A Misconception of a Paragraph.

In an editorial brief which appeared in our last issue we spoke of the able Judge Brown being fought by the Southern Railroad for the nomination of Associate Justice of the Supreme court, and of the fact that he was fearless and could not be controlled by railroad influence, but dared to do his duty on the bench. We are sorry that a few of Judge Connor's friends seem to have construed this as a reflection on Judge Connor as it has never been intimated that he was being backed by the Railroads. How they could possibly have drawn such a conclusion we

We regard Judge Connor as a good man, and a man of high character and ability, and one of the truestmen in the State. In saying what we did we were simply advocating the man of our choice and who we think is in every way qualified for the position. We can assure those few who misunderstood our article that we intended no refliction on Judge Connor and did not even have him in our mind when we wrote the short article, In fact we cannot imagine how they could so have construed what we have said. There was certainly somest rubber tire buggy that rolls Richardson accompany "Alice and not the remotest reference to or intimation of such a charge. The charge (?) existed only in their imagination. They must have felt that the pleasure of a pic-nic, like some other pleasure of life, is more in anticipation than in realization. They had rare luck fishing, too. One among the number caught one fish. If they do not fish to better purpose in after years there will be a sad superfluity of bachelor girls in Oxford. By the way, does any one consider bachelor girls an improvement on old maids? It is said that the sadest words are: "It might have been." But bachelor is just as sad because it implies the same thing. It is to be hoped that these words will not cause any of our old bachelors, who may chance to read this, to become reckless and marry the very first opportunity. Sometimes it would be better if it
