BUSINESS CONDITIONS

In the Fifth Federal Reserve District.

(Federal Reserve Bulletin)

At this particular season of the year, when the crops of this District have matured and have been gathered, or are approaching maturity, we find the estimated results somewhat at variance with previously expressed opinions and predictions. Droughts, heavy rains and light frosts in the past month, and perhaps more important than either, adverse conditions have shared responsibility for discrepancies.

Corn and Wheat.

While some localities report corn thus curtailed 20 per cent, the District as a whole should exceed last year's crop by 10 per cent. Wheat and other grains are satisfactory. Many farmers are holding grain, not yet convinced that food control, as announced, will prove workable. On the other hand, some shippers, using Norfolk as their most favorable port depot, find transportation facilities affected by railroad embargoes. In the light of scarcity of bottoms due to war contingencies, it is difficult to feel optimistic as to immediate relief in port conditions.

Potatoes and Tobacco.

The potato crop is reported as of increased yield with lower prices. Fruits, especially apples, are very satisfactory, both in yield and prices.

The tobacco crop will probably show cash results abnormally increased. Notwithstanding the fact that earlier in the season the fertilizer situation inspired some pessimism, the yield has been 15 per cent higher than last year and prices are not only exceptionally high, but fancy.

In the past few years seasonal campaigns have been attempted in farming communities for an earnest effort to increase our live stock supply, and reports show rather encouraging results in increased herds of cattle; hogs and sheep also show an increase. The crying need of meat supply, let alone the fancy prices now obtainable therefore, should, however, have produced a larger supply of live stock than our reports indicate as held.

Beyond all question, we believe the farmers of this district have every reason to be thankful for their position which is to be envied by other producers. It is true they complain of high costs, but the relative increase in the value of their products is much more favorable than that we can claim for any other class.

Scarcity of Labor.

It would be unwise to minimize the grave importance of the scarcity of labor, and while some of our crops have been already harvested we can hardly expect to escape loss through the inability of planters to gather the balance before adverse weather conditions prevail. Manufacturers may also expect difficulties until more labor is available.

The Beauty Secret.

Ladies desire that irresistible charm—a good complexion. Of course they do not wish others to know a beautifier has been used so they buy a bottle of

Juice of Lemons! How to Make Skin White and Beautiful

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quarter pint of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold cream. Care should be taken to strain the lemon juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, smoothener and beautifier.

Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It naturally should help to soften, freshen, bleach and bring out the roses and beauty of any skin. It is simply marvelous to smoothen rough, red hands. adv
