Authorities On Lying.

Anita—A fib is the same as a story, and a story is the same as a lie.

Nelly—No, it's not.

Anita—Yes, it is, because my father said so, and my father is a professor at the university.

Nelly—I don't care if he is. My father is an editor, and he knows more about lying than your father—Blighty.

A Helpful Hair Hint

A lady visiting friends says "Parisian Sage is the best thing I have ever used to make my hair wavy, lustrous and abundant. It keeps away all dandruff and stops itching." J. G. Hall sells it with guarantee of money back if not satisfactory.

NEW BULLETIN TELLS BOYS AND GIRLS HOW TO GROW AN ACRE OF POTATOES

When a boy or girl in a potato-growing club succeeds in raising tubers at the rate of 300 to 600 bushels per acre, as many of them have done, it is a source of inspiration to other members of the club who are less fortunate, and what is perhaps of greater importance, an object-lesson to their elders as to what can be accomplished when the crop is given proper attention. To guide boy and girl club members, as well as their elders, in producing bigger potato yields, the United States Department of Agriculture has recently published Farmers' Bulletin 1190, "How to Grow an Acre of Potatoes." It is prepared especially for use in boys' and girls' club work, and every step from the selection of the potato soil to the harvesting, grading, and storing of the crop is discussed.

Gravelly or sandy loam soils are generally considered especially well adapted to the production of large crops of potatoes, provided they are well drained and well supplied with plant food, says the bulletin. A very light sandy soil or a stiff clay soil should be avoided. The ideal soil is one that does not run together with rains, that works easily, is well supplied with humus, and while well drained, is naturally supplied with moisture. Clover and alfalfa are regarded as the best preparatory crops for potatoes.

Prepare the Land Thoroughly. Potato soils should be plowed as deeply as possible, but always remember not to turn up more than an inch of the subsoil. The fall is the best season to plow. When the land is plowed at this time it should be disked and harrowed as early in the spring as possible to conserve the moisture and to prevent weed growth. Spring plowed land should be disked immediately, in order to prevent the possible packing of the newly turned soil. In preparing the seed bed spare no pains to put in good condition. If the crop is planted on land that is poorly prepared no amount of subsequent cultivation will entirely remedy the defect.

Use the Best Seed. Select the variety that is known to be adapted to the section. Use the best seed obtainable, and if possible make sure that it has been produced from strong, healthy plants that have developed a goodly number of tubers of even marketable

size and uniform shape. Before planting, the seed should be disinfected with formalin solution to prevent potato scab. Better yields obtained by the use of from 15 to 18 bushels of seed per acre, though the average for the United States is 8.0 bushels. Cut blocky seed pieces, weighing from 1 to 2 ounces each.

After planting keep the surface of the ground loose until the plants appear, then deep cultivation should begin, but as the crop develops shallow tillage is recommended. Insects and diseases should never be allowed to get established, but should be controlled by suitable fungicides and insecticides such as are described in the bulletin. When the crop is being harvested, a systematic effort should be made to select desirable tubers for next year's seed.

Brotherly Love.

(Kansas City Star.)
How we Americans do love each other! You get into ordinary conversation. All of us convinced we are being robbed by somebody else. Our next door neighbor is a good fellow personally, but as a business man we know he is a pirate.

The salaried man is suspicious of his employer. He knows his grocer is a conspirator. As for the store down town where his wife trades, he calls it the daylight robbery. So, too, the dealer in notions looks darkly on the clothier. Both the clothier and the fiction man blame the jobber and the farmer. The farmer is convinced he is the victim of the boards of trade. The Wall street broker is certain the country is being held up in the price of eggs and meat.

With all this brotherly love so widely spread, isn't it a good deal of a miracle that the country is able to rock along and not fly to pieces?

—The young fellow who is sowing his wild oats is enough of an optimist to believe that there is going to be a crop failure.

