FORD PLANT BUILDS 108,862 IN JUNE Demand Exceeds Output As Ford Breaks All Previous Records— During the month of June, the Ford Motor Company, thru its Detroit Factories and 22 Assembly Plants throughout the country reached the production of 108,862 Ford cars and trucks, setting up a new high record for one month. Production of Ford cars and trucks has been steadily increasing since early spring, and shows substantial gains over the same period last year. The second quarter of 1921, viz. April, May and June shows an output of 301,796 Ford cars and trucks against 220,878 for the same three months of last year, or a net increase of 80,918. Despite the fact, however, that the Ford Plants have been running at maximum capacity the demand for Ford cars and trucks is not being met, and at the present time, many thousand unfilled orders have been piled up ahead so that Ford sales are still limited by manufacturing facilities rather than marketing possibilities. Particularly is this true with respect to enclosed cars, for which the demand has been unusually heavy. One reason cited by the Ford Officials for the unprecedented demand for Ford cars in the present tendency toward economy. Many of those whose names have been added to the long list of buyers might well have afforded larger and more costly cars than the Ford, but it is the belief that most prospective motor car buyers are investigating all of the costs incident to motoring much more carefully at any period during the past five years. The estimated output of the Ford Factories for July calls for 109,000 cars and trucks, or a production of 4,360 a day for 25 days. Since the assembling of cars is being handled during an eight hour work day only, the hourly output will be 545 cars. In other words, one Ford car or truck leaves the assembly line every 6 1-2 seconds.

666 has more imitations than any other Fever Tonic on the market, but no one wants imitations.

NOTICE TO THE PUBLIC The County Board of Education at the regular July meeting, which will be held Tuesday, July 5th, will take into consideration the question of making the rate uniform on all special tax districts, and of apportioning the amount resulting from this uniform rate on all special tax districts to the various schools in these districts according to the number of teachers and the average attendance. If this is done this uniform rate cannot be greater than the lowest maximum rate voted by any district which is fifteen cents on the hundred dollars valuation of property and forty-five cents on the poll. There are many advantages in this method of distributing the special tax which cannot be discussed in this short notice. The Board of Education will be glad to have in attendance at this meeting all who are interested and would like to express their views on this question. This would not include the Oxford Graded School district which operates under a special charter. F. M. PINNIX, Chairman. J. F. Webb, Secretary. 6-28-2t
