

**GIGANTIC FEATURE IS ADDED TO BIG CIRCUS**

**Ringling Bros. and Barnum & Bailey Program Includes Europe's Great Wild Animal Show.**

With Europe's biggest trained animal show as one of many splendid features, the Ringling Brothers and Barnum & Bailey Combined Shows will exhibit afternoon and night at Raleigh, Thursday Oct. 13.

This marvel circus of 1921 offers the greatest congress of attractions in history. Without eliminating any of the thousand thrills produced by hundreds of the most skillful men and women performers, the Ringling Brothers have added, without additional charge, the most sensational of wild beast displays. Not only will you see the artists who occupy the three rings, five stages, the great hippodrome track and the aerial rigging in the tent top, but four spacious steel arenas filled with wild beasts as well.

Tigers riding peacefully on the backs of elephants, black-maned African lions springing to and from

galloping horses, great troupes of polar bears walking ropes or playing at see-saw, leopards jumping through hoops of fire—these are some of the marvelous things that these wonderful animals do. While these beautiful creatures are under absolute control, they are presented only in great arenas of steel. Elsewhere in the main tent you will see camels performing much after the fashion of horses—an act never before presented anywhere. There are five troupes of trained seals, whole beives of remarkable dogs, monkeys, pigs and pigeons. Twenty-six elephants will perform at one time. Others will do tricks at the top of high pedestals and others circle the entire tent, kicking footballs as they go. Splendid groups of trained stallions, Shetlands and menage horses form another feature. Aside from the dumb actors are fully 600 men and women stars, and nearly 100 clowns. A gorgeous, tournament opens the program. The menagerie, which is entirely separate from the animals used in the circus performance, is the biggest ever traveled.

—More garages than dwellings were built during 1920 in the United States.

—Jumping into a partly filled silo instead of using a ladder caused the death of a farmer living in Nebraska. He was overcome by gas and died before rescuers arrived.

—Hot water gushed from a well driven near Sebring, Florida, and is coming to the surface at the rate of 40 gallons a minute. The flow has maintained an even temperature of 130 degrees and shows no signs of abating. This is the second hot water well brought in Florida, one having been drilled at Pensacola about 20 years ago. The first well ceased to flow when the drill broke through rock and diverted the water into a subterranean lake.

**666 quickly relieves Constipation, Biliousness, Loss of Appetite and Headaches, due to Torpid Liver.**

—A homing pigeon is claimed to have recently broken a world's record by covering the 614 1-2 miles between Chicago and Beltsville, Maryland, near Washington, D. C., in 27 hours elapsed time, which means less than 16 hours actual flying. The bird bore a message from Mayor Thompson to President Harding.

**TO DETECT CRIMINALS**

**French Detective Invents Two Sciences to Do Work.**

**Poroscopy and Graphometry Promise to Make Way of Transgressor Harder Than It Is.**

Paris. — Poroscopy and graphometry are two new "sciences" intended to make the way of the transgressor harder than it is. Poroscopy is the science of measuring the pores of the body. Graphometry is the science of form and relative proportion of letters in handwriting.

Dr. Edmund Locard, head of the Lyons police laboratory of identification, has elaborated these new methods of crime detection to a point where the results have been accepted in the Lyons courts and are said to have been proved effective.

In poroscopy, Doctor Locard holds the number, form and position of body pores remain the same throughout life. The impression of the pores in Doctor Locard's system is colored by chemical vapors or very fine powders so they may be photographed under a microscope.

Doctor Locard tells of several successful prosecutions supported by his new sciences. In one case a burglar wore gloves, but left an impression of a small surface of forearm. That trace convicted him. Another burglar, perspiring freely, left the impression of pore surfaces through his gloves and went to jail.

Graphometry, as termed by Doctor Locard, consists primarily in the theory that handwriting shows always a certain relation in size between letters and unmistakable characteristics in form, particularly in loops. In addition to these principles Doctor Locard, of course, utilizes generally accepted methods of detecting forgeries.

**WHEN BAVARIAN GIRL WEDS**

In Bavaria, when a girl marries, the whole world must know about it. That is, everyone in the village, town or city in which the bride lives must know or hear about it. Furthermore, it is not enough that everyone hears the happy tidings, but everyone must see all the gifts, and all the household effects that the bride is bringing her new husband. How and when this custom started no one in Bavaria seems to know. At any rate the custom has existed for generations.

Every bride must bring her husband a cow. The cow is the gift of the father of the bride. In the procession, which follows the wedding, the richly decorated cow walks with the bride as shown in the picture.

**RESTORE OLD INDIAN CAMP**

**Base Lake Colony Would Put Tecumseh Village in Indiana in Original Condition.**

Winamac, Ind.—An effort to restore the old Indian camp of Tecumseh, near Winamac, is being made by the women of the summer colony at Bass Lake, near this city.

An application for incorporation of the village has been filed with the secretary of state. In the meanwhile a 50-foot roadway has been projected along the meandering shore line at Indian Point on Bass lake, with a 60-foot parkway at the side. Winamac business men have endorsed the plan.

With the organization of a forest preserve district it is hoped the old Indian camp can be completely restored.

The Bass Lake Boosters' association is headed by Mrs. Nora K. Spauld, Chicago.
