WATCH YOUR FINGERS.

Each one of Your Digits Has a Meaning and Shows Weakness of Character.

(Chicago News).

Every finger has a meaning of its own; always the same and always recognizable, even though not always noticed.

The first of the political demagogue and the curling little finger of mimicry at 7 o'clock tea are equally full of significance, according to a lecture given late yesterday at a class in public speaking at the University of Chicago by Frederick Mason Blanchard, associate professor in the University. The meaning of fingers was explained more fully today by Professor Blanchard.

"The use of the different fingers in gestures is of the greatest importance," he said. "The voice of a speaker may be likened to the solo of a stager, and the gestures may be taken to represent the accompaniment. I spoke of the class yesterday on this subject because of the one-fingered gestures made by one of the students. This young man in a five-minute speech, waved his arm 37 times by actual count, and each time he pointed with index finger, thus confining his gestural meaning to only one kind of explanation.

"Part of what I explained to the students is included in writings on the theories of Delsarte. It is a well-established psychological fact in the theory of speaking that the index finger is for pointing out one thing in particular. If a speaker mentions, for instance, the Mississippi Valley with a gesture that shows only this finger he falls in the full meaning. We should use the open hand.

"The second finger is the finger of intellectual force. The use of this and the forcible pointing to the index finger, give the significance of one particular thing. It may be combined with the use of the thumb, which signifies brute force.

"The first gives the idea of force in a more emphatic fashion, but with a difference."

Here Professor Blanchard doubled up his hand, clasping the fingers with the thumb, and menaced the inoffensive atmosphere.

"This means that if you oppose the speaker you are going to be hit," he explained. "It is brute force alone. But the idea is contained in the thumb, though not so strongly, and by combining the thumb and the intellectual index and second fingers one gives the same idea with the added meaning of intelligence that is backed by the power of the thumb.

"There is a tradition with actors that the curse of Cardinal Richelieu must be delivered with the hand upraised, but without the use of the third and fourth fingers. For all I know to the contrary, it may be a custom of the Roman Catholic Church to present the idea of the Holy Trinity and its power by the use of these three fingers on such an occasion, but I believe it is also true that no actor would make gesture in a different fashion. It has the rule of psychology behind it.

"In contrast to the index and second fingers the third or ring finger tells of affection. The other fingers are not used in a caress. The whole hand is used, but the third finger is brought forward and it is the one that strokes the face or hand of the person to whom affection is to be shown.

"This finger always bears the engagement and wedding rings. There may be objection made that the placing of the rings on this finger is merely a custom, but even if that is so there is some reason for the origin of the custom. The reason here, I believe, is wholly psychological. The third finger is the finger of affection, and must always remain so."

"There is no strong emotion left for the little finger to show," continued the educator. "I have noticed that Dr. Campbell, of London, uses the little finger as an index, but I do not know that it is anything more than a mannerism. The use is ordinarily different. The little finger denotes delicacy. It is separated from the others and is not required to emphasize the meanings of the stronger fingers.

"The little finger also shows intuition. A woman will hold this finger curled away from the others, but a man who does not care much for delicate meanings, will let it fall in line with the others. Thus it will measure the difference in temperament between different persons.

"I can see the character of an un-instructed student by the way he holds his fingers. If he gestures naturally with the thumb and index and second fingers together, I know that he is a forceful person. If he lets his thumb fall within the palm of the hand I can see that he is not insistent. The thumb of a weak man is not closed over the fingers. The thumb of a dead body or of a the palm of the hand. In a conscious living person, the strong vital force is shown in this way."

1. A County Convention of the Democracy of Granville County is called to meet at 12 o'clock M., Saturday the 2nd day of July, 1910, at the Court House in Oxford for the purpose of nominating candidates for Legislative and County offices, and for selecting delegates to the State, Congressional and Judicial Conventions.

2. The candidates for Senator, Representative, Sheriff, Treasurer, Register of Deeds, Coroner, Surveyor, and County Commissioners will be nominated by a vote of the people in their respective precincts on Saturday, the 25th day of June, 1910, by ballot either printed or written or partly printed and partly written.

Every Household in Oxford Should Know How to Resist it. The back aches because the kidneys are blockaded. Help the kidneys with their work. The back will ache no more. Lots of proof that Doan's Kidney Pills do this. It's the best proof, for it comes from Oxford.

Ernest Harper, Orphan Asylum Home, Oxford, N. C. says: "I can recommend Doan's Kidney Pills in highest terms, being fully aware of their merit. My kidneys were disordered for a long time, causing constant dull pains across my back. I also had a difficulty with the kidney secretions. When Doan's Kidney Pills were highly recommended to me I procured a box at R. L. Hamilton's Drug Store and began their use. I was entirely relieved of the backache and my kidneys were restored to a normal condition. I now feel much better in every way."

CORTRIGHT METAL SHINGLES

WHEN Cortright Metal Shingles were first introduced (24 years ago) you had some excuse for being sceptical: But now—

If you are sceptical it can only be because you do not know the facts in the case. They are used today from the Atlantic to the Pacific for all kinds of buildings, under all conditions. They are fireproof, stormproof; never leak and last as long as the building itself without needing repairs.
