

The American farmer is the greatest man in the world to-day because he is master of the soil—he is gaining in intelligence quite as rapidly as his products are increasing in magnitude. Our recent combines of capital in United States measured in money are enormous, yet such figures sink into insig-nificance when compared to the money. nificance when compared to the money, brain and brawn invested in agricultural industries. For instance, the farmers of Minnesota and Dakota have received \$300,000,000 for their products in a single year. The farmer knows what Nature will bring forth for him from his experience in the past. He knows if certain seeds are planted and properly cared for that Nature will take care of the rest. In the same way you are master of your own destiny.

Providing your blood is in good order, it
only needs a little effort on your own part
to keep healthy and strong—rid your body of the poisons that are apt to accumulate and your system is ready to ward off the attack of the germs of disease. Dr. Pierce's Golden Medical Discovery makes rich red blood—by increasing the number of red blood corpuscles. There is no alcohol in this great tonic to shrivel up the red blood this great tonic to shrivel up the red blood corpuscles. As an alterative extract, made only of herbs and roots it goes about its work in nature's way. It stimulates the liver into proper action, and feeds the worn-out nerves, stomach and heart on pure blood. Used for over a third of a century it has sold more largely than any other blood medicine in the United States. More bottles of Dr. Pierce's Golden Medical Discovery are sold to-day than ever before— that is a true test of its medicinal value after thirty-eight years of deserved popularity. Dr. Pierce's "Medical Adviser" sent on receipt of stamps to pay for mailing only.

Workmen from the northern sections of Spain are sought by the Cuban planters because they are best adapted for the climate. They stand the work and are more law abiding and peaceful than immigrants from other lands. They come empty handed and are content to toil and take humble fare. Recently large proprietors have been enlarging and improving their estates, and increased production brings on a serious labor problem, with threats of a famine, unless workmen are speedily imported.

Persons wearing dirty clothes are warned by a sign at the gate to keep out of the botanical gardens at Sydney, Australia. "We don't want a laboring man to come here in his working clothes," a keeper explains, "We want him to go home and put on clean clothes and bring his family here looking neat and clean and have a good time. That makes the surroundings more cheerful for everybody concerned." Candidly the "unwashed" man would find himself very much out of place and decidedly uncomfortable in a holiday crowd.

A writer in the current number of the Engineering Magazine suggests that the Niagara cataract may be preserved and yet allow the river to be utilized by developing the water power of the whirlpool rapids below the falls. From the foot of the cataract, this writer says, to Lewiston, five miles downstream, the river descends 100 feet and develops 2,500,000 horsepower. which would provide all the energy that could be utilized within 300 miles of the falls in the next half century at

General Joe Wheeler denies that he intends to take a commission in the czar's army in Manchuria, This display of self restraint on the part of an American who has made good use of three commissions already should be glad tidings for Marshal Oyama.

Garrett P. Serviss, the popular science writer, says that the coming eclipse of the sun is a greater event than the war. Up in Russia some folks think that the war is the biggest eclipse that ever happened.

> Gomez Won Honor Among Strangers. Although Santo Domingo was the birthplace of the late Maximo Gomez, free Cuba can honor him as her own, for his life was given to her liberation. The best part of his manhood was passed on the island, except for long intervals of exile, forced upon him in punishment of his political activity. It was not solely the fighting career of Gomez which gave him the title of liberator. In the troublous times following intervention by the United States the unselfishness of the old soldier, coupled with his broad views of the needs of the state, helped to bring about the present promising condition of Cuba. His personal influence in the coming national election was counted upon as a deciding force in the re-election of President Palma.

An American student who is getting a higher education at Oxford on a Rhodes scholarship declares that he finds the English student at Oxford vastly better read and better prepared for a broadly intellectual life than the American scholar. The reason given is one that our educators may ponder over and is to the effect that the preparatory school system of this country is so conducted as to give a boy a smattering of everything, but no strong foundation for later endeavor. In England, on the contrary, elementary education is simple, but solid.

The statement from the United States mint that there is now more money in circulation than ever before strikes some people as a "glittering generality." But it is all right. Money in circulation is not in the pocket anyway not in the pocket of him that

of the state of Afghanistan and its dependencies," and hence Amir Habibul lah is the first ruler of Afghanistan with sovereign rights. The next step will be diplomatic representatives of the amir in London, an event not long to be delayed.

A Year of Volcanic Disturbances. The present year is likely to be remarkable for the number of its volcanic disturbances, not alone on land, but in different parts of the deep sea. Vast tidal waves have already been reported from various quarters of the globe. The terrible earthquake disaster in northern India in April was followed by shocks of lesser violence in both hemispheres. A startling marine phenomenon in the Indian ocean was also one of the sequels of the great upheaval in April.

Recently the coast of the Indian ocean was covered by a vast shoal of dead fish, which lay piled up in hundreds of tons and had to be removed to prevent a pestilence. A British navigator who was in the middle of the ocean shortly before the fish were washed ashore says that the surface of the sea was for some time illuminated in all directions by mysterious flashes which proceeded apparently out of the water and for which he was experience at sea.

Admiral Togo says, "Quick and simple action is the only way to succeed." That is not a new philosophy, but only another way of putting Davy Crockett's not years in which to study the right and the wrong way of smashing into simply went ahead and did the job up sols at NET GOST.
