#### Stay on the Farm.

No better advice can be given to people who are anxious to make a living for themselves and those dependent upon them. The earnest aim of all parents should be to give their children the best possible chance in life. To go to towns and put children in factories is to make slaves of them. It is to cut them off from all reasonable hope of health, education or promotion in life. But few great men have ever arisen from factory life. Thousands of the greatest and best men have come up from the humblest farm life. There is something inspiring and ennobling in the bright W L Ragland for Robert Kinton ... sunshine, the pure air, the blue skies, the towering mountains, the verdant vallies, the singing birds, the gushing ountains, the rippling streams, the majestic rivers. "Man looks through nature up to nature's God," and learns how to be purer and better.

overflowing. People get tired of the arm life. Part of the year they have to work hard. They do not handle much money. They think of the factory life, and of the money that comes into their hands at the close of each day or each week. They are charmed by the thought of handling money so often. But they forget that rent, fuel, food, clothing and all family expenses have to come from their small earnings. They forget that if they are taken sick that their wages stop and their expenses go on. Thousands of people have sold their stock and tools and have gone to factories, or other kinds of business. After a year or two of trial, they find they made a mistake. They would gladly return to the farm, but they cannot, because they have noth- WR Jones for Francis S Richards ing with which to begin farm work. I H Gooch for Rachel Swaney ...