HUNTINGTON MAN GAINS 25 POUNDS

"I'm Just Brimful Of New Life And Energy Since Taking Tanlac." He Says.

"I know it sounds unreasonable, but I have actually gained twenty-three pounds by taking three bottles of Tanlac," said Henson Adkins, 1338 Madison Ave., Huntington, W. Va.

"I don't believe anybody ever suffered with stomach trouble more than I did. What I ate would cause gas to form and I would beat breath away and I was so nervous I couldn't sleep well at night. I had such severe pains in my back that sometimes when I'd stoop over it would nearly kill me to straighten up again. Headaches almost drove me crazy and often I got so dizzy that everything seemed to be going round and round. I felt tired and worn-out all the time and didn't have a spark of energy left.

"After taking three bottles of Tanlac I am feeling like a new man. I have a fine appetite and eat anything I want without suffering afterwards. My food is building me up, for I have gained twenty-three pounds. I haven't a sign of indigestion, gas, shortness or breath, headaches or any of my old troubles. My nerves are in perfect condition and I sleep like a log all night and wake up in the morning feeling fine. I no longer have that tired and worn-out feeling and am just brimful of new life and energy. It is certainly fine to be as well and strong again after all those years of bad health and I am boosting Tanlac to everybody."

ECZEMA!
Money back without question if ELLIOTT'S Salve fails in the treatment of ITCH, ECZEMA, RINGWORM, TETTER or other itching skin diseases. Try a 25 cent box at our risk.

The Color Question In Oklahoma.

(Oklahoman.)
Can a cow be red and at the same time have a brindle neck, a black head or any other distinguishing color markings such as darker lines around her red body? On this question a jury in the Kay County district Court pondered all day and finally told Judge Bird that it could not reach a decision. A bank as plaintiff had a mortgage on a red cow. The cow's owner is said to have become hard up financially and left the country after selling the cow. The bank tried to take the cow from the new owner, who set up the defense that his cow is not red but a red brindle, in that her head is darker and she has darker stripes around her body. Five of the jurors held out for the defendant.

Kill That Cold With

HILL'S CASCARA BROMIDE QUININE
FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is Best Tonic Laxative—No Opium in Hill's.

ALL DRUGGISTS SELL IT

To the motorist who has quit guessing about tires —

ALONG about this time of year a man finds his motoring neighbors getting anxious about their tires. With folks expecting old tires to "pop" any minute, there comes the question of what kind of new ones to buy.

U. S. Tires are answering a lot of questions like this nowadays.

The U. S. Tire following embraces two kinds of tire buyers.

Those who started with quality first, and have never bought anything else but the quality standard tire.

Those who came to quality first only after dabbling with "bargains," "rebates," "job lot" and "surplus stock" tires.

Getting one hundred cents value on the dollar in tire buying is a straight-forward business proposition—not guess-work or a game of wits.

The most essential man for you to know today is the local U. S. Tire dealer who is concentrating on a full, completely sized line of U. S. Tires.

He gets his U. S. Tires straight from his neighboring U. S. Tire Factory Branch—one of 92 such Branches established and maintained all over the country by the U. S. Tire makers.

He is the man who can give you fresh, live tires—not stuff shipped to him from some point where it did not sell, but new tires of current production.

Giving the same quality, selection and price-advantage to the owner of the medium weight car as the big car owner gets. With equal service and buying opportunity whether he lives in the smaller localities or the greater centers of population.

THE U. S. NOBBY TREAD

Where the going is specially heavy with snow, mud or sand, in hilly country where maximum traction on the road is a factor, no other tire tread yet devised is quite so effective, or so wholly approved by motoring opinion, as the U. S. Nobby Tread.

Its very simplicity—two diagonal rows of oblong studs, interlocking in their grip on the road—is the result of all the years of U. S. Rubber experience with every type of road the world over.

"The most essential man for you to know today in the tire business is your local U. S. Tire Dealer."
