ash, stamps or check with the copy.

IN NEED OF IMPROVEMENT

New York pastors complain that radio sermons are cutting into the oil fields in Washington. finances of the churches. But this, of course, is merely because radio is is still in its infancy. Later on means will be devised for passing the plate while the offertory is being played. No good churchman should be permitted to shirk his duties.

Dr. Coue is now with us. That he will receive much favorable attention is a foregone conclusion. He tells us something we are ready to believe: "Day by day in every way we are getting better and better." Secretly we acknowledge the truith and, on occasion and under pressure, have been known to admit it publicly.

RAINBOW END

The Nationalization Research Committee, a body appointed by the United Mine Workkers of America, suggests a plan for the nationalization of coal mines, the principal features of which are the unionization of all fields and a national basic wage. To the average student of political economy this will appear to be the begining of trouble rather than the end

MAY HEAR LAST WORDS

The fact that radio messages have recently been sent through a hundred and twenty-five feet of rock may revolutionize methods for rescuing miners imprisoned under the earth. It may not be long before every chamber is equipped with a radio set both for receiving and sending. This, while sometimes allaying feares, may also have a tendency to make disaster details even more

CHEAP SERVICE

M. Franchette, president of the French Socity for Wireless Study of Paris, has trained the wireless from the Eiffel Tower to wake him in the morning, tell him the time, draw the curtains, open the shutters, warm his coffee and "tote" his desk across the room to his bedside. With something or somebody to growl at on the side, a man might well consider himself as having all the comforts of home

AND PERHAPS NOT

You can buy an American cigarette in Moscow if you happen to have a million Russian rubles. But if you owned but one American ciggarette the chances are that the million rubles wouldn't appeal to you. There is no glamaur in being a millionaire where the country is chock-full of them. It doesn't mean anything. Perhaps Russia could stabilize her currency by forgeting the ciphers.

DRAWING TO A PAIR

Chief Sanitary Inspector of the Board of Health of Bayonne, N. J., reports that one of his Leghorn hens recently laid two eggs in one day, one in the morning and one in the evening. You can see for yourself how important this is. If hens can be induced to work double turn the price of feed will be reduced one-half per egg. This will either lower the price to the consumer or enrich some kindhearted and deserving middleman. Or it may necessitate the building of more cold storage houses and, labor being thus employed, accentuate the shortage of labor on dwellings, which, of course, may be as it should be, as there isn't enough coal to heat the houses we already have, anyhow.

THE HIGH COST OF JOY

It is estimated that Chicagowhich does nothing in a small wayspent about \$5,000,000 in welcoming the new year. These figures are computed from cash registers in the hotels and cafes. It is worth observing that the churches make no mention of what they may have received from the glad Chicagoans.

In New York eight persons were wounded by firearms and a great many fine ladies and gentlemen were

arrested for having consumed liquor in public places. There was an astonishing display of evening clothes tn the police courts of Manhatten.

It is all over now. The new year is settled in its world. And this newest child of time might have wondered, if it were capable of wonderment, at the contrasts of life in communities that will spend millions for an evening of inferior liquor and sketchy meals, while a distressingly large number of poor children are without adequate food and comwithout adequate food and compensations for better methods of frm or inspections developments, improvements of the school etc.—is earnestly sofuel shortage and sky-high coal

big 4th Anniversary bargains at our Yellow **Front Stores**

Four years ago, on January 6th, we celebrated the opening of our first chain store. To celebrate our Fourth Anniversary we are this week offering tremendous bargains.

We have opened more stores in the first four years of our existence than any other chain of stores in the world, and our wonderful success shows that our kind of stores were needed.

We are deeply grateful for your patronage and want to assure our many friends of our continued efforts to please them. Only best quality of merchandise at real economy prices. Every article sold in our store is sold under the condition that it must be absolutely satisfactory from every standpoint or your money cheerfully refunded.
