

"A SECRET."

One great secret of youth and beauty for the young woman or the mother is the proper understanding of her womanly system and well-being. Every woman, young or old, should know herself and her physical make up. A good way to arrive at this knowledge is to get a good doctor book, such, for instance, as the "People's Common Sense Medical Adviser," by R. V. Pierce, M. D., which can readily be pro-

Pierce, M. D., which can readily be pro-cured by sending twenty-one cents in one-cent stamps for paper-bound volume, or thirty-one cents for cloth-bound copy, ad-dressing Dr. R. V. Pierce, at Buffalo, N. Y. The change from maidenhood to woman-hood is one that involves the whole body. The strain at this time upon the blood-forming structures may be too great. Dis-orders of the functions peculiarly feminine are nearly always dependent upon de-fective nutrition. In all such cases Dr. Pierce's Favorite Prescription is just the Pierce's Favorite Prescription is just the vegetable tonic for the female system. "I cannot express my thanks for the benefit I have received from Dr. Pierce's medicines," writes Mrs. Julius Wehrly, of Cambridge, Dorchester Co., Md. "I took 'Favorite Prescription' and feel that a perfect cure has been effected. I feel like thanking you for the kind and fatherly letters which you wrote."

Dr. Pierce's Favorite Prescription was the first exclusively woman's tonic on the market. It has sold more largely in the past third of a century than any medicine for women. Do not let the druggist persuade you to try some compoun that has not had the test of so many years'

The newspapers are discussing the question vigorously in the hope of reaching the best settle ment of this important problem for the State. The matter grows more serious each year and the complaints of farmers particularly and others who are largely dependent upon hired labor have induced our Senators in Congress and our Governor to look carefully into the matter, and they are recommending in speeches Under and by virtue of the power given and otherwise the importation of de-

Thinking After School.

The schools are out, and graduates by the hundreds of thousands are thinking over their opportunities and prospects for the future. Some ended their education in the high and grammar schools and others have finished at college. Both classes will probably find themselves at loss which way to turn for occupation. The main Education provides the "open door" to success, but the individual must Sun. take chances in the throng which has already passed in, and not be too greedy for a front seat at the first

In an old poem two careers typical for the present, as well as of the past, were presented in homely rhyme. One school graduate "shingled the barn and mended the fence," then landed in the governor's chair. His more brilliant brother developed into an orator and a politician and made an early failure. There is always humble work to do, and the doing of it well or ill is a test of one's tools and capacity for using them. Education provides the tools; skill and application must come
