**A SANITARY INSPECTOR NEEDED FOR OXFORD**  
 Oxford already has a sanitary inspector in the person of the Chief of Police but with all his other duties to perform, it can be readily understood that it will be impossible for him to look as closely after sanitation here in Oxford as the safety of the town demands.

A whole time inspector is needed. The town formerly had a scavenger system with the open back surface privy. When the State wide sanitary privy law superseded the local sanitary laws, the scavenger system was discontinued and necessarily so, as under strict compliance with the law such a system would be unnecessary and inapplicable.

Many pit privies have been constructed which barely conformed to the standard of sanitary privy. When so constructed they need the constant attention of a sanitary inspector, because by the flimsiness of their construction they soon are not sanitary. Some recent inspections reveal a great need of something being done with some one behind the doing of it all the time.

No town is any cleaner than its citizens; on the other hand, no citizen content to be surrounded by filth is any cleaner than his surroundings. Therefore, I am expecting many of the citizens of this town to support the demand for a whole time inspector. Such an agent surely will cost money. But he will not cost as much in dollars as will be the cost in sickness expenses and burials, if the conditions are not followed up with a persistence that will not admit of any other duties.

If any man thinks because his house and premises are clean that he is therefore safe, he has a delusion. There are plenty of people in the town satisfied to almost sit in filth; and they are so close by the cleanest in the town that it is as though all were foul—almost.  
 The duties of the Health Officer are such as to nullify the corrections made by what inspections he may make because he has no time to follow up and compel the careless to protect the careful and himself.  
 Last summer we had myriads of mosquitoes bred in these privies called sanitary. This should not be. If they were frequently inspected, this might be corrected. Every one of them were told how to prevent it, but telling them is not enough. This class must be driven to do what they believe is an imposition. A whole time inspector can correct this; and though he will cost money, what he will be able to save will be worth more than dollars.  
 J. A. MORRIS, Co. H. O.  
 Got the Poor House Frame. (Asheville Times)  
 Mrs. Taylor, the only woman who ever went over Niagra Falls in a barrel, has gone to the poor-house. It is reported that she has no friends. We suppose that people got tired of hearing her talk. If you stop to think of it, it would be a good deal of a trial to live in the same house with the only woman who ever went over Niagra Falls in a barrel.

**WOMAN LAWYER TO DEFEND WOMAN CHARGED WITH MURDER OF ANOTHER**  
 For the first time in the history of the New York Courts and probably in the history of the country, a woman lawyer will defend a woman accused of the murder of a woman. The woman attorney is Miss Theresa B. Dublin, of New York City, and her client is Mrs. Donatella Massiella, of Corona, Long Island, accused of having killed Mrs. Concett Altieri, a neighbor. Mrs. Massiella, when first arrested, pleaded for one of her own sex to defend her. Miss Dublin, who was admitted to the bar last year, was assigned to the case.

As the Year Marches  
 When the north wind does not blow in February, it will surely come in March.  
 When March is like April, April will be like March.  
 If March comes in like a lamb, it goes out like a lion; if it comes in like a lion, it goes out like a lamb.  
 March winds and April showers bring forth May flowers.  
 February makes a bridge; March breaks it.  
 The first three days of March are unlucky days—days on which no farmer would sow his seed.  
 A damp March gives sorrow to farmers.  
 When the cat lies in the sun in February, she will creep behind the stove in March.  
 It is the common belief that the month of February should have a course of snow, rain and sleet in order that all the powers of humanity may be exhausted before the commencement of March when an opposite kind of weather is looked for.

**Good Judges.**  
 (Monroe Journal)  
 The old time preacher who made long trips on horse back or in buggy, over bad roads were, as a rule, splendid judges of a good horse and could not be fooled about the value of an animal. They were good judges of men, too, and were most discerning for as The Southern Ruralist points out the old time preacher always wanted to go home with the man who had driven a fat horse to church, for he knew that the man who kept his horses fat had plenty around him and was a good provider.

**BURLEY ASSOCIATION DROPS THE TOBACCO CUT PLAN**  
 Sixty Per Cent Of the Growers Would Not Sign Pledge.  
 A special from Lexington, Ky., says: Plans for curtailment of the 1921 crop of burley tobacco were abandoned by the Burley Tobacco meeting here today. The reason given was that it was impossible to get 60 per cent of the growers of the district to sign the pledge.  
 The proposition to curtail the crop 50 per cent in the coming season was voted on at a meeting of the growers here Feb. 22. It resulted from the heavy drop in prices under those of last year and agitation for a "cut out" of the 1921 crop.

**The Oldest Joke.**  
 It is claimed that the oldest joke is the one about the English tourist who was out walking in the north of Ireland and who stopped at a little farmhouse and asked for a drink of milk. The milk was brought to him in a large bowl, and the Irish-woman who was carrying the bowl was followed by a small pig that was squealing noisily. The Englishman took a deep drink of the milk, but was annoyed by the pig rooting at his legs and grunting.  
 "What is the matter with the pig?" asked the Englishman.  
 "Oh, don't mind him, sor," was the reply. He's jealous, that's all, because you are drinking out of his own wee bowl."

**BEAVER BOARD FOR BETTER WALLS & CEILINGS**

**Make a Clean Job of It WHEN YOU REPAIR OR REMODEL**

See how easily you can cover up old dingy cracked walls and build-in permanently new rooms all over the house—all without muss or litter. Quite a contrast between doing your repairing and remodeling with clean panels of Beaver Board than trying to get a permanent job with messy lath and plaster.

Now you can use Beaver Board and put it right on top of the old walls and ceilings. With Beaver Board you can make usable rooms out of useless spaces in attic and basement.

Then, too, it is as good for the new home as it is for remodeling the old one.

Beaver Board is a new form of lumber. It's built up from the strong clean fibre of the spruce tree into large sturdy panels of knotless, crackless manufactured lumber. It's moisture-proofed by a patent Sealite process that prevents warping. Beaver Board will last as long as the building.

You owe it to your home, old or new, to see us about Beaver Board now.
