Pitching Horseshoes.

Pitching horseshoes is a first-class game for farmers' picnics, holiday celebrations and times when work on the farm lets up for an hour or so. In the last year or two there has been greatly increased interest in the game and county, state and national championship contests have been held. Each district generally has its own set of rules. However, those who want to conform to national standards may be interested in a summary of the rules put out by the national association:

The standard distance between the pegs is forty feet. The pitchers' box extends three feet on either side, to the rear and in front of the peg. The pegs are at least one inch in diameter and stand 8 inches above the ground.

The shoes used must not exceed 7 and a half inches in width. The toe and heel calks must not be more than 3-4 of an inch in length. The opening between the heel calks shall not exceed three and a half inches inside measurement. No shoe is to weigh more than two and one-half pounds.

The regulation game consists of 21 points, although games at national tournaments consist of 50 points. A ringer scores three points and a double ringer six. The shoe closest to the peg scores one point; and if both shoes are closer than either of the opponents, two points are scored. All equals are counted as one. That is, if both contestants have one shoe at equal distances from the peg, they are tied and the one having the next closest shoes scores one point.

In some sections it is the local practice to count a leaner as scoring two points, and to give double credit for a ringer which tops a ringer thrown by the first man to pitch. The national standards, however, eliminate the leaner entirely and merely classify it as a close shoe, which can only score one point, and provide that each ringer count as three points, regardless of the order in which they are thrown.

The national standards are a bit more severe as to disqualifying poor throws. They provide that any pitcher delivering a shoe outside the pitcher's box forfeits the value of that pitch, and that a shoe that does not remain within 8 inches of the peg is not entitled to score.—Wallace's Farmer.

Edisons Health Rule.

Edison says he owes his good health to never wearing tight collars, tight shoes, belts, or anything that interferes with the circulation of the blood. As we remember it the country has made some progress in the matter of garters. Forty years ago everybody who kept his socks up used the tight elastic circular band. While the modern garter you buy in the stores isn't a great deal better, it only cuts off part of the circulation. The women wear something that doesn't bind at all, but it fastens onto a corset.—Cappers' Weekly.

The Corn Cob Comes Into Its Own.

(Anderson Daily Mail.)
Scientists are reported as having stated that under correct treatment corn cobs will produce pitch, acid tar, charcoal, wood alcohol, formic acid, pure acetic acid, paper pulp, a lot of other things and rurrural, a rare chemical with a market value of \$10 a pound, and that experiments may even lead to the use of cobs as a source of sugar. And all of this may be true, but it sounds an awful lot like a statement made by Old Corn himself.

Travel In Comfort.

(From The Topeka Capital)
Beggars, traveling in automobiles, were reported in this section of the State recently. One family of man, wife and two children, traveling in a large car, stopped at several places along the road in the Oteo country, south of here, and asked for food, stating that they had not eaten in two days' time. Other places were solicited, the occupants of the car retting gasoline and oil in addition to food.

I. Timothy, V. 23.

(From The Waterbury American)
It's awful good of Collector Eaton to allow families to make 200 gallons of wine for their own use. But we don't know what Wayne Wheeler and Chief Anderson will say about it. It will be necessary to declare in advance to the internal revenue office the intention to make the wine or else the possession of it, if discovered later, will be in violation of the law. They will make a sensible temperance law out of this prohibition thing if they keep on.

NOW IS THE TIME TO BUY THAT wire fence and barb wire you been waiting to buy.

It is at the bottom. Our figures will prove it. SAMUEL DAVIS, Clarksville, Va.
