

**After Years Of Suffering**

Will Browning, Pattonburg, Mo., says, 'Chamberlain's Stomach and Liver Tablets cured my wife of serious bilious attacks and constipation from which she had suffered for years.' So easy to take, so pleasant in effect, and so small a cost.—only 25c.

—The problems of civilization will never be solved until everybody is satisfied with a little less money.

—Sudan grass can be grown on a sandy loam if it is well drained and fairly fertile. It is used as a summer pasture crop. It should not be sown with sweet clover because they do not belong together.

**Publisher Took Democrats to N. Y.**

Herbert Bayard Swope, Executive Editor of the New York World, is the man who first got the idea of landing the Democratic National Convention in New York this year. He followed through to the finish and for the first time since 1868, New York is being thrilled with a national convention.

—President Coolidge is going to spend the summer in Washington, which will be a vacation for him, with Congress adjourned.

—Science has figured out a way to apply radio to surgery and cut off legs with it. The large majority of radio sounds that way.

—Revenue to the government means income, to the taxpayer outgo and to the congressmen a lot of damaged fences.

—Farmers should prepare to fight the destructive watermelon diseases which seem sure to be with us this season. Where farmers fail to make the right kind of a start, there is no hope for their crop.

—The arbitration society is an organization in New York that settles the legal controversies of its members by means of a public tribunal. Two business men who are confronted with the prospect of a long and expensive lawsuit often find it more satisfactory to join the society and have their case settled quickly by expert opinion. It is not a money-making court, which would be against the law, but simply an arbitration society run for the convenience of its members.

—The American Museum of Natural History has placed on exhibition a shell known as the gloria maris, or glory of the sea, which is perhaps the rarest, and which is certainly one of the most beautiful, of all sea shells. It is about five inches long, a slender cone the prevailing shade of which is ivory, though in certain lights it has a pinkish lustre like a pearl. On the ivory background appear a spiral band of glowing orange and a fretwork of geometrical figures the sides of which vary from an eighth of an inch to an almost microscopic length. No specimen of the gloria maris is known to have been found since 1838.

—A home for aged people who have been rich and accustomed to the refinements of living, but who have been reduced to poverty, is soon to be opened in New York City. It is said to be as comfortable and as beautiful as the best hotels. The trustees make it plain that they cannot receive anyone who has been merely well-to-do at some time or other; they particularly want old couples who have always been used to every luxury and for that reason find poverty in old age doubly hard to bear. A worthy charity, no doubt; but how sardonic that provisions must seem to couples who are now poor enough to get in, but who have never been rich enough! It is going to exclude a lot of us.

**CALOMEL IS A DANGEROUS DRUG**

Next Dose may Salivate You, Loosen Teeth or Start Rheumatism.

Calomel is mercury; quicksilver. It crashes into sour bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

If you feel bilious, headachy, constipated and all knocked out, just go to your druggist and get a bottle of Dodson's Liver Tone for a few cents which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better than nasty calomel and without making you sick, you just go back and get your money.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. No salts necessary. Give it to the children because it is perfectly harmless and can not salivate.
