short notice. We will keep on hand all the time a supply of

SASH, DOORS, BLINDS, LIME, BRICK,
SHINGLES, LATHS, LUMBER, &c.

Call at the office and leave your orders. J. A. Thaxton is in charge. Respectfully,
[Feb. 19.] HUNDLEY, BROS. & CO.

TO THE TOBACCO PLANTERS —OF— North Carolina and Virginia.

We offer for your use on the Spring Crop of Tobacco of 1892 our Standard and reliable Fertilizers: SPECIAL COMPOUND FOR TOBACCO, and OBER'S STANDARD TOBACCO FERTILIZER.

The Special Compound for Tobacco has been submitted to the practical test of nearly twenty-five years, and we confidently recommend it, as in every respect adapted to the successful growth of Tobacco of superior quality, combining as it does, every element necessary to the development of the plant.

We are satisfied that no other Fertilizer, through this long series of years, has produced such good results, as has been accomplished by our Special Compound for Tobacco.

To meet the wants of those Planters who desire a lower priced Fertilizer than our Special Compound for Tobacco, we have introduced the present season our new brand of OBER'S STANDARD TOBACCO FERTILIZER.

This is essentially the same as our Special Compound, and, although not quite so rich in Ammonia and Potash, is a strong, reliable Fertilizer, and in every respect adapted to the successful growth of Tobacco.

We have always preserved the high standard of our manufactures, they contain a large percentage of Pure Animal Bone, richly Ammoniated, and with the requisite amount of Potash. Nothing is used in the composition of our goods but the very best materials.

We wish to impress this fact upon your minds, that under no circumstances have we ever reduced the quality of our brands. Our goods are the same today as they have always been. As in the past they have produced good crops of superior bright, yellow Tobacco, so must they do in the future. The Planter cannot afford to take risks in putting in a crop of Tobacco. If by the use of the best Fertilizer, he is almost sure of securing a good crop of superior Tobacco, he is unwise to take the chances of losing his labor for the year by the use of inferior goods.

An experience of 33 years in the manufacture of Fertilizers has convinced us that Tobacco requires a stronger manure containing proper proportions of certain elements of Plant-food, than is necessary to be used in any other crop.

The seasons of 1890 and 1891 were exceptional ones, and almost any stimulant to the soil, although not lasting in its effects, and not permanently enriching it, produced for time fair crops, but this was no test. In other years, under less favorable conditions, the crop when low grade goods are used, would probably be an entire failure. We think it economy to use the best.

The permanent improvement of the soil, is a point which should not be overlooked. Good Fertilizers are lasting in their effects, and enrich the land, the poorer qualities are exhausted in the effort to produce a single crop.

We have recent information from Planters who used our Special Compound for Tobacco last year, and they report that when the crop was green and growing, they could see but little difference between the plants on fields where Compound was used, and those on fields where lower grade goods are employed, but later on, when the crop matured and was cut and cured, they found that the Tobacco made with our Compound had more body, better face, cured brighter, and above all was worth more money in the market.

To illustrate our meaning, we give the following estimate, showing the results from the use of strong, reliable Fertilizer, such as we manufacture, as compared with those obtained from lower grade goods. For example take two brands estimating the cash value delivered to the Farmer, say at \$24 and \$30 per ton.

Suppose you make a crop of medium value, say \$15 per 100 lbs., and assuming that with the best standard Fertilizer, you make over 100 lbs. Tobacco more per acre by its use, and sell the Tobacco for \$1 per 100 lbs. more money, the result would be as follows:

700 lbs. Tobacco to the acre made from the use of High Grade Fertilizers, at \$15,	\$105 00
600 lbs. Tobacco to the acre made from the use of Lower Grade Fertilizers, at \$15,	\$ 90 00
	\$ 21 00
Deduct excess of cost of 1 ton High Grade Fertilizers, at \$30 over 1 ton lower grade good at \$24,	\$ 6 00
Balance in favor of High Grade Goods,	\$ 15 00

Thus you perceive, you will realize \$15 more per acre from the use of High Grade goods such as we offer you, than you could obtain by using the lower grades. This we consider a moderate estimate, and we believe that during a series of years, embracing favorable and unfavorable seasons, the difference has been much greater. The High Grade manures making more pounds to the acre, and producing a much superior Tobacco, from which was realized more than \$1 per 100 lbs., over and above the price obtained from Tobacco grown by low grade goods.

