**FARMERS OF GRANVILLE**

**A WORD FROM THE COUNTY DEMONSTRATOR**

**Some Timely Advice From Dr. Morris Pertaining to Seed, Etc.**

The time is here for farmers who wish to make more corn with less labor to begin to plan and execute plans for that purpose. The special thing in hand now to be done is to go over your corn fields as fast as the corn is matured, and pick out seed corn for next year, if the variety grown this year is suited to your needs. Many experiments have proved the two-eared varieties of corn to be a little better than the best one-eared varieties all other things being equal.

In picking then, choose stalks with two good ears. These ears ought not to have a shuck shank longer than necessary to make the ear hang downward so the shuck will not catch and hold water. If you pick out long shank ears, your seed will tend to develop a sucker, like habit of shooting clear down to the ground, and will diminish the size of the ears.

Pick the two-eared stalks that have not too large stalk in proportion to the ear. Pick those that have been produced low on the stalk, by no means above the middle of the stalk.

Pick plenty out of your own crop for by doing this every year, you can raise seed that will suit your farm better than any you can buy. Besides you keep your money at home in your purse. Then, by choosing more than you may need you can go over that chosen in the fields, and choose again for quality of corn, for beauty of ear, for all the good points to be had in the different types of ear. Keep in a dry place but well ventilated, and as far as possible from extremes of cold. These points are more important than is usually thought, because they have much to do with the vitality of the seed, and, therefore, the power to make good corn next year. Seed well kept will come up very much better than when no attention to these conditions is paid by the farmer.

The next thing to do for a good crop next year is to cover every acre planned for corn with crimson clover. On average land fifty cents spent on crimson clover seed, so we put in as to get a stand, will fix in the land so treated three dollars worth of fertilizing material, better than that out of a stable or out of a fertilizer sack, if the clover is turned down after harrowing to cut up clover. Six hundred per cent gain on the investment. Deep full plowing on all soils having clay sub soils is also necessary to the largest yields.

**CATARRH SUFFERERS**

**Gets Immediate and Effective Relief by Using Hyomei**

Hyomei is nature's true remedy for catarrh. There is no stomach dosing—you breathe it.

When using this treatment, you breathe the healing balsam and effectively reach the most remote air cells of the throat, nose and lungs, the catarrhal germs are destroyed—quick and sure relief results.

Hyomei often restores health to chronic cases that had given up all hope of recovery. Its best action is at the start of the disease when the breath is becoming offensive, and constant sniffling, discharges from the nose, droppings in the throat, or that choked up feeling begin to make life a burden.

At the first symptom of catarrhal trouble, surely use Hyomei. Ask J. G. Hall for the complete outfit, \$1.00. He will refund the money if it does not give satisfaction. ad.

**FARMS FOR RENT OR SALE.**

I have several tobacco farms for rent or sale within four miles of the town of Wendell. There is no wilt in this section; a fine graded school at Wendell, and one of the best tobacco markets in the State. For further information, address M. A. GRIFFIN, sept. 6-St. Wendell, N. C.

**PARISIAN SAGE FOR THE HAIR**

If your hair is too dry—brittle—colorless—thin—stringy—or falling out—use Parisian Sage—now—at once.

It stops itching scalp, cleanses the hair of dust and excessive oils, removes dandruff with one application, and makes the hair doubly beautiful—soft—fluffy—abundant. Try a 50c. bottle to-day.

It will not only save your hair and make it grow, but give it the beauty you desire. For Sale by G. J. Hall, Oxford, N. C.

**Cure for Hog Cholera.**

S. T. Mickey, of Winston-Salem says there is no excuse for hogs dying with the cholera, and declares that if a very simple remedy had been used the sixty-five million dollars which the official report declares was lost last year by hogs dying from this disease could have been saved. Mr. Mickey's remedy is soft soap. All that is necessary to prevent a hog from having cholera is to feed it on corn dipped in soft soap.

Leon White, a well to do citizen of Poyner's Hill, Currituck county, was found in his bed one morning several days ago with a bullet hole in his head. He did not regain consciousness and was never able to tell anything about the tragedy.
