

# J. A. PETIGO

Professional Piano Tuning and Repairman.

Leave orders with J. ROBT. WOOD, Oxford, N. C.

Humphries, a Church Builder. (Wichita Falls Record-News.) Colonel Albert A. Humphries is going to build a \$100,000 church in the city of Mexia and a \$100,000 Y. M. C. A. building. Colonel Humphries is said to be worth \$400,000. He made it in Texas. He is a petroleum hunter. Colonel Humphries had a lean pocketbook when he came to Texas. Now he has a bank roll as large as the State of Rhode Island and he says the Lord gave it to him.

Money back without question if HUNT'S GUARANTEED SKIN DISEASE REMEDIES (Hunt's Salve and Soap), fail in the treatment of Itch, Eczema, Ringworm, Tetter or other itching skin diseases. Try this treatment at our risk.

J. G. HALL, Druggist

## BIRDS FLY EIGHTY MILES PER HOUR

Certain species of hawks have a speed of 80 feet a second, or about 136 miles an hour, says the Biological Survey of the U. S. Department of Agriculture. This might be a suitable rate for a racing airplane. The canvasback duck can fly from 130 to 160 feet a second, but its usual rate of 60 to 70 miles an hour would be pretty fast to be enjoyed in a plane making a pleasure trip. The crow is the least rapid of a list of 22 migratory birds, flying an insignificant average of 45 feet a second, or 30 miles an hour. Of course this speed maintained steadily in an automobile would mean a very fair rate of progress, defying the speed laws in many communities. Most of the birds listed, however, do better than the -crow. Curlews and jacksnipes can fly 55 and 65 feet a second, while quails, prairie chickens, and ruffed grouse can make 75 feet a second, or 63 miles an hour, although its usual rate is less. Redheads, bluewinged teals, green-winged teals, Canada geese, and different varieties of brant can fly over 100 feet per second, ranging in speed from 68 to 998 miles an hour, but usually fly at a much slower rate.

### The Letter Day Farm

History is continuing to repeat itself in the matter of new departures in things that cause a break-away from the old established order. Nothing was fought harder in this State than the no-fence law. The legislators responsible for its origination—Capt. S. B. Alexander, of Mecklenburg, and Col. Paul B. Means, of Concord—paid the penalty in political decapitation. But in the course of a few years, the farmers were willing to fight for the no-fence law. In like manner, the good roads law was combatted. The Mecklenburg farmers, when they saw the beginning of grading and macadamizing started, felt sure they were ruined, but by time the sample road was completed they were fighting, every man of them, for road by their farms—and they kept beating county commissioners until about all had got what they wanted. But the real rucus came with passage of the cattle tick law. The farmers in some sections of the South could not see how eradication of the tick could help them, and in some States, North Carolina included, dipping vats were destroyed and open warfare was made against enforcement of the cattle tick law. But as in the case of the no-fence and the road laws, understanding has come, though more slowly. There are counties in this State yet up in arms against the dipping vat. In time, however, all will see the light and become anti-tick advocates. The difference in conditions on a farm when it was infested by the cattle tick and after the tick has been eradicated was graphically illustrated this week by Mr. A. L. James, of Darlington, S. C., in the course of a talk in which he stated that while the boll weevil made it a necessity to change from cotton to dairying and livestock raising, it was only eradication of the cattle tick that made the change possible. When the ticks were on his farm, Mr. James said, he had 12 cows and the whole lot was worth not more than \$500. Now he has 44 Guernseys, including young stock, and these "are easily worth an average of \$300 a head."—Charlotte Observer.

### PUBLIC PATENT APPLIED FOR ON SHAFTLESS TOBACCO DUSTER

More than 200 acres of tobacco have been dusted for tobacco hornworm control with the experimental model of a tandem-wheel, shaftless type of one-mule two-row duster, since the perfection of this machine, which is a very important addition to tobaccogrowing equipment. Much better results have been obtained than would have been possible with hand dusters. As much as 18 acres have been dusted in a single day, about three times as much as could have been done with a hand duster. A patent is being dedicated to the public has been applied for, and already one of the older manufacturers of dusters has begun the construction experimental models of this type of machine, in which the Bureau of Entomology of the United States Department of Agriculture is very much interested. The advantages of the shaftless type over the shaft type of two-row duster lie in the fact that the center of gravity is lower and the fact that it can be turned in half the space required by the shaft type. It is also thought that the cost of construction will be less than that of the shaft duster.

**Chamberlain's Cough Remedy.** This is a pleasant, safe and reliable medicine for coughs and colds. It has been in use for many years and is held in high esteem in those households where its good qualities are best known. It is a favorite with mothers of young children, as it contains no opium or other harmful drug. Try it when you have need of such a remedy.

**Breaks colds - stops coughs!**

**Spare yourself** the watery, burning eyes, unpleasant mucous, sore chest and other disagreeable results of a cold. This simple treatment will soothe the roughened, strained throat, heal irritated tissues and break your cold quickly. Why wait—ask your druggist now for

**DR. KING'S NEW DISCOVERY - a syrup for coughs & colds.**

# IF SICK, BILIOUS! START YOUR LIVER

Don't Take Calomel! "Dodson's Liver Tone" Acts Better and Doesn't Gripe, Salivate or Make You Sick—Don't Lose a Day's Work—Read Guarantee

Ugh! Calomel makes you sick. "It's horrible! Take a dose of the dangerous drug tonight and tomorrow you may lose a day's work. Calomel is mercury or quicksilver which causes necrosis of the bones. Calomel, when it comes into contact with sour bile crashes into it, breaking it up. This is when you feel that awful nausea and cramping. If you are sluggish and "all knocked out," if your liver is torpid and bowels constipated or you have headache, dizziness, coated tongue, if breath is bad or stomach sour, just try a spoonful of harmless Dodson's Liver Tone tonight. Here's my guarantee—Go to any drug store and get a bottle of Dodson's Liver Tone for a few cents. Take a spoonful and if it doesn't straighten you right up and make you feel fine and vigorous I want you to go back to the store and get your money. Dodson's Liver Tone is destroying the sale of calomel because it is real liver medicine; entirely vegetable, therefore it can not salivate or make you sick.

# NOTICE!

When you buy Clothes it costs you money. We all realize that. Now aren't we foolish if we have them cleaned by an inefficient man in a way that will damage them? Water tends to shrink and fade and DOES NOT CLEAN. I am equipped to DRY CLEAN in a thorough way. Quick and Satisfactory Service is my Motto, and I absolutely guarantee all work to the extent that I will correct or refund the money if not satisfactory.