Very respectfully,
G. OBER & SONS' CO

NORTH CAROLINA.

WHAT HAS TAKEN PLACE WITHIN HER BORDERS.

A General Epitome of Recent Occurrences Around and About Us, From the Mountains to the Sea, as Culled from our State Papers.

Congressman B. H. Bunn will deliver the address on memorial day at Raleigh, on May 10. His subject will be Brigadier General McRae.

A Bible Institute will be established at Charlotte under the management of the Rev. George G. Needham on the plan of the one at Northfield, Mass.

The State Medical Society will meet at Wilmington on May 17, and at the same time and place the Boards of Health and Medical Examiners will also be in session.

The commencement exercises of the Davis Military School will take place June 8th and 9th. The annual address will be delivered by Hon. R. A. Doughton, speaker of the House of Representatives of North Carolina.

No liquor is allowed to be sold in Northampton county at present, but application will be made to the board of commissioners at its May meeting for license to sell it by one of the wealthiest merchants in the county. Captain R. B. Peebles will appear for the applicant and Senator Ransom and others in opposition. The case will excite considerable interest and will be fought hard by both sides. There is a strong prohibition feeling in the county.

Ras. Walker, a sixteen-year old son of John Walker, a prominent farmer, who lives near Smith Grove, Davie county, committed suicide on the 22nd by shooting himself through head with a shotgun. No cause is assigned for the deed. Young Walker had been plowing all day. He tied his team in the afternoon and told his brother to watch them until he returned. He then went to the house, got a gun and placed it under his chin and discharged it with a stick, tearing nearly all of his head off.

Under the old law, by which each brand of fertilizer paid \$500 tax, there were seventy three brands sold in the State. Under the new tonnage tax system 348 brands are on sale. It is said that some manufacturers want the gates opened so they can come in and sell, and that they chafe under the law which protects the buyers by requiring the fertilizers to be up to standard. The old firms which sell goods like the present law and desire it to continue. It is, as they know, a protection to them and to the consumer at the same time.

Rev. T. W. S. Parker, of the Pleasant Garden circuit, near Greensboro, has attempted to preach like Sam Jones, indulging in a very abusive style, and J. C. Neeley, one of his flock, jumped on him about it, and beat him up pretty badly. According to the Greensboro Patriot, an indignation meeting was held at the parsonage of Pleasant Garden, to denounce Neeley for striking the preacher. Neeley accused the preacher of abusing him in his sermons. D. G. Neeley, brother of the fighter, in a card, gives samples of the preaching: "Show me a dozen Christians in this church, and I will show you as many saints as there are squirrels and rabbits in the woods and old fields around here." "If all the members of this church were to die now, nine-tenths of them would go right to hell." "You are the worst people I ever saw." "Any little thing can be a daddy, but there are only a few fathers," and many expressions more shocking still.

The Signal, State organ of the Republican party, in its issue last week publishes a nine column review of the proceedings of the late State Republican Convention, denouncing it in unmeasured terms. J. C. L. Harris, its editor, has for some time been at outs with the party, claiming that the revenue officers were in full control, and has expressed his intention to expose the manner in which the convention was conducted. In glaring headlines he characterizes the proceedings as "Dastardly Damnable and Devilish," and charges that credentials for delegates were manufactured by fraud and forgery; that State Chairman Eaves was openly charged with dishonorable conduct and made no denial or defense; that delegates were bulldozed and forced to vote for Eaves, and lastly, he says that the proceedings of the convention were a sham and disgrace inflicted upon the Republicans of the State, and that the Republican party is utterly and forever destroyed. This will doubtless prove a bomb-shell in the Republican camp.

English Spavin Liniment removes all Hard, Soft or Calloused Lumps and Blemishes from horses. Save \$50 by use of one bottle. Warranted the most wonderful Blemish Cure ever known. Sold by J. G. Hall, Druggist, Oxford.

NEW ADVERTISEMENTS.
